cost analysis

of your pet food packaging operations

Ready to find out if Tetra Recart® is a good fit for your business? Get the answers you need with a system cost workshop. This is where leaders from your company and our experts collaborate to explore the opportunities and challenges that come with adding Tetra Recart to your portfolio. Here's how it works:

1 AGREE

We enable the safe and transparent exchange of proprietary information between us and your company by signing a joint non-disclosure agreement.

2 SURVEY

We send a list of introductory questions about your company. This helps confirm we're all on the same page when it comes to your day-to-day operations and business objectives.

3 VISIT

5 REVIEW

Our experts visit your facility to meet your team and see your operations in person. This is typically a full-day meeting that includes your company's primary decision-makers.

Finally, we come back together to share our

This includes a breakdown of your projected

preliminary findings with your leadership team.

4 ANALYZE

After touring the facility with your team, our experts meet separately to evaluate what we've learned, then generate a no-nonsense estimate of how Tetra Recart could work in your environment.

NEXT STEPS Within a couple of weeks, you'll receive a detailed

written report of our key learnings and conclusions from the system cost workshop. Then we'll stand by to answer any more questions you have about getting set up for success with Tetra Recart.

HOW MUCH CAN YOU SAVE WITH TETRA RECART?

This sample system costs breakdown is based on an existing pet food operation with:

Line configuration	Tetra Recart	Cans	Pouches
Packaging material cost	50	57	33
Secondary packaging cost	8	6	13
Operational cost	23	35	38
Capital cost	10	9	11
Warehouse & transportation cost	9	16	12
Total system cost index	100	122	106
Savings		-18%	-6%

Figures may vary, but on average Tetra Recart 100 Mini provides a saving of about 20% compared to cans and 5% compared to pouches.
