# Operations

Operations training courses give your staff the skills to safely and efficiently operate your equipment. Our trainings include a mix of theoretical and practical lessons with an emphasis on a practical approach to learning.

## Training outcomes:

- Perform regular duties according to the operator manual
- Know daily/weekly care
- Understand how the equipment functions and how to operate it
- Understand personal safety and hygiene guidelines

# Processing

Tetra Pak provides processing solutions within 7 categories: dairy, cheese, ice-cream, beverage, powder, prepared food and plant-based.

Dairy

Cheese

Ice-cream

Beverage

Powder

Prepared  
food

Plant-  
based

## Introduction to Plant

### CT-20255

-  Target Group     **All production personnel**
-  Duration (Days)     **2**
-  Prerequisites     **None**
-  Max. Participant     **12**

### Description

This training is designed to give the participants an introduction to their processing plant. The objective is to provide all plant personnel with an insight to the process flow in the plant and production schedule. This course ideally be followed by the course "Introduction to Plant Operation" (CT-20256).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Plant production documents</li> <li>• General plant safety and hygiene practices</li> <li>• Processing areas and equipment</li> <li>• Services for plant production</li> <li>• Process flow and production schedule</li> <li>• Cleaning In Place set-up</li> <li>• Automation and electrical network</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Plant safety and hygiene for personnel, equipment and products</li> <li>• The plant processing equipment and services</li> <li>• The structure and purpose of plant production time schedule</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Follow plant safety guidelines and hygiene practices</li> <li>• Identify the plant production areas and equipment according to machinery lay out Identify the automation network and electrical components</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Introduction to Plant Operation

### CT-20256

-  Target Group **All production personnel**
-  Duration (Days) **2**
-  Prerequisites **Prior knowledge of plant production and/or Course CT-20255 "Introduction to Plant"**
-  Max. Participant **12**

### Description

This training is designed to give the participants theoretical and practical knowledge to run the processing plant. The objectives are to provide the plant production and maintenance personnel a thorough understanding of the plant functionalities and operations on the user interface. The course will give an insight to plant product quality and maintenance needs also.

It is recommended to take the specific courses for detailed understanding of the process equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Plant production documents</li> <li>• General plant safety and hygiene practices</li> <li>• Processing areas and equipment</li> <li>• Services for plant production</li> <li>• Process flow and production schedule</li> <li>• Cleaning In Place (CIP) set-up</li> <li>• Automation and electrical network</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Plant safety and hygiene for personnel, equipment and products</li> <li>• The plant processing equipment and services</li> <li>• The structure and purpose of plant production time schedule</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Follow plant safety guidelines and hygiene practices</li> <li>• Identify the plant production areas and equipment according to machinery lay out Identify the automation network and electrical components</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Milk Reception Unit

### CT-20264

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **2**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants the knowledge of how to operate the milk reception unit. The objectives are to provide operator training containing knowledge and terminology for the unit and how to run it according to the Operation Manual (OM). This training will also prepare the participants for training regarding process technology as well as other machines / equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic function of the unit</li> <li>• How to read and use manual(s) and documentation</li> <li>• Control panel</li> <li>• Hands-on activities</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Basic milk handling</li> <li>• The process of milk from cow to dairy</li> <li>• The main components in the unit, their functions and location</li> <li>• Basic food safety and the Critical Control Points (CCP)</li> <li>• Safety precautions and safety aspects</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Locate the main components on the unit</li> <li>• Prepare, start and operate the unit according to the Operation Manual (OM)</li> <li>• Describe the function of the push buttons on the Human Machine Interface (HMI)</li> <li>• Understand basic Cleaning In Place (CIP) technology and Cleaning In Place (CIP) procedures</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Alsafe™

### CT-20155

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **3**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants the knowledge of how to operate Tetra Alsafe™ (aseptic tank) with a specific number of options. The objectives are to provide operator training containing knowledge and terminology for aseptic tank.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Control Panel</li> <li>• Machine Components and Functions</li> <li>• Sterile Air System</li> <li>• Food Safety</li> </ul>	<ul style="list-style-type: none"> <li>• Prepare Production</li> <li>• Production</li> <li>• Care and Cleaning</li> <li>• Caustic Soda</li> <li>• Nitric Acid</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the aseptic line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing an aseptic product</li> </ul> <p><b>The participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Locate the main components in the aseptic tank module</li> <li>• Understand the purpose of various steps in the aseptic tank module</li> <li>• Start and operate the tank according to the Operation Manual (OM)</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>	

## Tetra Pak® Aseptic Tank

### CT-20664

-  Target Group     **Operators**
-  Duration (Days)     **3**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants the knowledge of how to operate Tetra Pak® Aseptic Tank with a specific number of options. The objectives are to provide operator training containing knowledge and terminology for Aseptic tank. Dairy, Beverage, Prepared food, Operation, Aseptic buffering.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Control Panel</li> <li>• Machine Components and Functions</li> <li>• Sterile Air System</li> <li>• Food Safety</li> </ul>	<ul style="list-style-type: none"> <li>• Prepare Production</li> <li>• Production</li> <li>• Care and Cleaning</li> <li>• Caustic Soda</li> <li>• Nitric Acid</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the line and their locations and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing a product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Understand the purpose of the various steps when operating the unit</li> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Understand the function of the push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>	

## Tetra Pak® Homogenizer

### CT-20203

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants an introduction to Tetra Pak® Homogenizers. The objectives are to provide operators training containing knowledge and terminology for the equipment and how to safely operate it according to the Operation Manual (OM). This training will also prepare the participants for training courses regarding basic food technology as well as other units.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• The main components, their functions and location</li> <li>• Working principles</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Basic homogenization theory</li> <li>• The working principles</li> <li>• The main components in the unit and their location and terminology</li> <li>• The importance of safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and locate the main components in the unit</li> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Follow safety precautions</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Aseptic Drink

### CT-20166

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **3**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants an introduction to Tetra Therm™ Aseptic Drink. The objectives are to provide operator training containing knowledge of how to operate and terminology for the Tetra Therm™ Aseptic Drink module and how to run the unit according to the Operation Manual (OM).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Control Panel</li> <li>• Machine Components and Functions</li> <li>• Beverage Processing and Technology</li> <li>• Food Safety</li> <li>• Prepare Production</li> </ul>	<ul style="list-style-type: none"> <li>• Production</li> <li>• Stop Production</li> <li>• Check Production</li> <li>• Care and Cleaning</li> <li>• Verify Cleaning</li> <li>• Nitric Acid</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the aseptic line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing a beverage product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the aseptic processing module</li> <li>• Understand the purpose of various steps in the processing module</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Aseptic Flex (Indirect UHT System)

### CT-20167

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>2.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants an introduction to Tetra Therm™ Aseptic Flex (indirect UHT system) The objectives are to provide operator training containing knowledge and terminology for indirect modules and how to carry out all operations steps according to the Operation Manual (OM).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Control Panel</li> <li>• Machine Components and Functions</li> <li>• Food Safety</li> </ul>	<ul style="list-style-type: none"> <li>• Prepare Production</li> <li>• Production</li> <li>• Production Checks</li> <li>• Care and Cleaning</li> <li>• Verify Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the aseptic line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing an aseptic product</li> </ul> <p><b>The participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the aseptic processing module</li> <li>• Understand the purpose of various steps in the processing module</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Aseptic VTIS (Direct UHT System)

### CT-20169

-  Target Group **Operators and maintenance personnel**
-  Duration (Days) **2.5**
-  Prerequisites **None**
-  Max. Participant **6**

### Description

This training is designed to give the participants an introduction to Tetra Therm™ Aseptic VTIS (direct UHT system). The objectives are to provide operator training containing knowledge and terminology for direct modules.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Control Panel</li> <li>• Machine Components and Functions</li> <li>• Food Safety</li> </ul>	<ul style="list-style-type: none"> <li>• Stop Production</li> <li>• Production</li> <li>• Production Checks</li> <li>• Care and Cleaning</li> <li>• Verify Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the aseptic line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing an aseptic product</li> </ul> <p><b>The participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the aseptic processing module</li> <li>• Understand the purpose of various steps in the processing module</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Aseptic VTIS Plus Mode

### CT-20143

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **2.5**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants an introduction to Tetra Therm™ Aseptic VTIS Plus Mode (direct UHT system). The objectives are to provide operator training containing knowledge and terminology for direct modules.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Control Panel</li> <li>• Machine Components and Functions</li> <li>• Food Safety</li> <li>• Prepare Production</li> </ul>	<ul style="list-style-type: none"> <li>• Stop Production</li> <li>• Production</li> <li>• Production Checks</li> <li>• Care and Cleaning</li> <li>• Verify Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Control Panel</li> <li>• Machine Components and Functions</li> <li>• Food Safety</li> </ul> <p><b>The participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the aseptic processing module</li> <li>• Understand the purpose of various steps in the processing module</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Aseptic VTIS Flex Mode

### CT-20144

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **2.5**
-  Prerequisites     **None**
-  Max. Participant     **6**

## Tetra Pak® Pasteurizer D

### CT-20272

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **3**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants an introduction to the pasteurizer (formerly known as Tetra Therm™ Lacta). The objectives are to provide operator training containing knowledge and terminology for indirect modules and how to carry out all operations steps according to the Operation Manual (OM).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Caustic Soda</li> <li>• Nitric Acid</li> <li>• Control Panel</li> <li>• Milk Science</li> <li>• Microbiology of Milk</li> <li>• Machine Components and Functions</li> </ul>	<ul style="list-style-type: none"> <li>• Food Safety</li> <li>• Prepare Production</li> <li>• Production</li> <li>• Check Production</li> <li>• Stop Production</li> <li>• Cleaning In Place (CIP) Basics</li> <li>• Cleaning In Place (CIP)/COP</li> <li>• Verify Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing a product</li> </ul> <p><b>The participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the aseptic processing module</li> <li>• Understand the purpose of various steps in the processing module</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Aseptic Visco (THE)

### CT-20168

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **3**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants an introduction to Tetra Therm™ Aseptic Visco (UHT system) with tubular heat exchangers (Spriaflo). The objectives are to provide operator training containing knowledge and terminology for the module and how to carry out all operations steps according to the Operation Manual (OM). This training will also prepare the participants for other training courses, for example Tetra Pak® CIP Unit training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operations of the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Product behaviour</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing an aseptic product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the aseptic processing module</li> <li>• Understand the purpose of various steps in the processing module</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Aseptic Visco (SSHE)

### CT-20658

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **3**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants an introduction to Tetra Therm™ Aseptic Visco (UHT system) with scraped surface heat exchangers (Contherm). The objectives are to provide operator training containing knowledge and terminology for the module and how to carry out all operations steps according to the operations manual (OM). This training will also prepare the participants for other training courses, for example Tetra Pak® CIP Unit training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operations of the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Product behaviour</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing an aseptic product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the aseptic processing module</li> <li>• Understand the purpose of various steps in the processing module</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Extraction Unit Soy

### CT-20267

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants the knowledge of how to operate the extraction unit (formerly known as Tetra Alwin™ Soy). The objective is to provide operator training containing knowledge and terminology for the unit and how to run it according to the Operations Manual (OM).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Unit components and functions</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing product in the unit</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the aseptic processing module</li> <li>• Understand the purpose of various steps in the processing module</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® High Shear Mixer

### CT-20164

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **2**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants operational skills for their regular duties and tasks as operators of Tetra Pak® High Shear Mixer (formerly known as Tetra Alwin™). The training is task based around the operating manual.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Control Panel</li> <li>• Machine Components and Functions</li> <li>• Food Safety</li> <li>• Prepare Production</li> </ul>	<ul style="list-style-type: none"> <li>• Production</li> <li>• Check Production</li> <li>• Stop Production</li> <li>• Cleaning In Place (CIP) Basics</li> <li>• Cleaning In Place (CIP)/COP</li> <li>• Verify Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the mixing system and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process steps of producing a product with the mixing system</li> </ul> <p><b>The participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Locate the main components in the mixing system</li> <li>• Understand the purpose of various functions in the mixing system</li> <li>• Start and operate the mixer according to the approved documentation</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI), if included in the system</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of following the production protocol (e.g. order and handling of ingredients)</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Albatch™

### CT-20152

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **1.5**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants operational skills for their regular duties and tasks as a Tetra Albatch™ machine operator. The training is task based around the operating manual. The objectives are to train the participants to carry out all operations steps according to the Operation Manual (OM) including daily care and cleaning. This training will also prepare the participants for other training courses, for example Tetra Pak® Cleaning In Place (CIP) Unit training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the Tetra Albatch™ machine and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process steps of producing a product with Tetra Albatch™ machine</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the tank according to the Operation Manual (OM)</li> <li>• Locate the main components in the Tetra Albatch™ machine</li> <li>• Understand the purpose of various functions in the food processor</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li style="width: 50%;">• Equipment, available and without defects</li> <li style="width: 50%;">• Proper PPE</li> <li style="width: 50%;">• Ability to run the machine with water / product when needed</li> <li style="width: 50%;">• Equipment specific tools for operations</li> <li style="width: 50%;">• Plant SOP, Critical Control Point plan, equipment log book</li> <li style="width: 50%;">• Set of manuals available during the training</li> <li style="width: 50%;">• Classroom with whiteboard / flip chart and projector</li> </ul>

## Tetra Alblend™

### CT-20153

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **3**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants the knowledge of how to operate Tetra Alblend™ (in-line blender). The objectives are to provide operator training containing knowledge and terminology for the equipment and how to run it according to the Operation Manual (OM). This training will also prepare the participants for training courses regarding basic food technology as well as other units.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the unit and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process and tasks required to produce product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the equipment according to the Operation Manual (OM)</li> <li>• Locate the main components of the in-line blender</li> <li>• Understand the purpose of the various steps when operating the in-line blender</li> <li>• Understand the function of the push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of the filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li style="width: 50%;">• Equipment, available and without defects</li> <li style="width: 50%;">• Proper PPE</li> <li style="width: 50%;">• Ability to run the machine with water / product when needed</li> <li style="width: 50%;">• Equipment specific tools for operations</li> <li style="width: 50%;">• Plant SOP, Critical Control Point plan, equipment log book</li> <li style="width: 50%;">• Set of manuals available during the training</li> <li style="width: 50%;">• Classroom with whiteboard / flip chart and projector</li> </ul>

## Tetra Albrix™

### CT-20154

	Target Group	<b>Operators and maintenance personnel</b>
	Duration (Days)	<b>3</b>
	Prerequisites	<b>None</b>
	Max. Participant	<b>6</b>

### Description

This training is designed to give the participants the knowledge of how to operate Tetra Albrix™ machine unit (continuous sugar-dissolving unit). The objectives are to provide operator training containing knowledge and terminology for the equipment and how to run it according to the Operation Manual (OM). This training will also prepare the participants for training courses regarding basic food technology as well as other units.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the unit and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of sugar dissolving</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the continuous sugar-dissolving unit</li> <li>• Understand the purpose of the various steps when operating the unit</li> <li>• Understand the function of the push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of the filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li style="width: 50%;">• Equipment, available and without defects</li> <li style="width: 50%;">• Proper PPE</li> <li style="width: 50%;">• Ability to run the machine with water / product when needed</li> <li style="width: 50%;">• Equipment specific tools for operations</li> <li style="width: 50%;">• Plant SOP, Critical Control Point plan, equipment log book</li> <li style="width: 50%;">• Set of manuals available during the training</li> <li style="width: 50%;">• Classroom with whiteboard / flip chart and projector</li> </ul>

## Tetra Pak® Aseptic Dosing Unit E (Tetra Aldose™)

### CT-20262

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants operational skills for their regular duties and tasks as operators. The training is task based around the Operating Manual (OM). The objectives are to train the participants to carry out all Operations steps including daily care and cleaning. As this is task based learning there will be a focus on safety, hygiene and handling of the container and hose.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Hygiene</li> <li>• Preparation</li> <li>• Operations of unit according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Daily care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The importance of safety precautions</li> <li>• The importance of maintaining high hygiene</li> <li>• The function of the dosing unit</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Locate the main groups of the unit</li> <li>• Understand the use of the Human Machine Interface (HMI) control panel</li> <li>• Read and react to alarms</li> <li>• Prepare and start up</li> <li>• Start and run the unit according to best practice in manual</li> <li>• Operate the dosing unit to make aseptic dosing into product</li> <li>• Perform daily care</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li style="width: 50%;">• Equipment, available and without defects</li> <li style="width: 50%;">• Proper PPE</li> <li style="width: 50%;">• Ability to run the machine with water / product when needed</li> <li style="width: 50%;">• Equipment specific tools for operations</li> <li style="width: 50%;">• Plant SOP, Critical Control Point plan, equipment log book</li> <li style="width: 50%;">• Set of manuals available during the training</li> <li style="width: 50%;">• Classroom with whiteboard / flip chart and projector</li> </ul>

