How we work

We secure the output and results you want through our structured process model, consisting of four phases:

Inside the Delivery phase: quality assurance plan

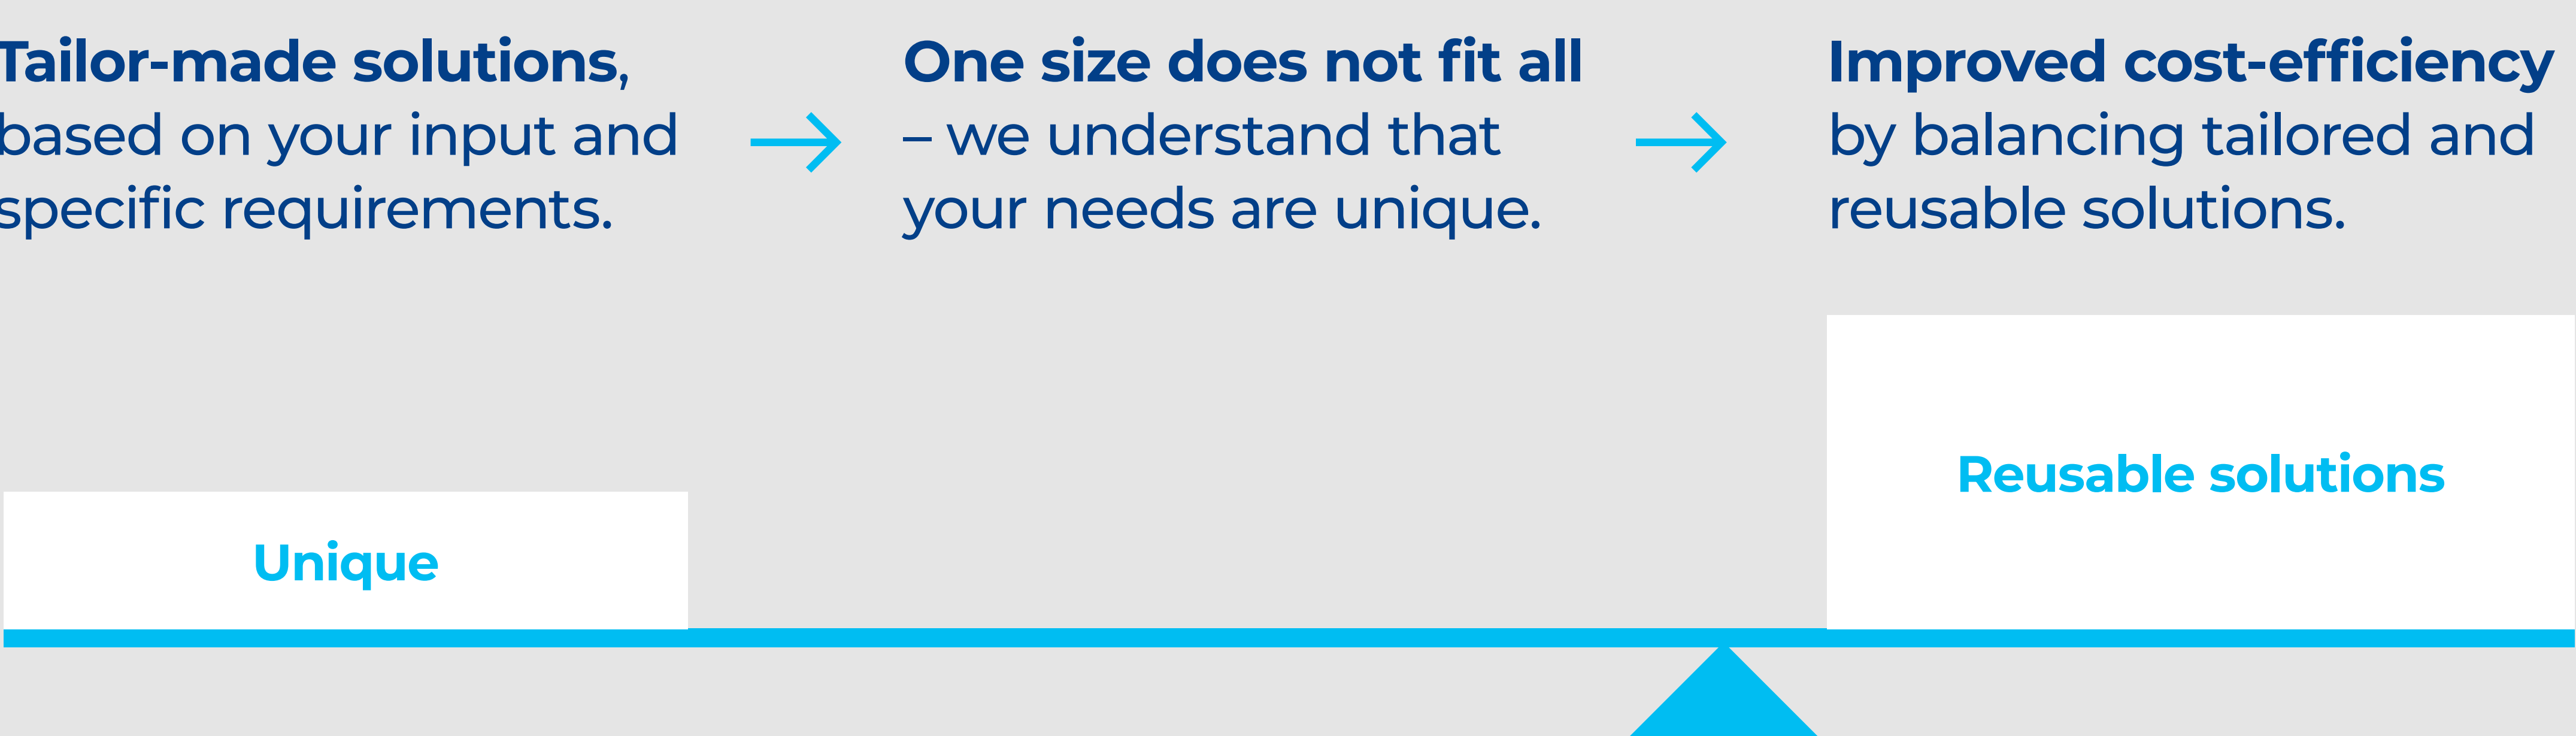

Verification and Validation of every process step in combination with the shape of the model – that’s why we call our structured way of working with project governance the V model.

Finding the balance between reusability and uniqueness

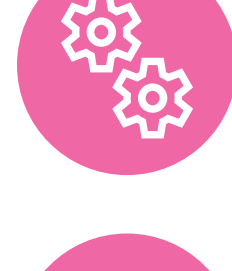

... to create a cost-efficient solution for you.

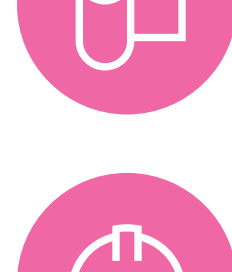

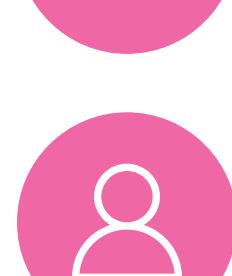

More than machinery

Projects are complex. Fortunately, we deliver more than equipment. We’ve got you covered with everything you may need to make your project – and your operations – successful:

-  Food and beverage expertise

 Process and packaging engineering

 Material handling and logistics

 Operational Health and Safety (OHS)

 Installation and site management

 Start-up services and training
-  Post-project maintenance and service

 Spare parts

 Automation and Digitalisation

 Product Development Centres (PDCs)

 Total Cost of Ownership (TCO)

 Project Management
