

Efficient, secure, competitive

Get the OT and solution you need to run the most efficient, secure, and competitive production. Choose Tetra Pak® PlantMaster, the optimal plant automation and information solution for food production. Let us support you in turning today's challenges into opportunities.

Produce more using less resources

Secure your planned output with increased stability.

Reduce product waste due to off-spec production.

Eliminate unplanned downtime and time losses in production by real-time information, supporting operators to make the right decisions every time.

Minimize consumption of valuable resources including raw materials, energy, steam, water, and detergent.

Ensure food safety and consistent product quality

Simplify your quality management with one system for your entire operation, regardless of equipment brand.

Replace manual quality reporting with a digitalised system.

Get complete automated control of workflows, operations, process parameters and critical control points in real-time.

Enable insights to secure your desired level of food quality.

Boost your competitiveness

Get data-based insights to continuously optimise your operations.

Obtain enhanced visibility of your KPI's and continuously improve performance.

Compare your production sites or benchmark against industry peers.

Get full traceability for your entire factory linking raw materials and process data all the way to finished goods in your warehouse.

One open MES software solution

Seamlessly integrate with the Cloud and ERP systems, any equipment or data source. Turn data into insights, reports, and dashboards to continuously drive and optimise your performance.