## Tetra FlexDos™

### CT-20156

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants operational skills for their regular duties and tasks as operators of the dosing unit (formerly known as Tetra Aldose™). The training is task based around the operating manual (OM). The objectives are to train the participants to carry out all Operations steps according to the Operation Manual (OM) including daily care and cleaning. As this is task based learning there will be a focus on safety, hygiene and handling of the dosing unit.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Hygiene</li> <li>• Preparation</li> <li>• Operations of unit according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Daily care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The importance of safety precautions</li> <li>• The importance of maintaining high hygiene</li> <li>• The function of the Tetra FlexDos™ unit</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Locate the main groups of the Tetra FlexDos™ unit</li> <li>• Understand the use of the Human Machine Interface (HMI) control panel</li> <li>• Read and react to alarms</li> <li>• Prepare and start up</li> <li>• Start and run the unit according to best practice in manual</li> <li>• Operate the Tetra FlexDos™ unit to make aseptic dosing into product</li> <li>• Perform daily care</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li style="width: 50%;">• Equipment, available and without defects</li> <li style="width: 50%;">• Proper PPE</li> <li style="width: 50%;">• Ability to run the machine with water / product when needed</li> <li style="width: 50%;">• Equipment specific tools for operations</li> <li style="width: 50%;">• Plant SOP, Critical Control Point plan, equipment log book</li> <li style="width: 50%;">• Set of manuals available during the training</li> <li style="width: 50%;">• Classroom with whiteboard / flip chart and projector</li> </ul>

## Tetra Pak® CIP Unit

### CT-20161

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>1.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants an introduction to the Tetra Pak® CIP Unit (formerly known as Tetra Alcip™) with a specific number of options. The objectives are to provide operator training containing knowledge and terminology for the Cleaning In Place (CIP) system. This training will also prepare the participants for more advanced training courses.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the cleaning line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing a cleaning sequence</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the Cleaning In Place (CIP) Unit according to the Operation Manual (OM)</li> <li>• Locate the main components in the Cleaning In Place (CIP) Unit</li> <li>• Understand the purpose of various steps when operating the Cleaning In Place (CIP) Unit</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Separator

### CT-20204

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **1**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants an introduction to Tetra Pak® Separators, Clarifiers and Bactofuge units. The objectives are to provide Operators training containing knowledge and terminology for the equipment and how to safely operate it according to the Operation Manual (OM). This training will also prepare the participants for training courses regarding basic food technology as well as other units.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the unit according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• The main components, their functions and location</li> <li>• Working principles</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The basics of centrifugal separation and applications</li> <li>• The working principles</li> <li>• The main components in the unit and their location and terminology</li> <li>• The importance of the safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Identify and locate the main components in the unit</li> <li>• Understand design and function of the equipment</li> <li>• Understand the function of push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Follow safety precautions</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Standardization Unit S2

### CT-20672

-  Target Group     **Operators**
-  Duration (Days)     **2**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This is a fundamental training to be able to operate a Tetra Pak® Standardization Unit S2. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the equipment safely, efficiently, and without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Machine Components and Functions</li> <li>• General Control Panel Knowledge</li> <li>• Standardization Theory</li> <li>• Food Safety</li> <li>• Production</li> <li>• Care and Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Operate the machine through the production cycle – preparation to weekly care</li> <li>• Know all safety measure for the operation</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Carbonator

### CT-20668

-  Target Group     **Operators**
-  Duration (Days)     **2**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants the knowledge of how to operate the Carbonator (formally known as Miteco equipment). The objectives are to provide operator training containing knowledge and terminology for the equipment and how to run it according to the Operation Manual (OM). This training will also prepare the participants for training courses regarding basic food technology as well as other units.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components, location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process and tasks required to produce product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the carbonator</li> <li>• Understand the purpose of the various steps when operating the carbonator</li> <li>• Understand the function of the push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of the filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Set of manuals available during the training</li> </ul>

## Water Deaerator

### CT-20676

-  Target Group     **Operators**
-  Duration (Days)     **1**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants the knowledge of how to operate the Water Deaerator. The objectives are to provide operator training containing knowledge and terminology for the equipment and how to run it according to the Operation Manual (OM). This training will also prepare the participants for training courses regarding basic food technology as well as other units.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components, location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process and tasks required to produce product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the deaerator</li> <li>• Understand the purpose of the various steps when operating the deaerator</li> <li>• Understand the function of the push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of the filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Set of manuals available during the training</li> </ul>

## Multimix

### CT-20678

	Target Group	<b>Operators</b>
	Duration (Days)	<b>2</b>
	Prerequisites	<b>None</b>
	Max. Participant	<b>6</b>

### Description

This training is designed to give the participants the knowledge of how to operate the Multimix. The objectives are to provide operator training containing knowledge and terminology for the equipment and how to run it according to the Operation Manual (OM). This training will also prepare the participants for training courses regarding basic food technology as well as other units.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components, location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process and tasks required to produce product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the multimix</li> <li>• Understand the purpose of the various steps when operating the multimix</li> <li>• Understand the function of the push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of the filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Set of manuals available during the training</li> </ul>

## Simultmix

### CT-20680

-  Target Group     **Operators**
-  Duration (Days)     **2**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give the participants the knowledge of how to operate the Simultmix. The objectives are to provide operator training containing knowledge and terminology for the equipment and how to run it according to the Operation Manual (OM). This training will also prepare the participants for training courses regarding basic food technology as well as other units.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Operating the module according to the Operation Manual (OM)</li> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components, location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process and tasks required to produce product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Start and operate the unit according to the Operation Manual (OM)</li> <li>• Locate the main components of the simultmix</li> <li>• Understand the purpose of the various steps when operating the simultmix</li> <li>• Understand the function of the push buttons on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of the filling in the production protocol</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Preparation System B-EXT

### CT-20736

-  Target Group     **Operators**
-  Duration (Days)     **1**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This is a fundamental training to be able to operate a Tetra Pak® Preparation System B-EXT. It includes a mix of presentation, demonstration and exercises. Some parts take place mainly at the equipment, but the training also includes parts that preferably are done in a classroom. It will prepare the student for operating the machine safely, efficiently, and without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Machine Components and Functions</li> <li>• Human Machine Interface (HMI) Knowledge</li> <li>• Batch Preparation and Production</li> <li>• Stop Production</li> <li>• Care and Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Be able to operate the equipment through the production cycle – from preparation to care and cleaning</li> <li>• Know all safety measures for the operation</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Access to all supplies that are needed for preparation / production</li> <li>• If the customer's equipment is fitted with suction spears, make sure necessary tools are available for suction spear swapping</li> <li>• Connected with downstream equipment</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Continuous Sugar Dissolver

### CT-20739

-  Target Group     **Operators**
-  Duration (Days)     **1**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This is a fundamental training to be able to operate a Tetra Pak® Continuous Sugar Dissolver. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the machine safely, efficiently, and without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction</li> <li>• Safety</li> <li>• Use of documentation</li> <li>• General Control Panel Knowledge</li> <li>• Continuous Sugar Dissolving Unit Functionality</li> <li>• Cleaning In Place (CIP) and Food safety</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Operate the machine through the production cycle – preparation to weekly care</li> <li>• Know all safety measure for the operation</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Access to all supplies that are needed for preparation / production</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Set of manuals available during the training</li> </ul>

## Powder Production – Drying

### CT-20150

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **3**
-  Prerequisites     **Course  
"Dairy Processing & Technology – Basic"**
-  Max. Participant     **6**

### Description

This training is designed to give the participants an introduction to the operations of the dryer area of the plant and how the relevant components and processes, including Cleaning In Place (CIP), work together. The objectives are to provide operator training containing knowledge and terminology for the module and how to carry out all tasks related to setup, checks, operation and Cleaning In Place (CIP) steps according to the Operation Manual (OM). The course can include homogenization and ingredient addition (if applicable to the process).

<b>Content</b>	<ul style="list-style-type: none"> <li>How to read and use manual(s) and documentation</li> <li>Module components and functions</li> <li>How to follow the process on Human Machine Interface (HMI) and Piping and Instrumentation Diagram (P&amp;IDs)</li> <li>Daily and weekly care</li> <li>Safety precautions</li> <li>Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>The main components, location and terminology</li> <li>The importance of safety precautions</li> <li>The process and tasks required to produce product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>Setup, check, operate and Cleaning In Place (CIP) of the unit(s) according to the Operation Manual (OM)</li> <li>Locate the main components and follow the process flow of the dryer</li> <li>Understand the purpose of the various steps in the processing module</li> <li>Understand the function of the selections on the Human Machine Interface (HMI)</li> <li>Understand the different alarm signals</li> <li>Know the importance of filling in the production documents</li> <li>Identify process control points and critical control points</li> <li>Use and understand the manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>Equipment, available and without defects</li> <li>Ability to run the machine with water / product when needed</li> <li>Plant SOP, Critical Control Point plan, equipment log book</li> <li>Classroom with whiteboard / flip chart and projector</li> <li>Proper PPE</li> <li>Equipment specific tools for operations</li> <li>Set of manuals available during the training</li> </ul>

## Powder Production – Evaporation

### CT-20151

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>Course</b> <b>“Dairy Processing &amp; Technology – Basic”</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants an introduction to the operations of the evaporator areas of the plant and how the relevant components and processes, including Cleaning In Place (CIP), work together. The objectives are to provide operator training containing knowledge and terminology for the module and how to carry out all tasks related to setup, checks, operation and Cleaning In Place (CIP) steps according to the Operation Manual (OM). The course can include pasteurization and ingredient addition (if applicable to the process).

<b>Content</b>	<ul style="list-style-type: none"> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• How to follow the process on Human Machine Interface (HMI) and Piping and Instrumentation Diagram (P&amp;IDs)</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components, location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process and tasks required to produce product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Setup, check, operate and Cleaning In Place (CIP) of the unit(s) according to the Operation Manual (OM)</li> <li>• Locate the main components and follow the process flow of the dryer</li> <li>• Understand the purpose of the various steps in the processing module</li> <li>• Understand the function of the selections on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production documents</li> <li>• Identify process control points and critical control points</li> <li>• Use and understand the manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li style="width: 50%;">• Equipment, available and without defects</li> <li style="width: 50%;">• Proper PPE</li> <li style="width: 50%;">• Ability to run the machine with water / product when needed</li> <li style="width: 50%;">• Equipment specific tools for operations</li> <li style="width: 50%;">• Plant SOP, Critical Control Point plan, equipment log book</li> <li style="width: 50%;">• Set of manuals available during the training</li> <li style="width: 50%;">• Classroom with whiteboard / flip chart and projector</li> </ul>

## Powder Production – Wet Process

### CT-20238

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>Course “Dairy Processing &amp; Technology – Basic”</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants an introduction to the operations of the wet process areas of the plant and how the relevant components and processes, including Cleaning In Place (CIP), work together. The objectives are to provide operator training containing knowledge and terminology for the module and how to carry out all tasks related to setup, checks, operation and Cleaning In Place (CIP) steps according to the Operation Manual (OM). The course can include pasteurization, homogenization and ingredient addition (if applicable to the process).

<b>Content</b>	<ul style="list-style-type: none"> <li>• How to read and use manual(s) and documentation</li> <li>• Module components and functions</li> <li>• How to follow the process on Human Machine Interface (HMI) and Piping and Instrumentation Diagram (P&amp;IDs)</li> <li>• Daily and weekly care</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components, location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process and tasks required to produce product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Setup, check, operate and Cleaning In Place (CIP) of the unit(s) according to the Operation Manual (OM)</li> <li>• Locate the main components and follow the process flow of the dryer</li> <li>• Understand the purpose of the various steps in the processing module</li> <li>• Understand the function of the selections on the Human Machine Interface (HMI)</li> <li>• Understand the different alarm signals</li> <li>• Know the importance of filling in the production documents</li> <li>• Identify process control points and critical control points</li> <li>• Use and understand the manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Final Pressing & Mould Handling System

### CT-20253

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **3**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to provide participants with the theoretical knowledge and practical operational skills required to carry out regular duties and tasks according to the Operation Manual (OM). It gives participants a good understanding of the working principles and the Human Machine Interface (HMI) of the system.

<b>Content</b>	<ul style="list-style-type: none"> <li>• The main components, their functions and location</li> <li>• Cleaning In Place (CIP) and production functions</li> <li>• Operations from Human Machine Interface (HMI)</li> <li>• Use of documentation</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Basic line functions and main components</li> <li>• Cleaning In Place (CIP) and production program</li> <li>• Operational control</li> <li>• The importance of safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Understand design and function of the equipment</li> <li>• Locate the main components in the system</li> <li>• Understand and use the functions of Human Machine Interface (HMI)</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Blockformer System

### CT-20254

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **2**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to provide participants with the theoretical knowledge and practical operational skills required to carry out regular duties and tasks for the blockforming solution according to the Operation Manual (OM).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Functional parts and essential components</li> <li>• Product flow and product processing</li> <li>• Operating principles</li> <li>• Out of Control Action Plans</li> <li>• Performance improvement</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles of the system</li> <li>• Functions of the system and how to operate it</li> <li>• The methods of the Cleaning In Place (CIP) and production program</li> <li>• The importance of safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Influence and operate the system</li> <li>• Understand the function of the selections on the Human Machine Interface (HMI)</li> <li>• Understand how to use parameter settings to optimize performance</li> <li>• Use and understand the manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Casomatic System MC: Level 1

### CT-20157

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to provide participants with the theoretical knowledge and practical operational skills required to carry out regular duties and tasks according to the Operation Manual (OM). It gives participants a good understanding of the working principles and the Human Machine Interface (HMI) of the Tetra Pak® Casomatic system MC (multicolumn continuous whey drainage and cheese shaping system).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic principles of cheese making</li> <li>• Main functionality of the system and its main components</li> <li>• Cleaning In Place (CIP) and production functions</li> <li>• Operations from Human Machine Interface (HMI)</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The main components in the aseptic line and their location and terminology</li> <li>• The importance of safety precautions</li> <li>• The process of producing an aseptic product</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Influence and operate the system</li> <li>• Understand and use manuals and documentation</li> <li>• Operate the system and adjust production when needed</li> <li>• Understand the importance of safety precautions</li> <li>• Understand and use the functions of the Human Machine Interface (HMI)</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Casomatic System MC: Level 2

### CT-20158

 Target Group **Operators and maintenance personnel**

 Duration (Days) **2**

 Prerequisites **Course CT-20157  
"Tetra Pak® Casomatic system MC: Level 1"**

 Max. Participant **6**

### Description

This training is designed to provide participants with in-depth understanding of the functionality and performance of the Tetra Pak® Casomatic system MC (multicolumn continuous whey drainage and cheese shaping system). It gives the theoretical knowledge required to evaluate proper functionality of the system, how to regain normal situation at abnormal functionality and ways to increase system performance.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Out of Control Action Plans</li> <li>• Performance improvement</li> <li>• Parameters</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Key functions of the system, in depth</li> <li>• How to evaluate functionality of the system</li> <li>• What counter actions are possible to do when functionality is abnormal</li> <li>• The effect of key parameters and ways to improve performance</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Influence and operate the machine</li> <li>• Understand and use manuals and documentation</li> <li>• React on the most common abnormal system situations</li> <li>• Understand how to use parameter settings to optimize performance</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Casomatic System SC: Level 1

### CT-20159

	Target Group	<b>Operators and maintenance personnel</b>
	Duration (Days)	<b>3</b>
	Prerequisites	<b>None</b>
	Max. Participant	<b>6</b>

### Description

This training is designed to provide participants with the theoretical knowledge and practical operational skills required to carry out regular duties and tasks according to the Operation Manual (OM). It gives participants a good understanding of the working principles and the Human Machine Interface (HMI) of the Tetra Pak® Casomatic system SC (single column continuous whey drainage and cheese shaping system).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic principles of cheese making</li> <li>• Main functionality of the system and its main components</li> <li>• Cleaning In Place (CIP) and production functions</li> <li>• Operations from Human Machine Interface (HMI)</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• How to evaluate functionality of the system</li> <li>• Basic functionality principles and main components</li> <li>• The methods of the Cleaning In Place (CIP) and production program</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Influence and operate the system</li> <li>• Understand and use manuals and documentation</li> <li>• Operate the system and adjust production when needed</li> <li>• Understand the importance of safety precautions</li> <li>• Understand and use the functions of the Human Machine Interface (HMI)</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Casomatic System SC: Level 2

### CT-20160

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **2**
-  Prerequisites     **Course CT-20159  
"Tetra Pak® Casomatic system SC: Level 1"**
-  Max. Participant     **6**

### Description

This training is designed to provide participants with in-depth understanding of the functionality and performance of the Tetra Pak® Casomatic system SC (single column continuous whey drainage and cheese shaping system). It gives the theoretical knowledge required to evaluate proper functionality of the system, how to regain normal situation at abnormal functionality and ways to increase system performance.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Out of Control Action Plans</li> <li>• Performance improvement</li> <li>• Parameters</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Key functions of the system, in depth</li> <li>• How to evaluate functionality of the system</li> <li>• What counter actions are possible to do when functionality is abnormal</li> <li>• The effect of key parameters and ways to improve performance</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Influence and operate the system</li> <li>• Understand and use manuals and documentation</li> <li>• React on the most common abnormal system situations</li> <li>• Understand how to use parameter settings to optimize performance</li> </ul>

## Tetra Pak® Cheddaring Machine

### CT-20233

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to provide participants with the theoretical knowledge and practical operational skills required to carry out regular duties and tasks according to the Operation Manual (OM). It gives participants a good understanding of the working principles and the Human Machine Interface (HMI).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Cheese technology and draining, acidification and salting process</li> <li>• Functionality and key parts</li> <li>• Cleaning In Place (CIP) general method</li> <li>• Production</li> <li>• Machine functionality advanced</li> <li>• Out of Control Action Plans</li> <li>• Performance Improvement</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Functionality principles and main components of the vat</li> <li>• How to evaluate functionality of the machine and improve its performance</li> <li>• The methods of the Cleaning In Place (CIP) (Cleaning In Place) and production program</li> <li>• The importance of safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Influence and operate the vat</li> <li>• Understand and use manuals and documentation</li> <li>• React on the most common abnormal machine situations</li> <li>• Understand and use the functions of Human Machine Interface (HMI)</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Cheddaring Machine 5

### CT-20687

 Target Group	<b>Operators</b>
 Duration (Days)	<b>1.5</b>
 Prerequisites	<b>Basic knowledge about food processing equipment</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to provide participants with the theoretical knowledge and practical operational skills required to carry out regular duties and tasks to properly operate the machine with support of the Operation Manual (OM). It gives participants a good understanding of the working principles of the machine, its main components, safety and ultimately, how to operate the machine via the Human Machine Interface (HMI).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Product flow and product processing</li> <li>• Equipment functionality</li> <li>• Equipment main parts</li> <li>• Safety handling of the equipment</li> <li>• Production &amp; operation principles</li> <li>• Clean in Place</li> <li>• Control Panel and Human Machine Interface (HMI)</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>To prepare the customer operators into:</b></p> <ul style="list-style-type: none"> <li>• Influence and operate the machine</li> <li>• Understand and use manuals and documentation</li> <li>• React on the most common abnormal machine situations</li> <li>• Understand the importance of safety precautions</li> <li>• Understand and use the functions of Human Machine Interface (HMI)</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the equipment with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Hand tools</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Additional spare parts required for start up</li> </ul>

## Tetra Pak® Cheese Vat OST

### CT-20232

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to provide participants with the theoretical knowledge and practical operational skills required to carry out regular duties and tasks according to the Operation Manual (OM). It gives participants a good understanding of the working principles and the Human Machine Interface (HMI).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Cheese technology and curd making process</li> <li>• Functionality and key parts</li> <li>• Cleaning In Place (CIP) general method</li> <li>• Production</li> <li>• Vat functionality advanced (e.g. mixing in rennet, order of ingredient addition, coagulation, cutting sequence, stirring sequence)</li> <li>• Out of Control Action Plans</li> <li>• Performance improvement</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Functionality principles and main components of the machine</li> <li>• How to evaluate functionality of the machine and optimise its performance</li> <li>• The methods of the Cleaning In Place (CIP) and production program</li> <li>• The importance of safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Influence and operate the machine</li> <li>• Understand and use manuals and documentation</li> <li>• React on the most common abnormal machine situations</li> <li>• Understand and use the functions of Human Machine Interface (HMI)</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Cheese Vat Yield Master

### CT-20695

 Target Group	<b>Operators</b>
 Duration (Days)	<b>1.5</b>
 Prerequisites	<b>Basic knowledge about food processing equipment</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental training to be able to operate the UniPack solution. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the equipment safely and efficiently, without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Product flow and product processing</li> <li>• Equipment functionality</li> <li>• Equipment main parts</li> <li>• Safety handling of the equipment</li> <li>• Production &amp; operation principles</li> <li>• Clean in Place</li> <li>• Control Panel and Human Machine Interface (HMI)</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>To prepare the customer operators into:</b></p> <ul style="list-style-type: none"> <li>• Influence and operate the machine</li> <li>• Understand and use manuals and documentation</li> <li>• React on the most common abnormal machine situations</li> <li>• Understand the importance of safety precautions</li> <li>• Understand and use the functions of Human Machine Interface (HMI)</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the equipment with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Hand tools</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Additional spare parts required for start up</li> </ul>

## Tetra Pak® Automatic Single Stick Inserter

### CT-20248

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **0.5**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give participants a technical and operational understanding of the automatic single stick inserter. The training includes both theoretical and practical knowledge on the operations of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• Principle of maintenance</li> <li>• Automation and electrical introduction</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Automatic Multi Stick Inserter

### CT-20702

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **1**
-  Prerequisites     **Access to processing equipment for hands-on training\*: 1 to 2 hours**
-  Max. Participant     **6**

### Description

This training is designed to give participants a technical and operational understanding of the automatic multi stick inserter for Tetra Pak® Rotary Moulder. The training includes both theoretical and practical knowledge on the operation and the maintenance of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Best practise maintenance</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• Principle of maintenance</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Perform routine maintenance care</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

\* Time for taking out of production and preparing for production not included

## Tetra Pak® Continuous Freezer

### CT-20162

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give participants a technical and operational understanding of the Tetra Pak® Continuous Freezer. The training ensures an understanding of the ice cream structure by focusing on giving an insight of the main components in and the operations of the continuous ice cream freezer. The training includes both theoretical and practical knowledge on the operations of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to ice cream</li> <li>• Working principles of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Continuous Freezer S

### CT-20163

 Target Group	<b>Operators and maintenance personnel</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give participants a technical and operational understanding of the self-contained Tetra Pak® Continuous Freezer S. The training ensures an understanding of the ice cream structure by focusing on giving an insight of the main components in and the operations of the continuous ice cream freezer. The training includes both theoretical and practical knowledge on the operations of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to ice cream</li> <li>• Working principles of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Ice Cream Choice Filler A1

### CT-20716

-  Target Group     **Operators**
-  Duration (Days)     **2 (Practical training time: 6 to 8 hours)**
-  Prerequisites     **Access to processing equipment for practical training: 2 to 3 hours per day (Time for taking out production and preparing for production not included)**
-  Max. Participant     **6**

### Description

This training is designed to give participants a technical and operational understanding of the continuous ice cream filling machines and equipment. The training ensures an understanding by focusing on giving an insight of the main components in and the operation of the ice cream filling machine. The training includes both theoretical and practical knowledge on the operation of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction of ice cream filling machine</li> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manuals and documentation</li> <li>• Learning evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety of the machine</li> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Ice Cream Smart Filler AI

### CT-20719

-  Target Group     **Operators**
-  Duration (Days)     **2 (Practical training time: 6 to 8 hours)**
-  Prerequisites     **Access to processing equipment for practical training: 2 to 3 hours per day (Time for taking out production and preparing for production not included)**
-  Max. Participant     **6**

### Description

This training is designed to give participants a technical and operational understanding of the continuous ice cream filling machines and equipment. The training ensures an understanding by focusing on giving an insight of the main components in and the operation of the ice cream filling machine. The training includes both theoretical and practical knowledge on the operation of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction of ice cream filling machine</li> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manuals and documentation</li> <li>• Learning evaluation</li> </ul>

## Tetra Pak® Dip and Transfer Unit A3

### CT-20234

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **1**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give participants a technical and operational understanding of the dip and transfer unit including the pick and place unit. The training includes both theoretical and practical knowledge on the operations of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• The importance of safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Extrusion Tunnel A3

### CT-20235

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **2**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give participants a technical and operational understanding of the extrusion tunnel. The training includes both theoretical and practical knowledge on the operations of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• The importance of safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Extrusion Tunnel M3

### CT-20266

 Target Group **Operators and maintenance personnel**

 Duration (Days) **3**

 Prerequisites **Access to processing equipment for hands-on training\*: 2 to 3 hours per day**

 Max. Participant **6**

### Description

This training is designed to give participants a technical and operational understanding of the extrusion tunnel. The training includes both theoretical and practical knowledge on the operations of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

\* Time for taking out of production and preparing for production not included

## Tetra Pak® Rotary Moulder 23/27 M

### CT-20704

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **2**
-  Prerequisites     **Access to processing equipment for hands-on training\*: 2 to 3 hours per day**
-  Max. Participant     **6**

### Description

This training is designed to give participants a technical and operational understanding of the rotary moulder 23/27 M including the extractor. The training includes both theoretical and practical knowledge of both the operation and the maintenance activities.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

\* Time for taking out of production and preparing for production not included

## Tetra Pak® Ingredient Doser

### CT-20165

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **1**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give participants a technical and operational understanding of the ingredient doser (Tetra Pak® Ingredient Doser or Tetra Hoyer Addus FF). The training includes both theoretical and practical knowledge.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Multilane Wrapper

### CT-20237

-  Target Group     **Operators and maintenance personnel**
-  Duration (Days)     **0.5**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training is designed to give participants a technical and operational understanding of the multilane wrapper (model A2). The training includes both theoretical and practical knowledge on the operations of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® A3/CompactFlex

**0200-0300: CT-20100**

**0400: CT-20577**

 Target Group **Operators**

 Duration (Days) **4**

 Prerequisites **None**

 Max. Participant **6**

### Description

This is a fundamental training to be able to operate a Tetra Pak® A3/ CompactFlex filling machine. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the machine safely and efficiently, without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Hydrogen Peroxide</li> <li>• General Control Panel Knowledge</li> <li>• Machine Components and Functions</li> <li>• Sterile Air System and Components</li> <li>• Prepare after Weekly Care</li> <li>• Prepare after Daily Care</li> <li>• Start Production</li> </ul>	<ul style="list-style-type: none"> <li>• Check Equipment</li> <li>• Package Checks</li> <li>• Strip Splice and Strip Reel</li> <li>• Supply Packaging Material</li> <li>• Stop Production</li> <li>• Cleaning</li> <li>• Perform Daily Care</li> <li>• Perform Weekly Care</li> <li>• Sterilization Liquid</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Operate the machine through the production cycle – preparation to weekly care</li> <li>• Know all safety measure for the operation</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® A3/CompactFlex with PullTab™

**0200-0300: CT-20105**

**0400: CT-20578**

 Target Group **Operators**

 Duration (Days) **4.5**

 Prerequisites **None**

 Max. Participant **6**

### Description

This is a fundamental training to be able to operate a Tetra Pak® A3/CompactFlex with PullTab™ filling machine. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the machine safely and efficiently, without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Hydrogen Peroxide</li> <li>• General Control Panel Knowledge</li> <li>• Machine Components and Functions</li> <li>• Sterile Air System and Components</li> <li>• Prepare after Weekly Care</li> <li>• Prepare after Daily Care</li> <li>• Start Production</li> </ul>	<ul style="list-style-type: none"> <li>• Check Equipment</li> <li>• Package Checks</li> <li>• Strip Splice and Strip Reel</li> <li>• Supply Packaging Material</li> <li>• Stop Production</li> <li>• Cleaning</li> <li>• Perform Daily Care</li> <li>• Perform Weekly Care</li> <li>• Sterilisation Liquid</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Operate the machine through the production cycle – preparation to weekly care</li> <li>• Know all safety measure for the operation</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® A3/Speed

**0100: CT-20119**

**0200-0400: CT-20101**

**0500: CT-20608**

 Target Group **Operators**

 Duration (Days) **4**

 Prerequisites **None**

 Max. Participant **6**

### Description

This is a fundamental training to be able to operate a Tetra Pak® A3/Flex with DIMC filling machine. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the machine safely and efficiently, without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Hydrogen Peroxide</li> <li>• General Control Panel Knowledge</li> <li>• Machine Components and Functions</li> <li>• Sterile Air System and Components</li> <li>• Prepare after Weekly Care</li> <li>• Prepare after Daily Care</li> <li>• Start Production</li> </ul>	<ul style="list-style-type: none"> <li>• Check Equipment</li> <li>• Package Checks</li> <li>• Strip Splice and Strip Reel</li> <li>• Supply Packaging Material</li> <li>• Stop Production</li> <li>• Cleaning</li> <li>• Perform Daily Care</li> <li>• Perform Weekly Care</li> <li>• Sterilisation Liquid</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Operate the machine through the production cycle – preparation to weekly care</li> <li>• Know all safety measure for the operation</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Downstream Equipment Line Operation

### CT-20139

 Target Group	<b>Operators</b>
 Duration (Days)	<b>1.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental training to be able to operate the downstream line. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will provide the student with an overall understanding of the line and how each equipment is connected with each other. It will also prepare the student for operating the downstream line.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• Tetra Pak® Filling Line</li> <li>• Downstream Line Components</li> <li>• Preparation</li> <li>• Conveyor Lubrication</li> <li>• Check Production</li> <li>• Perform Stops</li> <li>• Care and Clean</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognise how a Tetra Pak® filling line is built up</li> <li>• Know how different downstream equipment's are connected to each other</li> <li>• Be able to prepare, operate and perform checks on the downstream line</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® Line Controller 30 0100-0300 and Plus-0100

### CT-20327

 Target Group	<b>Operators</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental training to be able to operate Tetra Pak® Line Controller 30 equipment. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the equipment safely, efficiently, and without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Safety</li> <li>• Line Controller Introduction</li> <li>• General Control Panel Knowledge</li> <li>• Preparation</li> <li>• Production</li> <li>• Stop Production</li> <li>• Perform Daily Care</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Be able to interact with the equipment through the production cycle - preparation to weekly care</li> <li>• Be able to work safely on the equipment</li> <li>• Recognise the Tetra Pak® packaging line and its components</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Cleaning aids for daily care</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® Line Controller 30 Plus-0200-0300

### CT-20331

 Target Group	<b>Operators</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental training to be able to operate a Tetra Pak® Line Controller 30. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the equipment safely, efficiently, and without jeopardizing food safety.

## Tetra Pak® Cardboard Packer 34-0100

### CT-20710

-  Target Group     **Operators**
-  Duration (Days)     **1**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This is a fundamental training to be able to operate a Tetra Pak® Cardboard Packer 34 machine. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the machine safely, efficiently, and without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Safety</li> <li>• Machine Components and Functions</li> <li>• General Control Panel Knowledge</li> <li>• Preparation</li> <li>• Production</li> <li>• Supply Material</li> <li>• Stop Production</li> <li>• Perform Daily Care</li> <li>• Perform Weekly Care</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Operate the machine through the production cycle – preparation to weekly care</li> <li>• Know all safety measure for the operation</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the downstream equipment including packages and cardboard blanks</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Cleaning compound, scissors and proper PPE</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® Cardboard Packer 70

**0400-0600: CT-20359**

**0700-1000: CT-20362**

**1100-1200: CT-20366**

## A520i for Tetra Pak® by Domino

### CT-20111

 Target Group	<b>Operators</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental course for operators to be able to operate an A520i for Tetra Pak® by Domino ink jet printer. It includes both theory and practise, but primarily it has a practical approach. The course will prepare the student for operating the equipment in a safe and efficient way.

<b>Content</b>	<ul style="list-style-type: none"> <li>• A520i Introduction</li> <li>• Health and Safety</li> <li>• Ink Principles and Function</li> <li>• Operation and Quickstep</li> <li>• Printing Performance</li> <li>• Care and Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Be able to operate the equipment, including creating messages</li> <li>• Be able to care for the equipment, including replacing articles of consumption</li> <li>• Know what health and safety precautions to observe when performing operator tasks</li> <li>• Recognise the principle and basic function of the ink system</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• This course takes place mainly by the equipment, but some parts can be done without it</li> <li>• It must be possible to operate the equipment, but it must not necessarily be connected to a filling machine</li> <li>• Proper PPE</li> <li>• Safety Data Sheets for the current ink types</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Ax550i for Tetra Pak® by Domino

### CT-20600

 Target Group	<b>Operators</b>
 Duration (Days)	<b>0.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental course for operators to be able to operate an Ax550i for Tetra Pak® by Domino ink jet printer. It includes both theory and practise, but primarily it has a practical approach. The course will prepare the student for operating the equipment in a safe and efficient way.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Ax550i Introduction</li> <li>• Health and Safety</li> <li>• Operation</li> <li>• Quickstep</li> <li>• Printing Performance</li> <li>• Fluid Supply</li> <li>• Care and Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Know what health and safety precautions to observe when performing operator tasks</li> <li>• Be able to operate the equipment, including creating messages</li> <li>• Be able to care for the equipment, including replacing articles of consumption</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• This course takes place mainly by the equipment, but some parts can be done without it</li> <li>• It must be possible to operate the equipment, but it must not necessarily be connected to a filling machine</li> <li>• Proper PPE</li> <li>• Safety Data Sheets for the current ink types</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® R1

**0300-0400: CT-20698**

**0500: CT-20622**

 Target Group	<b>Operators</b>
 Duration (Days)	<b>3*</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental training to be able to operate a Tetra Pak® R1 filling machine. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the machine safely and efficiently, without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• General Control Panel Knowledge</li> <li>• Machine Components and Functions</li> <li>• Prepare after Weekly Care</li> <li>• Prepare after Daily Care</li> <li>• Start Production</li> <li>• Check Equipment</li> <li>• Supply Packaging Material</li> <li>• Stop Production</li> <li>• Cleaning</li> <li>• Perform Daily Care</li> <li>• Perform Weekly Care</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Operate the machine through the production cycle – preparation to weekly care</li> <li>• Know all safety measure for the operation</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>
<b>Required Facilities</b>	The machine ready to run with water

\*Duration will vary depending on the number of participants and plant set-up

## Tetra Pak® R2

**0500: CT-20623**

**0600: CT-20714**

 Target Group	<b>Operators</b>
 Duration (Days)	<b>3*</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental training to be able to operate a Tetra Pak® R2 filling machine. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the machine safely and efficiently, without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Use of Documentation</li> <li>• General Hygiene</li> <li>• General Safety</li> <li>• General Control Panel Knowledge</li> <li>• Machine Components and Functions</li> <li>• Prepare after Weekly Care</li> <li>• Prepare after Daily Care</li> <li>• Start Production</li> <li>• Check Equipment</li> <li>• Supply Packaging Material</li> <li>• Stop Production</li> <li>• Cleaning</li> <li>• Perform Daily Care</li> <li>• Perform Weekly Care</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Operate the machine through the production cycle – preparation to weekly care</li> <li>• Know all safety measure for the operation</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>
<b>Required Facilities</b>	The machine ready to run with water

\*Duration will vary depending on the number of participants and plant set-up

## CM/HHS 700/160 for Tetra Pak® by Meurer

### CT-20674

 Target Group	<b>Operators</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental training to be able to operate a Meurer Highspeed Horizontal Shrink Wrapper/ Film packaging machine. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the machine safely, efficiently and without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Safety</li> <li>• Functions and Processes</li> <li>• Start up</li> <li>• Operation</li> <li>• Preparation</li> <li>• Production</li> <li>• End of Production</li> <li>• Cleaning</li> <li>• Change over</li> <li>• Perform daily / weekly / monthly care</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Be able to operate the machine through the production cycle - preparation to weekly care</li> <li>• Know all safety measures for the operation</li> <li>• Know how to do mechanical Recipe changes</li> <li>• Know how to eliminate simple operational faults</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the downstream equipment including packages and film reels</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Cleaning compound, scissors and proper PPE</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## CM/HTW 450 for Tetra Pak® by Meurer

### CT-20675

-  Target Group     **Operators**
-  Duration (Days)     **1**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This is a fundamental training to be able to operate a Meurer Highspeed Tray and Wraparound Casepacker. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the machine safely, efficiently, and without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Safety</li> <li>• Functions and Processes</li> <li>• Start up</li> <li>• Operation</li> <li>• Preparation</li> <li>• Production</li> <li>• End of Production</li> <li>• Cleaning</li> <li>• Change over</li> <li>• Perform daily / weekly / monthly care</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Be able to operate the machine through the production cycle - preparation to weekly care</li> <li>• Know all safety measures for the operation</li> <li>• Know how to do mechanical Recipe changes</li> <li>• Know how to eliminate simple operational faults</li> <li>• Know the hygiene and food safety measures for the operation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the downstream equipment including packages and film reels</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Cleaning compound, scissors and proper PPE</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

# Maintenance

Maintenance training courses give your staff the skills to safely and efficiently maintain your equipment. This training will provide them with theoretical and practical knowledge of the different parts and functions of the equipment.

## Training outcomes:

- Understand basic knowledge of how to operate the equipment and the machine components and functions
- Enable participants to perform all tasks according to the Tetra Pak® Maintenance System customer lists and use the Tetra Pak® Maintenance System checklists
- Lay the foundation for performing basic troubleshooting on the mechanical parts

# Processing

Tetra Pak provides processing solutions within 7 categories: dairy, cheese, ice-cream, beverage, powder, prepared food and plant-based.

Dairy

Cheese

Ice-cream

Beverage

Powder

Prepared food

Plant-based

## Tetra Pak® Casomatic System MC

### CT-20257

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>3.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to provide participants with a good understanding of the working principles and the Human Machine Interface (HMI) of the Tetra Pak® Casomatic system MC (multicolumn continuous whey drainage and cheese shaping system). In addition, it gives participants theoretical knowledge and practical experience of the maintenance activities. This training will also prepare participants to perform basic risk assessment, troubleshooting and maintenance best practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic principles of cheese making</li> <li>• Key functionality of the system and its main components</li> <li>• Cleaning In Place (CIP) and production functionality</li> <li>• Operations from Human Machine Interface (HMI)</li> </ul>	<ul style="list-style-type: none"> <li>• Service: electrical and mechanical</li> <li>• Hands-on activities</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Maintenance best practices</li> <li>• Risk assessment of maintenance activity</li> <li>• Maintenance of key components</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals [Technical Manual (TeM) and Maintenance Manual (MM)] and in the system</li> <li>• Handle Human Machine Interface (HMI) alarm and troubleshooting</li> <li>• Perform maintenance activities including system specific components</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> </ul>	<ul style="list-style-type: none"> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> <li>• Access to processing equipment for hands-on training*: 6 to 8 hours</li> </ul>

\*Time for taking out of production and preparing for production not included

## Tetra Pak® Blockformer System 6

### CT-20684

 Target Group     **Technicians**

 Duration (Days)     **1**

 Prerequisites

- **Good mechanical skills & basic electrical knowledge**
- **Experience with safety standard procedures and general food hygiene**
- **Basic knowledge about pneumatic components and systems**

 Max. Participant     **6**

### Description

This training is designed to provide participants on how to perform the routine maintenance jobs required on the equipment in a safe and effective way. Also explains how to do preventive maintenance on the equipment.

The course will cover how to use machine documentation, understand how to operate the equipment according to Technical Manual (TeM), understand the machine functions and perform mechanical settings.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Risk Assessment – Maintenance</li> <li>• Safety in and around the equipment</li> <li>• Maintenance Methodology</li> <li>• Main maintenance jobs</li> <li>• Spare parts &amp; consumables</li> <li>• Preventive maintenance</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Operate the machine in accordance with Technical Manual (TeM)</li> <li>• Identify machine sections and terminology according to machine documentation</li> <li>• Describe machine sections, functions, and flow</li> <li>• Understand control panel functionality</li> <li>• Identify and describe electrical components inside cabinet</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

<b>Content</b>	<ul style="list-style-type: none"> <li>• Risk Assessment – Maintenance</li> <li>• Safety in and around the equipment</li> <li>• Maintenance Methodology</li> <li>• Main maintenance jobs</li> <li>• Spare parts &amp; consumables</li> <li>• Preventive maintenance</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Operate the machine in accordance with Technical Manual (TeM)</li> <li>• Identify machine sections and terminology according to machine documentation</li> <li>• Describe machine sections, functions, and flow</li> <li>• Understand control panel functionality</li> <li>• Identify and describe electrical components inside cabinet</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® Cooker Stretcher (SAW Series)

### CT-20692

 Target Group     **Technicians**

 Duration (Days)     **1**

 Prerequisites

- **Good mechanical skills & basic electrical knowledge**
- **Experience with safety standard procedures and general food hygiene**
- **Basic knowledge about pneumatic components and systems**

 Max. Participant     **6**

### Description

This training is designed to provide participants on how to perform the routine maintenance jobs required on the equipment in a safe and effective way. Also explains how to do preventive maintenance on the equipment.

The course will cover how to use machine documentation, understand how to operate the equipment according to Technical Manual (TeM), understand the machine functions and perform mechanical settings.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Risk Assessment – Maintenance</li> <li>• Safety in and around the equipment</li> <li>• Maintenance Methodology</li> <li>• Main maintenance jobs</li> <li>• Spare parts &amp; consumables</li> <li>• Preventive maintenance</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Operate the machine in accordance with Technical Manual (TeM)</li> <li>• Identify machine sections and terminology according to machine documentation</li> <li>• Describe machine sections, functions, and flow</li> <li>• Understand control panel functionality</li> <li>• Identify and describe electrical components inside cabinet</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® Rotary Moulding Machine RMC 12

### CT-20694

 Target Group     **Technicians**

 Duration (Days)     **1**

 Prerequisites

- **Good mechanical skills & basic electrical knowledge**
- **Experience with safety standard procedures and general food hygiene**
- **Basic knowledge about pneumatic components and systems**

 Max. Participant     **6**

## Tetra Pak® CIP Unit

### CT-20181

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>Basic processing knowledge</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the maintenance activity of the Cleaning In Place (CIP) Unit (formerly known as Tetra Alcip™). This is to also enable basic maintenance of main components in the Cleaning In Place (CIP) system. This training will also prepare participants to perform basic risk assessment, troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic functions of the processing equipment</li> <li>• How to read and use manual(s) and documentation</li> <li>• Control panel</li> </ul>	<ul style="list-style-type: none"> <li>• Hands on activities</li> <li>• Safety precautions</li> <li>• Learning evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Best practices</li> <li>• Risk assessment of maintenance activity</li> <li>• Maintenance of main components</li> <li>• Operational, food safety and critical control points</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance and in the equipment)</li> <li>• Handle Human Machine Interface (HMI) alarm and troubleshooting with help of Operation Manual (OM)</li> <li>• Do chemical dosing pump maintenance</li> <li>• Do maintenance of conductivity meter</li> <li>• Identify spare parts number identification for ordering with help of Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Contherm Scraped-surface Heat Exchanger

### CT-20174

-  Target Group **Personnel performing maintenance of the unit**
-  Duration (Days) **1**
-  Prerequisites **None**
-  Max. Participant **6**

### Description

This training is designed to train the participants to understand the working principle and how to carry out the maintenance of scraped-surface heat exchanger units (Contherm).

<b>Content</b>	<ul style="list-style-type: none"> <li>• Design and working principle</li> <li>• How to read and use manual and documentation</li> <li>• General maintenance of this unit according to the instruction manual</li> <li>• Troubleshooting</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• The design and working principle of a scraped-surface heat exchanger</li> <li>• The importance of safety precautions</li> <li>• The preparations required prior to maintenance</li> <li>• Best practices for maintenance</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manual and on the unit</li> <li>• Perform preventive maintenance on this unit</li> <li>• Follow safety precautions</li> <li>• Understand the principles of heat transfer for this unit</li> <li>• Handle the hydraulic rotor lift system</li> <li>• Perform basic troubleshooting</li> <li>• Use and understand manual and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Continuous Freezer

### CT-20182

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>Basic processing knowledge</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give participants a technical and operational understanding of the Tetra Pak® Continuous Freezer. The training ensures an understanding of the ice cream structure by focusing on giving a complete insight of the main components in the ice cream freezer. The training includes both theoretical and practical knowledge of the maintenance activities.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to ice cream</li> <li>• Working principles of main components</li> <li>• How to read and use manual(s) and documentation</li> </ul>	<ul style="list-style-type: none"> <li>• Best practice maintenance</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Principles of maintenance</li> <li>• Operational control</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Perform routine maintenance care, including:                             <ul style="list-style-type: none"> <li>– Adjustment and overhaul mix- and cream pumps</li> <li>– Inspection and maintenance of cylinder, dasher, scraper knives and beater</li> </ul> </li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>	

## Tetra Pak® Continuous Freezer S

### CT-20183

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>Basic processing knowledge</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give participants a technical and operational understanding of the self-contained Tetra Pak® Continuous Freezer S. The training ensures an understanding of the ice cream structure by focusing on giving a complete insight of the main components in the ice cream freezer. The training includes both theoretical and practical knowledge of the maintenance activities.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to ice cream</li> <li>• Working principles of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Best practice maintenance</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Principles of maintenance</li> <li>• Operational control</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Perform routine maintenance care, including:                             <ul style="list-style-type: none"> <li>– Adjustment and overhaul mix- and cream pumps</li> <li>– Inspection and maintenance of cylinder, dasher, scraper knives and beater</li> </ul> </li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Ice Cream Choice Filler A1

### CT-20717

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>3 (Practical training time: 8 to 12 hours)</b>
 Prerequisites	<b>Access to processing equipment for practical training: 2 to 3 hours per day (Time for taking out production and preparing for production not included)</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give participants a technical and operational understanding of the ice cream filling machines and equipment. The training ensures an understanding by focusing on giving an insight of the main components in and the operation of the ice cream filling machine. The training includes both theoretical and practical knowledge on the operation of the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction of ice cream filling machine</li> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manuals and documentation</li> <li>• Learning Evaluation</li> <li>• Show Maintenance personnel what each component is in the panel as a comparison to the electrical print. So engineers can put 2 &amp; 2 together</li> <li>• Comparison to the electrical print. So engineers can put 2 &amp; 2 together             <ul style="list-style-type: none"> <li>- Electrical Schematic Training</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Reactive and Preventative Maintenance, Intro to tech. Tips             <ul style="list-style-type: none"> <li>- Show Maintenance Engineers the ins and outs of the Manual and how to you find information</li> <li>- Show maintenance personnel how to operate the equipment like an operator working on the line.</li> <li>- Demonstrate maintenance personnel about basic troubleshooting and reliability</li> </ul> </li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety of the machine</li> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• Principles of maintenance</li> <li>• Basic troubleshooting</li> </ul>	<p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Perform routine maintenance care, including:             <ul style="list-style-type: none"> <li>– Adjustment, basic setting and overhaul of equipment</li> <li>– Inspection and maintenance of attachments</li> </ul> </li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> <li>• Access to processing equipment for hands-on training</li> </ul>

## Ice Cream Smart Filler AI

### CT-20720

-  Target Group **Personnel performing maintenance of the unit**
-  Duration (Days) **3 (Practical training time: 8 to 12 hours)**

\*Time for taking out of production and preparing for production not included

## Tetra Pak® Extraction Unit Soy

### CT-20259

-  Target Group **Personnel performing maintenance of the unit**
-  Duration (Days) **3**
-  Prerequisites **Access to processing equipment for hands-on training\*: 8 hours**
-  Max. Participant **6**

### Description

This training is designed to give the participants theoretical and practical knowledge of the maintenance activity of Tetra Pak® Extraction Unit (formerly known as Tetra Alwin™ Soy). This is to also enable basic maintenance of the main components in the unit. This training will also prepare participants to handle troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic function of the extraction unit</li> <li>• How to read and use manual(s) and documentation</li> <li>• Control panel</li> <li>• Hands-on activities</li> </ul>	<ul style="list-style-type: none"> <li>• Maintenance activity on selected components</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Best maintenance practices</li> <li>• Maintenance of main components</li> <li>• Extraction unit Operation and functionality</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Operation) and on the unit</li> <li>• Handle Human Machine Interface (HMI) alarms and troubleshooting with the help of the Operation Manual (OM)</li> <li>• Perform maintenance of grinder (coarse or fine)</li> <li>• Perform maintenance of decanter (greasing and routine check)</li> <li>• Perform maintenance of other components (e.g. pumps and valves)</li> <li>• Identify spare parts numbers for ordering with the help of the Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> <li>• Access to processing equipment for hands-on training*: 8 hours</li> </ul>

\*Time for taking out of production and preparing for production not included

## Tetra Pak® Extrusion Tunnel A3

### CT-20240

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give participants a technical and operational understanding of the extrusion tunnel. The training includes both theoretical and practical knowledge of both the operation and the maintenance activities.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• Technical construction of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Best practise maintenance</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• Principle of maintenance</li> <li>• Automation and electrical introduction</li> <li>• Basic troubleshooting</li> <li>• The importance of safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Perform routine maintenance care</li> <li>• Operate and adjust the equipment</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Powder Mixer

### CT-20621

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the maintenance activity of the equipment. This is to also enable basic maintenance of the main components in the system. This training will also prepare participants to perform basic risk assessment, troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic functions of the equipment</li> <li>• How to read and use manual(s) and documentation</li> <li>• General maintenance of this unit</li> <li>• Control panel</li> <li>• Hands on activities</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>

## Tetra Pak® High Shear Mixer

### CT-20242

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>2.5</b>
 Prerequisites	<b>Operations training course "Tetra Pak High Shear Mixer" (CTO-12120)</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the maintenance activity of the equipment. This is to also enable basic maintenance of the main components in the system. This training will also prepare participants to perform basic risk assessment, troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic functions of the processing equipment</li> <li>• How to read and use manual(s) and documentation</li> <li>• General maintenance of this unit</li> <li>• Control panel</li> </ul>	<ul style="list-style-type: none"> <li>• Hands on activities</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Principles of maintenance</li> <li>• Maintenance best practices and risk assessment</li> <li>• Operational, food safety and critical control points</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance) and the unit</li> <li>• Handle Human Machine Interface (HMI) alarms and troubleshooting with the help of the Operation Manual (OM)</li> <li>• Perform preventive maintenance on this unit</li> <li>• Identify spare parts numbers for ordering with the help of the Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> <li>• Access to processing equipment for hands-on training*: 4 hours</li> </ul>

## Carbonator

### CT-20669

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the maintenance activity of the equipment. This is to also enable basic maintenance of the main components in the system. This training will also prepare participants to perform basic risk assessment, troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic functions of the equipment</li> <li>• How to read and use manual(s) and documentation</li> <li>• General maintenance of this unit</li> <li>• Control panel</li> <li>• Hands on activities</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Principles of maintenance</li> <li>• Maintenance best practices and risk assessment</li> <li>• Operational, food safety and critical control points</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance) and the unit</li> <li>• Handle Human Machine Interface (HMI) alarms and troubleshooting with the help of the Operation Manual (OM)</li> <li>• Perform preventive maintenance on this unit</li> <li>• Identify spare parts numbers for ordering with the help of the Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>

## Tetra Pak® Continuous Sugar Dissolver

### CT-20738

	Target Group	<b>Technicians</b>
	Duration (Days)	<b>2</b>
	Prerequisites	<b>None</b>
	Max. Participant	<b>6</b>

### Description

This training block is designed to give the participants an introduction to the Tetra Pak® Continuous Sugar dissolver unit. The objective is to provide technicians with an understanding of the machine functionality, operation, documentation, and safety. This will allow them to understand how the machine works and therefore facilitating safe maintenance.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Sugar Dissolver main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Control panel</li> <li>• Cleaning In Place (CIP) General principles, Cleaning In Place (CIP) and Food safety</li> <li>• Hands on activities on module</li> <li>• Maintenance activity on selected components</li> <li>• Safety precautions</li> <li>• Learning evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Principles of maintenance</li> <li>• Maintenance best practices and risk assessment</li> <li>• Operational, food safety and critical control points</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify components in the manuals and the unit</li> <li>• Handle Human Machine Interface (HMI) alarms and troubleshooting with the help of the Operation Manual (OM)</li> <li>• Perform preventive maintenance on this unit</li> <li>• Identify spare parts numbers for ordering with the help of the Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment logbook</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Homogenizer

### CT-20184

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>4</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to train the participants to understand the working principle of homogenizer and carry out maintenance of the wet end and supply system (cooling) of this unit (formerly known as Tetra Alex™).

<b>Content</b>	<ul style="list-style-type: none"> <li>• The working principles and components of this unit</li> <li>• How to read and use manual(s) and documentation</li> <li>• Perform General maintenance of this unit according to the Technical Manual (TeM)</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• How to perform maintenance of the wet end and supply system (cooling)</li> <li>• Function and design of this equipment</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance) and in the equipment</li> <li>• Perform preventive maintenance on this unit</li> <li>• Follow safety precautions</li> <li>• Prepare unit pre-maintenance</li> <li>• Dismantle of suction and discharge valves</li> <li>• Remove and replacing of piston</li> <li>• Remove and replacement of homogenizing head</li> <li>• Identify and explain different types of wear and tear</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> <li>• Access to processing equipment for hands-on training*: 11 hours</li> </ul>

\*Time for taking out of production and preparing for production not included

## Tetra Pak® Ingredient Doser

### CT-20185

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give participants a technical and operational understanding of the ingredient doser including Tetra Pak® Ingredient Doser and Tetra Hoyer Addus. The training includes both theoretical and practical knowledge of the maintenance activities.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Best practice maintenance</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles and control loops</li> <li>• Technical construction of the main components</li> <li>• Principles of maintenance</li> <li>• Operational control</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Perform routine maintenance care of:                             <ul style="list-style-type: none"> <li>– Dosing screw (dosing auger)</li> <li>– Feed pump (lamella pump)</li> <li>– Inline blender</li> </ul> </li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® In-line Blender

### CT-20261

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the maintenance activity of the in-line blender (formerly known as Tetra Alblend™). This is to also enable basic maintenance of the main components in the blender. This training will also prepare participants to handle troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic function of the unit</li> <li>• How to read and use manual(s) and documentation</li> <li>• Control panel</li> <li>• Hands-on activities</li> </ul>	<ul style="list-style-type: none"> <li>• Maintenance activity on selected components</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Best maintenance practices</li> <li>• Risk assessment of maintenance activity</li> <li>• Maintenance of main components</li> <li>• Blending process</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Operation) and on the unit</li> <li>• Handle Human Machine Interface (HMI) alarms and troubleshooting with the help of the Operation Manual (OM)</li> <li>• Do modulating valve maintenance</li> <li>• Do flow meter maintenance</li> <li>• Do density transmitter maintenance</li> <li>• Identify spare parts numbers for ordering with the help of the Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> </ul>	<ul style="list-style-type: none"> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> <li>• Access to processing equipment for hands-on training*: 4 hours</li> <li>• Access to target components for hands-on maintenance*: 10 hours</li> </ul>

## Tetra Pak® Milk Reception Unit

### CT-20265

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the maintenance activity of the milk reception unit. The objectives are to provide maintenance training containing knowledge and terminology for the unit and how to run it according to the Technical Manual (TeM). This training will also prepare the participants for training regarding process technology as well as other machines / equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic function of the unit</li> <li>• How to read and use manual(s) and documentation</li> <li>• Control panel</li> <li>• Hands-on activities</li> </ul>	<ul style="list-style-type: none"> <li>• Best maintenance practice</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions and safety aspects</li> <li>• Function of the unit and the main components</li> <li>• Maintenance of main components</li> <li>• Maintenance best practices</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Locate the main components on the unit</li> <li>• Handle Human Machine Interface (HMI) alarms and troubleshooting with the help of the Operation Manual (OM)</li> <li>• Prepare, perform and validate maintenance, of selected items</li> <li>• Understand basic Cleaning In Place (CIP) technology and Cleaning In Place (CIP) procedures</li> <li>• Identify spare parts numbers for ordering with the help of the Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> <li>• Access to processing equipment for hands-on training*: 5 hours</li> </ul>

## Tetra Pak® Multilane Wrapper

### CT-20243

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	1
 Prerequisites	<b>Access to processing equipment for hands-on training*: 2 to 3 hours</b>
 Max. Participant	6

### Description

This training is designed to give participants a technical and operational understanding of the multilane wrapper (model A2). The training includes both theoretical and practical knowledge of the Operation and the maintenance activities.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• How to read and use manual(s) and documentation</li> <li>• Best practise maintenance</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles</li> <li>• Technical construction of the main components</li> <li>• Operational control</li> <li>• Principle of maintenance</li> <li>• Automation and electrical introduction</li> <li>• Basic troubleshooting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and technically describe the main components</li> <li>• Understand input qualities and process parameters to ensure optimal production</li> <li>• Operate and adjust the equipment</li> <li>• Perform routine maintenance care</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

\*Time for taking out of production and preparing for production not included

## Tetra Pak® Plate Heat Exchanger

### CT-20186

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>Access to processing equipment for hands-on training*: 4 to 6 hours</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to train the participants to understand the working principle and how to carry out the maintenance of Tetra Pak® Plate Heat Exchanger units (formerly known as Tetra Plex™).

<b>Content</b>	<ul style="list-style-type: none"> <li>• The working principles of heat transfer and this unit</li> <li>• How to read and use manual(s) and documentation</li> <li>• General maintenance of this unit according to the instruction manual</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles of plate heat exchangers</li> <li>• Safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance) and on the unit</li> <li>• Perform preventive maintenance on this unit</li> <li>• Follow safety precautions</li> <li>• Understand the principles of heat transfer for this unit</li> <li>• Understand plate hanging list, different plates and positions</li> <li>• Dismantle and assemble plates</li> <li>• Remove and replace gaskets</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

\*Time for taking out of production and preparing for production not included

## Tetra Pak® Tubular Heat Exchanger

### CT-20188

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>2.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to train the participants to understand the working principle and how to carry out the maintenance of Tetra Pak® Tubular Heat Exchanger units (formerly known as Tetra Spiraflo™).

<b>Content</b>	<ul style="list-style-type: none"> <li>• The working principles of heat transfer and this unit</li> <li>• How to read and use manual(s) and documentation</li> <li>• General maintenance of this unit</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Working principles of plate heat exchangers</li> <li>• Safety precautions</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance) and on the unit</li> <li>• Perform preventive maintenance on this unit</li> <li>• Follow safety precautions</li> <li>• Understand the principles of heat transfer</li> <li>• Dismantle the unit, replace O-rings and product seals, reassemble the unit</li> <li>• Perform rinsing of program to check absence of leakages</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Separator

### CT-20187

-  Target Group     **Personnel performing maintenance of the unit**
-  Duration (Days)     **2**
-  Prerequisites     **Access to processing equipment for hands-on training\*: 12 hours**
-  Max. Participant     **6**

### Description

This training is designed to train the participants to understand the working principle and how to carry out the maintenance of Tetra Pak® Separator units (formerly known as Tetra Centri®).

<b>Content</b>	<ul style="list-style-type: none"> <li>• The working principles of separators and applications</li> <li>• How to read and use manual(s) and documentation</li> <li>• General maintenance of this unit according to the instruction manual</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The working principles of this equipment</li> <li>• The basics of centrifugal separation and applications</li> <li>• The importance of the safety aspects and warnings</li> <li>• Best practices for maintenance of this equipment</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance) and on the equipment</li> <li>• Perform preventive maintenance on this equipment                             <ul style="list-style-type: none"> <li>– disconnecting piping and draining of unit</li> </ul> </li> <li>• Follow safety precautions</li> <li>• Understand design and function</li> <li>• Introduced on how to carry out maintenance on centrifugal separator</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

\*Time for taking out of production and preparing for production not included

## Tetra Pak® Standardization Unit S2

### CT-20667

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give the participants theoretical and practical knowledge of the maintenance activity of the equipment. This is to also enable basic maintenance of main components in the system. This training will also prepare participants to handle troubleshooting, best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic function of the processing unit</li> <li>• How to read and use manual(s) and documentation</li> <li>• Control panel</li> <li>• Hands on activities on module</li> <li>• Maintenance activity on selected components</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Operation) and the unit</li> <li>• Handle Human Machine Interface (HMI), alarms and troubleshooting with help of Operation Manual (OM)</li> <li>• Do load cell maintenance</li> <li>• Do tank outlet valve maintenance</li> <li>• Do unique SSV (single seat valve) / change over valve maintenance</li> <li>• Do drive end maintenance</li> <li>• Do mechanical shaft seal maintenance</li> <li>• Do seat valve maintenance</li> <li>• Identify spare parts number for ordering with help of the Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Aseptic Drink

### CT-20189

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>5</b>
 Prerequisites	<b>Basic processing knowledge</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the maintenance activity of the equipment. This is to also enable basic maintenance of main components in the system. This training will also prepare participants to perform basic risk assessment, troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic functions of the processing equipment</li> <li>• How to read and use manual(s) and documentation</li> <li>• Control panel</li> <li>• Hands on activities</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Best practices</li> <li>• Risk assessment of maintenance activity</li> <li>• Maintenance of main components</li> <li>• Operational, food safety and critical control points</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance) and the unit</li> <li>• Handle Human Machine Interface (HMI) alarm and troubleshooting with help of Operation Manual (OM)</li> <li>• Perform maintenance of heat exchanger (plate or tubular)</li> <li>• Perform maintenance of other components (e.g. pumps and valves)</li> <li>• Identify spare parts number identification for ordering with help of Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Aseptic Flex

### CT-20191

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>Basic processing knowledge</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give participants theoretical and practical knowledge of the maintenance activity for this equipment. The training will also enable basic maintenance of the main components of this processing unit as well as prepare participants to perform basic risk assessment, troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic functions of the processing equipment</li> <li>• Control panel functions</li> <li>• How to read and use manual(s) and documentation</li> <li>• Daily and weekly care</li> <li>• Hands on activities</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Food safety critical control points</li> <li>• Maintenance of main components</li> <li>• Maintenance best practices and risk assessment</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance)</li> <li>• Handle Human Machine Interface (HMI) alarm and troubleshooting with help of Operation Manual (OM)</li> <li>• Perform maintenance of tubular heat exchanger</li> <li>• Identify spare parts number identification for ordering with help of Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Therm™ Lacta

### CT-20193

 Target Group	<b>Personnel performing maintenance of the unit</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>Basic processing knowledge</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the maintenance activity of the equipment. This is to also enable basic maintenance of main components in the system. This training will also prepare participants to perform basic risk assessment, troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic functions of the processing equipment</li> <li>• How to read and use manual(s) and documentation</li> <li>• Control panel</li> </ul>	<ul style="list-style-type: none"> <li>• Hands on activities</li> <li>• Safety precautions</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Perform their regular duties according to our manuals</li> <li>• Understand basic automation and ability to operate and maintain your automation system</li> <li>• Improved plant performance by better process control</li> <li>• Better technical and operational understanding</li> <li>• Minimized frequency and duration of production interruptions</li> </ul> <p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Best practices</li> <li>• Risk assessment of maintenance activity</li> <li>• Maintenance of main components</li> <li>• Operational, food safety and critical control points</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals (Technical and Maintenance) and the unit</li> <li>• Handle Human Machine Interface (HMI) alarm and troubleshooting with help of Operation Manual (OM)</li> <li>• Perform maintenance of heat exchanger (plate or tubular)</li> <li>• Perform maintenance of other components (e.g. pumps and valves)</li> <li>• Identify spare parts number identification for ordering with help of Technical Manual (TeM)</li> <li>• Maintain proper maintenance schedule as per our recommendation</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> </ul>	<ul style="list-style-type: none"> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Tetra Pak® Aseptic Filling Machines Basic

### CT-20216

-  Target Group     **Technicians**
-  Duration (Days)     **4**
-  Prerequisites     **Mechanical skills**
-  Max. Participant     **6**

### Description

This training block is designed for participants with limited pre-knowledge of Tetra Pak® Aseptic Filling Machine. This is a preparatory course and should be completed prior to the specific filling machine courses on the Tetra Pak® A3 or E3 platform.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Main Groups of the Equipment</li> <li>• Package Forming, Jaw and Drive System</li> <li>• Tetra Pak® Operator Panel (TPOP)</li> <li>• Safety Signs and Indicators</li> <li>• Hydrogen Peroxide - Risks and Safe Handling</li> <li>• Filling Machine and Packaging Material Sterilisation</li> <li>• Sealing Systems</li> <li>• Cleaning of the Filling System</li> <li>• External Cleaning</li> <li>• Machine Documentation</li> </ul>	<ul style="list-style-type: none"> <li>• Reference Designation</li> <li>• Pneumatic System</li> <li>• Hydraulic System</li> <li>• Steam System</li> <li>• Lubrication System</li> <li>• Cooling Water System</li> <li>• Power Supply</li> <li>• Programmable Logic Controller (PLC) Safety System</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Describe the basic functions of a filling machine producing aseptic packages</li> <li>• Interpret the safety regulations according to machine documentation</li> <li>• Describe safe handling of hydrogen peroxide</li> <li>• Describe the functions of sealing systems</li> <li>• Describe the function of the cleaning systems</li> <li>• Use the machine documentation systematically</li> </ul>	<ul style="list-style-type: none"> <li>• Explain the basics of reference designation</li> <li>• Describe the basic functions of supply systems</li> <li>• Recognize the basic principles of drive systems</li> <li>• Explain the product processing principles</li> <li>• Explain the different processes of packaging material sterilization</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® A3/CompactFlex

**0200-0300: CT-20440**

**0400: CT-20579**

-  **Target Group**      **Technicians**
-  **Duration (Days)**      **9**
-  **Prerequisites**      **Attended CT-20216 Tetra Pak® Aseptic Filling Machines Basic**
-  **Max. Participant**      **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® A3/CompactFlex filling machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS), package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® A3/CompactFlex Introduction</li> <li>• Tube Forming</li> <li>• Drive and Jaw System</li> <li>• Design Control System</li> <li>• Filling Control System</li> <li>• Final Folder Unit</li> <li>• Automatic Splicing Unit</li> <li>• Sterile System</li> <li>• Headspace by Injection</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand machine group's functions, individually and together</li> <li>• Handle machine as technician using applicable parts from Operation Manual (OM)</li> <li>• Perform package checks according to Operation Manual (OM)</li> <li>• Use machine documentation systematically</li> <li>• Be able to perform settings related to maintenance</li> <li>• Locate and replace defective mechanical components</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® A3/Flex filling machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System, package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® A3/Flex Introduction</li> <li>• Tube Forming</li> <li>• Sterile System Components</li> <li>• Sterile System</li> <li>• Drive and Jaw System</li> <li>• Design Control System</li> <li>• Final Folder</li> <li>• ASU</li> <li>• Sealing</li> <li>• Filling System</li> <li>• Headspace by Injection</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand machine group's functions, individually and together</li> <li>• Handle machine as technician using applicable parts from Operation Manual (OM)</li> <li>• Perform package checks according to Operation Manual (OM)</li> <li>• Use machine documentation systematically</li> <li>• Be able to perform settings related to maintenance</li> <li>• Locate and replace defective mechanical components</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® DIMC Flex-0200-0260 for A3

### CT-20645

-  Target Group     **Technicians**
-  Duration (Days)     **5**
-  Prerequisites     **Attended related filling machine course**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the DIMC Flex for Tetra Pak® A3 platform. During training the participants will be taught on how to set and replace components, perform maintenance and common settings stated in the Maintenance Manual (MM) that doesn't require specialist knowledge or special tools. It will also give the participants knowledge on how to evaluate the caps and how to perform necessary adjustments related to the cap evaluation.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Machine Operation</li> <li>• Package Checks (Screw Cap related)</li> <li>• Tetra Pak® Operator Panel (TPOP), Operational and Service Modes</li> <li>• Supply Systems</li> <li>• Injection System</li> <li>• Toolbox Exchange/Settings</li> <li>• Electrical Components</li> <li>• Positioning System</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Know how to operate the equipment</li> <li>• Be able to perform Screw Cap related package integrity checks and how to solve/adjust faults</li> <li>• Understand what the supply systems are used for and how to perform service work on them</li> <li>• Perform service work on the machine</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® DIMC Flex-0300-0500 for A3

### CT-20617

-  Target Group     **Technicians**
-  Duration (Days)     **5**
-  Prerequisites     **Attended related filling machine course**

## Tetra Pak® PullTab™ for A3

### CT-20646

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>5</b>
 Prerequisites	<b>Attended related filling machine course</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the PullTab™ machine. During training the participants will be taught on how to set and replace components, perform maintenance and common settings stated in the Maintenance Manual (MM) that doesn't require specialist knowledge or special tools. It will also give the participants knowledge on how to evaluate the caps and how to perform necessary adjustments related to the cap evaluation.

<b>Content</b>	<ul style="list-style-type: none"> <li>• PullTab™ Introduction</li> <li>• Function Diagrams</li> <li>• Positioning System for Packaging Material</li> <li>• Positioning System for Applicators</li> <li>• Applicator Control</li> </ul>	<ul style="list-style-type: none"> <li>• Mechanical Settings</li> <li>• Electrical Systems</li> <li>• Safety Circuits</li> <li>• Tetra Pak® Operator Panel (TPOP)</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Know how to operate the equipment in accordance to Operation Manual (OM)</li> <li>• Perform production checks in accordance to Operation Manual (OM)</li> <li>• Identify hazardous areas, emergency stops and door guards</li> <li>• Understand the PullTab™ machine application cycle</li> <li>• Understand the positioning system for packaging material and for the application</li> <li>• Perform maintenance and common settings stated in the Maintenance Manual (MM)</li> <li>• Set and replace components</li> <li>• Describe volume and/or hole size change</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® A3 Speed PP MiM

### CT-20666

-  Target Group     **Technicians**
-  Duration (Days)     **5**
-  Prerequisites     **Attended related filling machine course**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the MiM for Tetra Pak® A3/Speed filling machine producing portion packages. During training the participants will be taught on how to set and replace components, perform maintenance and common settings stated in the Maintenance Manual (MM) that doesn't require specialist knowledge or special tools. It will also give the participants knowledge on how to evaluate the caps and how to perform necessary adjustments related to the cap evaluation.

<b>Content</b>	<ul style="list-style-type: none"> <li>• DIMC introduction</li> <li>• Machine operations</li> <li>• Package checks</li> <li>• Injection System</li> <li>• Pneumatic System</li> <li>• Cooling System</li> </ul>	<ul style="list-style-type: none"> <li>• Granulate System</li> <li>• Toolbox settings</li> <li>• Positioning System</li> <li>• Package Dumping</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Know how to operate the equipment</li> <li>• Perform maintenance and common settings stated in the Maintenance Manual (MM) that doesn't require specialist knowledge or special tools</li> <li>• Set and replace components</li> <li>• Know how to evaluate caps and how to perform necessary adjustments related to cap evaluation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® TBA/8-1000-1200

### CT-20463

-  Target Group     **Technicians**
-  Duration (Days)     **9**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® TBA/8 filling machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System, package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® TBA/8 filling machine introduction</li> <li>• Supply Systems</li> <li>• Sterile Air System</li> <li>• Peroxide System</li> <li>• Forming of Material Web</li> <li>• Sealing</li> <li>• Filling System</li> </ul>	<ul style="list-style-type: none"> <li>• Drive and Jaw System</li> <li>• Design Control System</li> <li>• Final Folder</li> <li>• ASSU</li> <li>• ASU</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand equipment functions</li> <li>• Use machine documentation systematically</li> <li>• Follow safety regulations according to machine documentation</li> <li>• Perform maintenance</li> </ul>

## Tetra Pak® A1-1000 Tetra Classic® Aseptic/Tetra Fino® Aseptic/Tetra Wedge® Aseptic

### CT-20597

-  Target Group     **Technicians**
-  Duration (Days)     **9**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® A1-1000 filling machine. The training will cover all three package formats Tetra Classic® Aseptic, Tetra Fino® Aseptic and Tetra Wedge® Aseptic, with focus on your specific need. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS), package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® A1 1000 Introduction</li> <li>• Tetra Pak® Operator Panel (TPOP)</li> <li>• Package Information</li> <li>• Sealing System</li> <li>• Package Integrity</li> <li>• Supply System</li> <li>• Tube Forming</li> <li>• Jaw System</li> </ul>	<ul style="list-style-type: none"> <li>• Design Control System</li> <li>• Automatic Splicing Unit (ASU)</li> <li>• Sterile System Overview</li> <li>• Peroxide System</li> <li>• Box Cooling</li> <li>• Sterile System Sequence</li> <li>• Filling System</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand the function of the machine</li> <li>• To work according to safety regulations stated in the machine documentation</li> <li>• Be able to prepare, start, run, and stop the filling machine according to Operation Manual (OM)</li> <li>• Be able to perform package checks according to Operation Manual (OM) and Laboratory checks</li> <li>• Be able to perform settings according to MM in conjunction with Tetra Pak® Maintenance System (TPMS) service in order to reinstate the machine to production status</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® AI-0100 for Tetra Brik®

### CT-20733

-  Target Group     **Technicians**
-  Duration (Days)     **9**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® AI-0100 for Tetra Brik®. This course will cover setting, maintenance routines according to Tetra Pak® Maintenance System (TPMS), package integrity and replacement of defective components which does not require specialist knowledge of specific tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Course Introduction</li> <li>• AI TB Introduction</li> <li>• Tetra Pak® Operator Panel (TPOP) / Control Panel</li> <li>• Package Information</li> <li>• Automatic Splicing Unit (ASU)</li> <li>• Sterile System Overview</li> <li>• Sterile System Sequence (TB)</li> <li>• Peroxide System</li> <li>• Filling System</li> <li>• Tube Forming</li> </ul>	<ul style="list-style-type: none"> <li>• Sealing System</li> <li>• Electrical System</li> <li>• Drive and Jaw System</li> <li>• Design and Control System</li> <li>• Final Folder</li> <li>• Optional Equipment</li> <li>• Supply System</li> <li>• Package Integrity</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Identify machine sections and use terminology according to machine documentation</li> <li>• Prepare, start production and perform production checks according to Operation Manual (OM)</li> <li>• Explain control panel structure and navigation</li> <li>• Understand machine stops and consequences</li> <li>• Understand machine function in detail</li> </ul>	<ul style="list-style-type: none"> <li>• Create new recipe on the control panel</li> <li>• Describe package infeed settings</li> <li>• Perform mechanical settings</li> <li>• Basic understanding of the vision system</li> <li>• Basic understanding of the electrical system</li> <li>• Describe the pneumatic system</li> <li>• Describe the lubrication system</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Consumables for the filling machine including packaging material / strip / cap / hotmelt for min. 5,000 packages - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Proper PPE</li> <li>• Set of manuals available during the training</li> </ul>	

## Tetra Pak® A1-1100 Tetra Classic® Aseptic/Tetra Fino® Aseptic/Tetra Wedge® Aseptic

### CT-20656

-  Target Group     **Technicians**
-  Duration (Days)     **9**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® A1-1100 filling machine. The training will cover all three package formats Tetra Classic® Aseptic, Tetra Fino® Aseptic and Tetra Wedge® Aseptic, with focus on your specific need. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS), package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® A1 1100 Introduction</li> <li>• Tetra Pak® Operator Panel (TPOP)</li> <li>• Package Information</li> <li>• Sealing System</li> <li>• Package Integrity</li> <li>• Supply System</li> <li>• Tube Forming</li> <li>• Jaw System</li> </ul>	<ul style="list-style-type: none"> <li>• Design Control System</li> <li>• Automatic Splicing Unit (ASU)</li> <li>• Sterile System Overview</li> <li>• Peroxide System</li> <li>• Box Cooling</li> <li>• Sterile System Sequence</li> <li>• Filling System</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand the function of the machine</li> <li>• To work according to safety regulations stated in the machine documentation</li> <li>• Be able to prepare, start, run, and stop the filling machine according to Operation Manual (OM)</li> <li>• Be able to perform package checks according to Operation Manual (OM) and Laboratory checks</li> <li>• Be able to perform settings according to MM in conjunction with Tetra Pak® Maintenance System (TPMS) service in order to instate the machine to production status</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® A1 MiM

### CT-20651

-  Target Group     **Technicians**
-  Duration (Days)     **5**
-  Prerequisites     **Attended Maintenance training on Tetra Pak® A1 filling machine, development step 0900 or higher**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® A1 MiM for Tetra Fino® Aseptic filling machine. Tetra Fino® Aseptic 100 Ultra package with its innovative Micro Injection Moulding (MiM) opening is a packaging solution that will help our customers reach the ice cream freezers without a chilled infrastructure due to the advantage of ambient distribution. The course will cover maintenance settings.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® A1 for Tetra Fino® Aseptic MiM filling machine</li> <li>• IMU (Injection Moulding Unit) Introduction</li> <li>• Tab Forming Unit</li> <li>• Pneumatic System</li> <li>• Cooling System</li> <li>• Granulate Transport</li> <li>• Positioning System</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	The principal objective of the course is to give the knowledge of how to install, maintain and perform settings on the IMU (Injection Moulding Unit)
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® TT/3-1800-2000

### CT-20460

 Target Group     **Technicians**

 Duration (Days)     **9**

 Prerequisites     **Limited knowledge such as operator training on a Tetra Pak® TT/3 filling machine or equivalent is desired**

 Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® TT/3 filling machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System, package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® TT/3 filling machine Introduction</li> <li>• All connections to / from the machine</li> <li>• Pneumatic system</li> <li>• Cooling water system</li> <li>• Hydraulic system</li> <li>• Electrical system</li> <li>• Central lubrication system</li> <li>• Drive system</li> </ul>	<ul style="list-style-type: none"> <li>• ASU</li> <li>• Carton section</li> <li>• Lid forming</li> <li>• Package section</li> <li>• Filling / XH</li> <li>• Cleaning</li> <li>• Tetra Pak® Maintenance System (TPMS)</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand machine group's functions, individually and together</li> <li>• Handle machine as technician using applicable parts from Operation Manual (OM)</li> <li>• Perform package checks according to Operation Manual (OM)</li> <li>• Use machine documentation systematically</li> <li>• Be able to perform settings related to maintenance</li> <li>• Locate and replace defective mechanical components</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® TT/3 CAU for Tetra Top®

### CT-20636

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>3.5</b>
 Prerequisites	<b>Attended CT-20460 Maintenance training Tetra Pak® TT/3-1800-2000</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Cap Applicator Unit (CAU) for Tetra Top® machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS), replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction</li> <li>• Function of the Cap Applicator Unit (CAU)</li> <li>• Running the machine as operators</li> <li>• Supply systems</li> <li>• CSU</li> <li>• Cap Applicator Unit (CAU)</li> <li>• Magazine Home Position</li> <li>• Drive Unit change/set</li> </ul>	<ul style="list-style-type: none"> <li>• Cap Applicator Unit (CAU) Stripper settings</li> <li>• Capping Station/Capping Unit settings</li> <li>• Duct settings</li> <li>• Cap lift settings</li> <li>• Replace parts included in Tetra Pak® Maintenance System (TPMS) T-list</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand machine group's functions, individually and together</li> <li>• Handle machine as technician using applicable parts from Operation Manual (OM)</li> <li>• Perform package checks according to Operation Manual (OM)</li> <li>• Use machine documentation systematically</li> <li>• Be able to perform settings related to maintenance</li> <li>• Locate and replace defective mechanical components</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® TR/27 and TR/28 CAU for Tetra Rex®

### CT-20637

-  Target Group     **Technicians**
-  Duration (Days)     **4.5**
-  Prerequisites     **Attended Maintenance training CT-20470**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Cap Applicator Unit (CAU) for Tetra Pak® TR/27 and Tetra Pak® TR/28 filling machines. The course will cover settings, maintenance routines and replacement of defective components.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Rex® Introduction</li> <li>• Cap Applicator Unit (CAU) Introduction</li> <li>• Operations</li> <li>• Overview of Main Parts</li> <li>• Supply System</li> <li>• Feeding System</li> </ul>	<ul style="list-style-type: none"> <li>• Applicator System</li> <li>• Tetra Pak® Operator Panel (TPOP) Service Screens</li> <li>• Ultrasonic Welding</li> <li>• Cap position</li> <li>• Cap Applicator Unit (CAU) Fault Diagnosis</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Use machine documentation systematically</li> <li>• Understand the function of the Cap Applicator Unit (CAU)</li> <li>• Be able to setup the unit according to Maintenance Manual (MM)</li> <li>• Be able to perform settings according to Maintenance Manual (MM)</li> <li>• Assist on a service according to Tetra Pak® Maintenance System (TPMS)</li> <li>• Be able to solve standard faults that may occur during production</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• This training is highly recommended to be taken at our Technical Training Centre</li> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® TR/27 0200-0400 and TR/28 0200-0400

### CT-20470

-  Target Group     **Technicians**
-  Duration (Days)     **9**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the knowledge of Tetra Pak® TR/27 filling machine and Tetra Pak® TR/28 filling machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS), package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Rex® Introduction</li> <li>• Operations</li> <li>• Electrical Training</li> <li>• Safety System</li> <li>• Supply System</li> <li>• Drive System</li> <li>• Magazine</li> <li>• Bottom Forming</li> </ul>	<ul style="list-style-type: none"> <li>• Carton Transport</li> <li>• Closure Applicator</li> <li>• Filling</li> <li>• Carton Sterilisation</li> <li>• Top Forming</li> <li>• Cleaning In Place (CIP) and SIP</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand machine group's functions, individually and together</li> <li>• Handle machine as technician using applicable parts from Operation Manual (OM)</li> <li>• Perform package checks according to Operation Manual (OM)</li> <li>• Use machine documentation systematically</li> <li>• Be able to perform settings related to maintenance</li> <li>• Locate and replace defective mechanical components</li> </ul>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Understand the basic functions of a Tetra Rex® filling machine</li> <li>• Identify all connections to and from the machine</li> <li>• Understand the different supply systems; pneumatic, vacuum, cooling and lubrication</li> <li>• Prepare and operate the machine according to Operation Manual (OM)</li> <li>• Make basic settings for supply, magazine, bottom forming, transport, filling and top forming according to Maintenance Manual</li> <li>• Understand the cleaning systems CIP, SIP and disinfection</li> <li>• Understand the XH and sterilisation systems</li> <li>• Carry out upcoming problems during production</li> <li>• Locate electrical components</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> </ul>	<ul style="list-style-type: none"> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® TR/28 0500

### CT-20708

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>9</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® TR/28 filling machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System, package integrity and replacement of defective components which does not require specialist knowledge or special tools.

### CT-20450

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>9</b>
 Prerequisites	<b>Attended CT-20216 Tetra Pak® Aseptic Filling Machines Basic</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® E3/Speed filling machine for Family Packages. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS), package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® E3/Speed Introduction</li> <li>• Supply Systems</li> <li>• Tube Forming</li> <li>• Sealing Monitoring</li> <li>• Drive and Jaw System</li> <li>• Design Control System</li> <li>• Filling System</li> </ul>	<ul style="list-style-type: none"> <li>• Final Folder Unit</li> <li>• Automatic Splicing Unit</li> <li>• Sterile System Components</li> <li>• Sterile System</li> <li>• Cleaning System</li> <li>• Headspace by Injection</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand machine group's functions, individually and together</li> <li>• Handle machine as technician using applicable parts from Operation Manual (OM)</li> <li>• Perform package checks according to Operation Manual (OM)</li> <li>• Use machine documentation systematically</li> <li>• Be able to perform settings related to maintenance</li> <li>• Locate and replace defective mechanical components</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® eBeam™ Maintenance for Tetra Pak® E3/Speed

### CT-20642

 Target Group **Technicians**

 Duration (Days) **2.5**

 Prerequisites

- **Completed CT-20450 Maintenance training Tetra Pak® E3/Speed**
- **Completed CT-90103 eBeam™ Safety Training (if applicable and according to local legislation)**

 Max. Participant **6**

### Description

The purpose with this course is to learn how to install, maintain and make basic troubleshooting of the eBeam™ system.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to eBeam™</li> <li>• Refresh eBeam™ safety</li> <li>• Reception and delivery</li> <li>• eBeam™ lamp for installation</li> <li>• HV cable installation</li> </ul>	<ul style="list-style-type: none"> <li>• HVPS installation</li> <li>• Signal cable installation</li> <li>• Interlock cable connection</li> <li>• Safety cable connection</li> <li>• Checks</li> </ul>	<ul style="list-style-type: none"> <li>• Ozone test</li> <li>• Removal of eBeam™ lamp</li> <li>• Maintenance on eBeam™ system</li> </ul>	<ul style="list-style-type: none"> <li>• eBeam™ parameters on Tetra Pak® Operator Panel (TPOP)</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Understand the principles of the eBeam™ system</li> <li>• Perform reception and delivery checks of eBeam™ lamp</li> <li>• Prepare a new eBeam™ lamp installation</li> <li>• Perform eBeam™ lamp installation</li> <li>• Perform a high voltage cable installation on the eBeam™ lamp</li> <li>• Perform high voltage power supply installation/replacement</li> <li>• Perform a high voltage cable installation on the high voltage power supply</li> <li>• Perform signal cable connection</li> <li>• Perform interlock cable connection</li> </ul>			
<b>Required Facilities</b>	<p>We recommend that this training should be taken at a TTC to avoid issues with lamp damages. However, if the training is agreed to take place at Customer site following facilities should be arranged by customer.</p> <ul style="list-style-type: none"> <li>• Mandatory kit should be installed before training (MKC 3701511-0100)</li> <li>• POM 3295698-0100 (Personal Ozone Meter) available</li> <li>• Equipment not in the production phase, available and without defects</li> <li>• Consumables for the filling machine including packaging material / strip for min. 5,000 packages - must not be expired</li> </ul>			

## Tetra Pak® DIMC Speed-0100 for E3

### CT-20213

-  Target Group     **Technicians**
-  Duration (Days)     **5**
-  Prerequisites     **Attended related filling machine course**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the DIMC Speed for Tetra Pak® E3/Speed machines. During training the participants will be taught on how to set and replace components, perform maintenance and common settings stated in the Maintenance Manual (MM) that doesn't require specialist knowledge or special tools. It will also give the participants knowledge on how to evaluate the caps and how to perform necessary adjustments related to the cap evaluation.

<b>Content</b>	<ul style="list-style-type: none"> <li>• DIMC Introduction</li> <li>• Paper Web</li> <li>• Cap</li> <li>• Injection System</li> <li>• Pneumatic System</li> <li>• Cooling System</li> <li>• Granulate System</li> </ul>	<ul style="list-style-type: none"> <li>• Positioning System</li> <li>• Package Dumping</li> <li>• PE Particle Detection</li> <li>• DIMC Adaption</li> <li>• DIMC QC</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Know how to operate the equipment</li> <li>• Perform maintenance and common settings stated in the Maintenance Manual (MM) that doesn't require specialist knowledge or special tools</li> <li>• Set and replace components</li> <li>• Know how to evaluate caps and how to perform necessary adjustments related to cap evaluation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® E3/Speed Hyper-0200

### CT-20604

-  Target Group     **Technicians**
-  Duration (Days)     **9**
-  Prerequisites     **Attended CT-20216 Tetra Pak® Aseptic Filling Machines Basic**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® E3/Speed Hyper filling machine for Portion Packages. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS), package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® E3/Speed Hyper Introduction</li> <li>• Supply Systems</li> <li>• Tube Forming</li> <li>• Tube Control System</li> <li>• Drive and Jaw System</li> <li>• Design Control System</li> <li>• Filling System</li> </ul>	<ul style="list-style-type: none"> <li>• Final Folder Unit</li> <li>• Automatic Splicing Unit</li> <li>• Sterile System Components</li> <li>• Sterile System</li> <li>• Headspace by Injection</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand machine group's functions, individually and together</li> <li>• Handle machine as technician using applicable parts from Operation Manual (OM)</li> <li>• Perform package checks according to Operation Manual (OM)</li> <li>• Use machine documentation systematically</li> <li>• Be able to perform settings related to maintenance</li> <li>• Locate and replace defective mechanical components</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® E3/CompactFlex-0100

### CT-20560

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>9</b>
 Prerequisites	<b>Attended CT-20216 Tetra Pak® Aseptic Filling Machines Basic</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® E3/CompactFlex filling machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS), package integrity and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® E3/CompactFlex Introduction</li> <li>• Tube Forming</li> <li>• Drive and Jaw System</li> <li>• Design Control System</li> <li>• Filling Control System</li> <li>• Final Folder Unit</li> <li>• Automatic Splicing Unit</li> <li>• Sterile System</li> <li>• Headspace by Injection</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand machine group's functions, individually and together</li> <li>• Handle machine as technician using applicable parts from Operation Manual (OM)</li> <li>• Perform package checks according to Operation Manual (OM)</li> <li>• Use machine documentation systematically</li> <li>• Be able to perform settings related to maintenance</li> <li>• Locate and replace defective mechanical components</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Scissors, aerometer with thermometer, graduated plastic cylinder, peroxide nomogram, cleaning compound and proper PPE</li> <li>• Set of technical tools and templates</li> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® E3/Flex-0100

### CT-20574

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>9</b>
 Prerequisites	<b>Attended CT-20216 Tetra Pak® Aseptic Filling Machines Basic</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® E3/Flex filling machine. ## Tetra Pak® Line Controller 30-0200-0300

### CT-20472

-  Target Group     **Technicians**
-  Duration (Days)     **2**
-  Prerequisites     **Good mechanical and basic electrical skills**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Line Controller 30 equipment. The course will cover settings, description of the command and the capacity / flow policies. It will also cover how to setup a new line layout including production recipes and how to fine tune the line by using the panel.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® Line Controller 30 equipment Introduction</li> <li>• Line Configuration</li> <li>• Recipe Manager</li> <li>• Line Signal Exchange</li> <li>• Package Flow Control</li> <li>• Extra Conveyors Control</li> <li>• Exercises</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Describe the iLine concept</li> <li>• Describe the machine and line components</li> <li>• Create the layout in the panel</li> <li>• Create recipes and fine tune the recipes</li> <li>• Describe the command policy</li> <li>• Describe the capacity and flow policy</li> <li>• Describe conveyor control</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Line not in the production phase, available and without defects</li> <li>• Ability to run the complete line with water / product when needed</li> <li>• Consumables for the line including packaging material / strip / cap / hotmelt / film carton trays for min. 5,000 packages - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® Line Controller 30 Plus

**0100: CT-20474**

**0200-0300: CT-20475**

	Target Group	<b>Technicians</b>
	Duration (Days)	<b>2</b>
	Prerequisites	<b>Good mechanical and basic electrical skills</b>
	Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Line Controller 30 Plus equipment. The course will cover settings, description of the command and the capacity / flow policies. It will also cover how to setup a new line layout including production recipes and how to fine tune the line by using the panel.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® Line Controller 30 Plus equipment Introduction</li> <li>• Line Configuration</li> <li>• Recipe Manager</li> <li>• Line Signal Exchange</li> <li>• Package Flow Control</li> <li>• Extra Conveyors Control</li> <li>• Exercises</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Describe the iLine concept</li> <li>• Describe the machine and line components</li> <li>• Create the layout in the panel</li> <li>• Create recipes and fine tune the recipes</li> <li>• Describe the command policy</li> <li>• Describe the capacity and flow policy</li> <li>• Describe conveyor control</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Line not in the production phase, available and without defects</li> <li>• Ability to run the complete line with water / product when needed</li> <li>• Consumables for the line including packaging material / strip / cap / hotmelt / film carton trays for min. 5,000 packages - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Line Controller 40 equipment. The course will cover settings, description of the command and the capacity / flow policies. It will also cover how to setup a new line layout including production recipes and how to fine tune the line by using the panel.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® Line Controller 40 equipment Introduction</li> <li>• Line Configuration</li> <li>• Recipe Manager</li> <li>• Line Signal Exchange</li> <li>• Package Flow Control</li> <li>• Extra Conveyors Control</li> <li>• Exercises</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Describe the iLine concept</li> <li>• Describe the machine and line components</li> <li>• Create the layout in the panel</li> <li>• Create recipes and fine tune the recipes</li> <li>• Describe the command policy</li> <li>• Describe the capacity and flow policy</li> <li>• Describe conveyor control</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Line not in the production phase, available and without defects</li> <li>• Ability to run the complete line with water / product when needed</li> <li>• Consumables for the line including packaging material / strip / cap / hotmelt / film carton trays for min. 5,000 packages - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® Accumulator Helix 30

**0200-0600: CT-20479**

**0700: CT-20482**

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>1.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Accumulator Helix 30 equipment. The course will cover how to use machine documentation, understand how to operate the equipment according to Operation Manual (OM), understand the machine functions and perform mechanical settings.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® Accumulator Helix equipment Introduction</li> <li>• Machine Description</li> <li>• Tetra Pak® Operator Panel (TPOP) / Control Panel</li> <li>• Supply</li> <li>• Settings</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Operate the machine in accordance to Operation Manual (OM)</li> <li>• Identify machine sections and terminology according to machine documentation</li> <li>• Describe machine sections, function and flow</li> <li>• Understand control panel functionality</li> <li>• Remove and describe spider unit</li> <li>• Describe volume conversion</li> <li>• Check infeed and outfeed chain tensioner</li> <li>• Set guide rail (infeed and outfeed)</li> <li>• Set and check spider unit</li> <li>• Identify and describe electrical components inside cabinet</li> <li>• Run the machine in production</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Consumables for the filling machine including packaging material / strip for min. 5,000 packages - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Cardboard Packer 30 machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS) and replacement of defective components.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction</li> <li>• Safety Precautions</li> <li>• General Description</li> <li>• Start</li> <li>• Stop</li> <li>• Infeed Unit</li> <li>• Grouping Unit</li> <li>• Merge Unit</li> </ul>	<ul style="list-style-type: none"> <li>• Magazine Unit</li> <li>• Blank Picker</li> <li>• Box Folding Unit</li> <li>• Box Transport</li> <li>• Outfeed</li> <li>• Hot Melt Unit</li> <li>• Supply System</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand the Tetra Pak® Operator Panel (TPOP) functionality</li> <li>• Prepare the machine after weekly care and run production according to Operation Manual (OM)</li> <li>• Perform daily care and weekly care</li> <li>• Describe cardboard blanks</li> <li>• Understand the main features of the machine (machine specification), the functions of the Infeed / Feed Unit, the Magazine Unit, the Grouping Unit, Base Unit and the Wrap Around Unit</li> <li>• Identify the different main groups of the machine</li> </ul>	<ul style="list-style-type: none"> <li>• Describe the Electrical System</li> <li>• Handle Tetra Pak® Maintenance System (TPMS)</li> <li>• Check and set the Infeed Unit, the Magazine Unit, the Grouping Unit, the Feed Unit, the Base Unit, the Wrap Around Unit</li> <li>• Perform Packing Pattern Change</li> <li>• Understand the concept of Programmable Logic Controller (PLC) Input / Output Hardware, the Pluto Hardware, the machine installation and the function of the Nordson Unit</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the equipment including packaging material / strip / hot melt / trays min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® Cardboard Packer 32-0400

### CT-20486

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>3.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Cardboard Packer 32 machine. The course will cover how to use machine documentation, understand how to operate the equipment according to Operation Manual (OM), understand the machine functions and perform mechanical settings.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® Cardboard Packer 32 machine Introduction</li> <li>• Tetra Pak® Operator Panel (TPOP) / Control Panel</li> <li>• Supply Systems</li> <li>• Electrical System</li> <li>• Infeed</li> <li>• Pattern Forming</li> <li>• Magazine</li> </ul>	<ul style="list-style-type: none"> <li>• Tray Forming</li> <li>• Wrap Around (WA)</li> <li>• Hot Melt</li> <li>• Optional Material</li> <li>• Electrical Servo System (variant)</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Operate the machine in accordance to Operation Manual (OM)</li> <li>• Identify components</li> <li>• Explain the package sequence flow in the machine</li> <li>• Explain different control functions on the Tetra Pak® Operator Panel</li> <li>• Explain the function of the tray forming unit</li> <li>• Set tray forming unit</li> <li>• Explain the function of the magazine unit</li> <li>• Set the magazine unit</li> <li>• Explain the function of the Infeed unit</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Consumables for the filling machine including packaging material / strip / hot melt for min. 5,000 packages - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® Cardboard Packer 32-0500-0700

### CT-20487

-  Target Group     **Technicians**
-  Duration (Days)     **3.5**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Cardboard Packer 32 machine. The course will cover how to use machine documentation, understand how to operate the equipment according to Operation Manual (OM), understand the machine functions and perform mechanical settings.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® Cardboard Packer 32 machine Introduction</li> <li>• Tetra Pak® Operator Panel (TPOP) / Control Panel</li> <li>• Supply Systems</li> <li>• Electrical System</li> <li>• Infeed</li> <li>• Pattern Forming</li> </ul>	<ul style="list-style-type: none"> <li>• Magazine</li> <li>• Tray Forming</li> <li>• Wrap Around</li> <li>• Hot Melt</li> <li>• Optional Equipment</li> <li>• Learning Evaluation</li> </ul>

<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Consumables for the filling machine including packaging material / strip / hot melt for min. 5,000 packages - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Tetra Pak® Cardboard Packer 34-0100

### CT-20709

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>3.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Cardboard Packer 34-0100 machine. The course will cover how to use machine documentation, understand how to operate the equipment according to Operation Manual, understand the machine functions and perform mechanical settings.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® Cardboard Packer 34-0100 machine Introduction</li> <li>• Pattern Forming</li> <li>• Tray Forming</li> <li>• Magazine</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will be able to:</b></p> <ul style="list-style-type: none"> <li>• Operate the machine in accordance to Operation Manual</li> <li>• Identify machine sections and terminology according to machine documentation</li> <li>• Identify components</li> <li>• Explain the package sequence flow in the machine</li> <li>• Explain different control functions on the Tetra Pak® Operator Panel</li> <li>• Explain the function of the tray forming unit</li> <li>• Set tray forming unit</li> <li>• Explain the function of the magazine unit</li> <li>• Set the magazine unit</li> <li>• Explain the function of the Infeed unit</li> <li>• Set the Infeed unit</li> <li>• Explain the function of the pattern forming unit</li> <li>• Set pattern forming unit</li> <li>• Explain the function of the wraparound unit</li> <li>• Set the wraparound unit</li> <li>• Explain the hotmelt unit</li> <li>• Set the hotmelt unit / guns</li> <li>• Set the Servo drive systems</li> <li>• Describe supply system</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling machine including packaging material / strip / hot melt for min. 5,000 packages - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® Cardboard Packer 70-0800-1200

### CT-20510

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>3.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® Cardboard Packer 70 machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System (TPMS) and replacement of defective components.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction</li> <li>• Safety Precautions</li> <li>• General Description</li> <li>• Start</li> <li>• Stop</li> <li>• Infeed Unit</li> <li>• Grouping Unit</li> <li>• Merge Unit</li> </ul>	<ul style="list-style-type: none"> <li>• Magazine Unit</li> <li>• Blank Picker</li> <li>• Box Folding Unit</li> <li>• Box Transport</li> <li>• Outfeed</li> <li>• Hot Melt Unit</li> <li>• Supply System</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand the Tetra Pak® Operator Panel (TPOP) functionality</li> <li>• Prepare the machine after weekly care and run production according to Operation Manual (OM)</li> <li>• Perform daily care and weekly care</li> <li>• Describe cardboard blanks</li> <li>• Understand the main features of the machine (machine specification), the functions of the Infeed / Feed Unit, the Magazine Unit, the Grouping Unit, Base Unit and the Wrap Around Unit</li> <li>• Identify the different main groups of the machine</li> <li>• Describe the Electrical System</li> <li>• Handle Tetra Pak® Maintenance System (TPMS)</li> <li>• Check and set the Infeed Unit, the Magazine Unit, the Grouping Unit, the Feed Unit, the Base Unit, the Wrap Around Unit</li> <li>• Perform Packing Pattern Change</li> <li>• Understand the concept of Programmable Logic Controller (PLC) Input / Output Hardware, the Pluto Hardware, the machine installation and the function of the Nordson Unit</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the equipment including packaging material / strip / hot melt / trays min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>	

## Ax550i for Tetra Pak® by Domino

### CT-20599

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a fundamental course for technicians to be able to handle an Ax550i for Tetra Pak® by Domino ink jet printer. It includes both theory and practise, but primarily it has a practical approach. The course will prepare the student for maintaining and caring for the equipment in a safe and efficient way.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Ax550i introduction</li> <li>• Health and Safety</li> <li>• Ink Principles and Functions</li> <li>• Operation</li> <li>• Quickstep</li> <li>• Printing Performance</li> <li>• Fluid Supply</li> <li>• Care and Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Know what health and safety precautions to observe when performing daily tasks</li> <li>• Be able to operate the equipment, including creating labels</li> <li>• Be able to maintain and care for the equipment, including replacing articles of consumption and other parts</li> <li>• Know the principle and function of the ink system</li> <li>• Know the functions available to optimise printing performance</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment available and in production status, available and without defects</li> <li>• Ability to run the machine / product when needed</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Proper PPE (safety glasses and protective gloves)</li> <li>• Set of User Guide and Product Manual available during the training</li> </ul>

## Tetra Pak® R1

**0300-0400: CT-20699**

**0500: CT-20590**

 Target Group	<b>FM Technicians</b>
 Duration (Days)	<b>6</b>
 Prerequisites	<b>Recommended: Operations training Tetra Pak® R1 (Day 1)</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® R1 machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Machine operation, introduction to the machine function, components location</li> <li>• Review of and practice on supply systems</li> <li>• Function, setting and troubleshooting of:                             <ul style="list-style-type: none"> <li>– Service unit</li> <li>– Drive</li> <li>– Final folder unit</li> <li>– Filling system</li> <li>– TS sealing systems</li> </ul> </li> <li>• Basic troubleshooting</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Know machine options, machine stops and consequences, different steps on machine ladder, how a FM build up out of the different B-groups and use terminology according to machine documentation. Find the technical data.</li> <li>• Perform the control functions for operator technicians (To be implemented on all relevant Maintenance level courses)</li> <li>• Understand different components and function of supply systems, Induction Heating</li> <li>• Use TPIH 2500 menu structure</li> <li>• Understand basics about the Components and I/O addresses in control system and EM as well as understand the safety relays and be able to do a basic setting of the Final Folder Unit, the Drive, the Filling system, and the cleaning systems</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, without defects and available</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filler including pack mat - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## Tetra Pak® R2

**0500: CT-20591**

**0600: CT-20715**

 Target Group	<b>FM Technicians</b>
 Duration (Days)	<b>6</b>
 Prerequisites	<b>Recommended: Operations training Tetra Pak® R2 (Day 1)</b>
 Max. Participant	<b>6</b>

### Description

This training block is designed to give theoretical and practical knowledge of the Tetra Pak® R2 machine. The course will cover settings, maintenance routines according to Tetra Pak® Maintenance System and replacement of defective components which does not require specialist knowledge or special tools.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Machine operation, introduction to the machine function, components location</li> <li>• Function, setting and troubleshooting of:                             <ul style="list-style-type: none"> <li>– Service unit</li> <li>– Drive</li> <li>– Final folder unit</li> <li>– Filling system</li> <li>– TS sealing systems</li> </ul> </li> <li>• Review of and practice on supply systems</li> <li>• Basic troubleshooting</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Know machine options, machine stops and consequences, different steps on machine ladder, how a FM build up out of the different B-groups and use terminology according to machine documentation. Find the technical data.</li> <li>• Perform the control functions for operator technicians (To be implemented on all relevant Maintenance level courses)</li> <li>• Understand different components and function of supply systems, Induction Heating</li> <li>• Basic understanding of the TPIH3500 and the sealing system</li> <li>• Understand basics about the Components and I/O addresses in control system and EM as well as understand the safety relays.</li> <li>• Be able to do a basic setting of the Final Folder Unit, the Drive, the Filling system, and the cleaning systems.</li> <li>• Perform their regular duties according to our manuals</li> <li>• Understand basic automation and ability to operate and maintain your automation system</li> <li>• Improved plant performance by better process control</li> <li>• Better technical and operational understanding</li> <li>• Minimized frequency and duration of production interruptions</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, without defects and available</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filler including pack mat - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## CM/HHS 700/160 for Tetra Pak® by Meurer

### CT-20700

 Target Group	<b>Technicians</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

This is a Basic training to be able work as a Technician on a Meurer Highspeed Horizontal Shrink Wrapper / Film packaging machine. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating and technical trouble shooting on a Meurer Film packing Machine.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Safety</li> <li>• Functions and Processes</li> <li>• Start up</li> <li>• Operation</li> <li>• Preparation</li> <li>• Production</li> <li>• End of Production</li> <li>• Parameter Human Machine Interface (HMI) settings</li> <li>• Cleaning</li> <li>• Change over</li> <li>• Maintenance work</li> <li>• Perform daily / weekly / monthly care</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Be able to operate the machine through the production cycle - preparation to weekly care</li> <li>• Know all safety measures for the operation</li> <li>• Know how to do mechanical Recipe changes</li> <li>• Know how to eliminate simple operational Faults</li> <li>• Know adjust the machine mechanical and electronic settings</li> <li>• Knowing how to work with the machine documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Consumables including tray and packages</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

## CM/HTW 450 for Tetra Pak® by Meurer

### CT-20701

-  Target Group     **Technicians**
-  Duration (Days)     **2**
-  Prerequisites     **None**
-  Max. Participant     **6**

### Description

This is a Basic training to be able work as a Technician on a Meurer Highspeed Tray and Wraparound Casepacker. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating and technical trouble shooting on a Meurer Case packing Machine.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Safety</li> <li>• Functions and Processes</li> <li>• Start up</li> <li>• Operation</li> <li>• Preparation</li> <li>• Production</li> <li>• End of Production</li> <li>• Parameter Human Machine Interface (HMI) settings</li> <li>• Cleaning</li> <li>• Change over</li> <li>• Maintenance work</li> <li>• Perform daily / weekly / monthly care</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Be able to operate the machine through the production cycle - preparation to weekly care</li> <li>• Know all safety measures for the operation</li> <li>• Know how to do mechanical Recipe changes</li> <li>• Know how to eliminate simple operational Faults</li> <li>• Know adjust the machine mechanical and electronic settings</li> <li>• Knowing how to work with the machine documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the line with water / product when needed</li> <li>• Consumables including tray and packages</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of technical tools and templates</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> </ul>

# Automation

Automation training courses gives your staff the skills they need to understand the essentials of automation and how to operate and maintain the automation system. PLMS (Packaging Line Monitoring System) is the Tetra Pak® standard data management system for collecting, analysing and monitoring the operational performance of Tetra Pak® filling machines and packaging lines.

Tetra Pak® PlantMaster is the plant automation and information solution specifically designed for food production and based on extensive food production knowledge.

## Training outcomes:

- Understand how different components work in the system
- Perform program changes/transfers
- Analyse line performance and process data

Course Item	Course Name	Average Duration (Days)	Max. Participants	Page Number

## Tetra Pak® A3 Adapted Electrical

### CT-20657

 Target Group	<b>Technicians, Electricians</b>
 Duration (Days)	<b>4</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>Basic electrical knowledge</b></li> <li>• <b>Min. 6 months experience of equipment operations</b></li> </ul>
 Max. Participant	<b>6</b>

### Description

This course will provide participants with knowledge of electrical components and systems and what their purpose is. It is focusing on our previous generation of automation platform for our packaging lines as an example Tetra Pak® A3/Flex machine. It covers areas such as DeviceNet network, PLUTO safety system, PowerFlex 4/40, and motion system Kinetix 6000.

Combination of theoretical and practical exercises focusing on function, fault finding, and component replacement of systems covered in this course.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Electrical manual</li> <li>• Reference Designation</li> <li>• Power and Control Circuits</li> <li>• Networks</li> <li>• Control System</li> <li>• Safety System PLUTO</li> <li>• Frequency Converters</li> <li>• Motion System</li> <li>• Human Machine Interface (HMI) Hardware</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• To know how the electrical system is built up</li> <li>• Be able to identify and replace defective components, without having to connect a PC to the equipment</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Pak® iLine Equipment

### CT-20576

 Target Group	<b>Technicians, Electricians</b>
 Duration (Days)	<b>4</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>Basic electrical knowledge</b></li> <li>• <b>Min. 6 months experience of equipment operations</b></li> </ul>
 Max. Participant	<b>6</b>

### Description

This course will provide participants with knowledge of electrical components and systems and what their purpose is. It is focusing on the latest developed automation platform for our packaging lines as an example Tetra Pak® A3/Flex machine. It covers areas such as ethernet network, Rockwell integrated safety system and motion system Kinetix 5500.

Combination of theoretical and practical exercises focusing on function, fault finding, and component replacement of systems covered in this course.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Reference Designation</li> <li>• User Manuals</li> <li>• Electrical System</li> <li>• Control System</li> <li>• Ethernet Network</li> <li>• Safety System</li> <li>• Frequency Converter</li> <li>• Motion System</li> <li>• Human Machine Interface (HMI) Hardware</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• To know how the electrical system is built up</li> <li>• Be able to identify and replace defective components, without having to connect a PC to the equipment</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Multimeter and hand tools</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Consumables for the filling equipment including packaging material / strip min. 5,000 - must not be expired</li> <li>• Means for disposal of packages</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Pak® TT/3 1800-2000 machine

### CT-20633

 Target Group **Technicians, Electricians**

 Duration (Days) **4**

 Prerequisites

- **Any Tetra Pak® TT/3 Maintenance course**
- **Equipment's operation knowledge**
- **Basic electrical knowledge**
- **Min. 6 months experience of equipment operations**

 Max. Participant **6**

### Description

This course will provide participants with knowledge of electrical components and systems and what their purpose is.

Combination of theoretical and practical exercises focusing on function, fault finding, and component replacement of systems covered in this course.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction               <ul style="list-style-type: none"> <li>– Safety precautions</li> <li>– Safe working practices</li> <li>– Equipment locking system</li> <li>– Verify that the equipment is safe</li> </ul> </li> <li>• Machine Description               <ul style="list-style-type: none"> <li>– Identification of electrical components and association with related modules</li> </ul> </li> <li>• Using the EM Manual               <ul style="list-style-type: none"> <li>– Understand the EM structure in detail and its applicability</li> </ul> </li> <li>• Control and Power circuits               <ul style="list-style-type: none"> <li>– Understand the structure of power, control and protection circuits of the equipment</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Safety System               <ul style="list-style-type: none"> <li>– Understand hardware and functionality of the safety system (PLUTO safety Programmable Logic Controller (PLC), door sensors and emergency stops)</li> </ul> </li> <li>• Control system               <ul style="list-style-type: none"> <li>– Understand hardware (Cards, CPU, Ethernet, Local/Remote I/O)</li> </ul> </li> <li>• Motion system               <ul style="list-style-type: none"> <li>– Understand hardware (SERCOS, servo drives, servo motors)</li> </ul> </li> <li>• Practical exercises with a focus on replacing components and troubleshooting are activities for all systems studied during training</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Machine Description</li> <li>• Use of EM Manual</li> <li>• Control and power circuits</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Tetra Top® filling machine (dev steps 1800-2000) not in the production phase, without defects and available for a minimum of 50% of the time</li> <li>• Ability to run at least one side the machine with water / product when needed</li> <li>• Consumables for the filler including pack mat /strip. approx. 2,000 packages</li> <li>• Means for disposal of packages</li> </ul>	<ul style="list-style-type: none"> <li>• Classroom with white board/flip chart and projector</li> <li>• Hand tools</li> <li>• Updated Electrical Manual, Maintenance Manual (MM), Spare parts Catalogue</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Rex® TR/27 and TR/28

### CT-20725

 Target Group	<b>Technicians, Electricians</b>
 Duration (Days)	<b>4</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>Equipment's operation knowledge</b></li> <li>• <b>Basic electrical knowledge</b></li> <li>• <b>Min. 6 months experience of equipment operations</b></li> </ul>
 Max. Participant	<b>6</b>

### Description

This course will provide participants with knowledge of electrical components and systems and what their purpose is. The course is a combination of theoretical and practical exercises focusing on function, fault finding, and component replacement of systems covered in this course.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Electrical Safety</li> <li>• Reference Designation</li> <li>• Electrical Manual (EM)</li> <li>• Power and Control circuits</li> <li>• Control System</li> <li>• Recipes</li> <li>• DeviceNet field bus</li> <li>• Motion Control</li> <li>• Servo drives</li> <li>• Frequency Converters</li> <li>• Tetra Pak® Operator Panel (TPOP)</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Use of EM Manual</li> <li>• Control and power circuits</li> <li>• Safety system</li> <li>• Control System</li> <li>• Drive Systems</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment in Idle phase, available and without defects</li> <li>• Classroom with white board/flip chart and projector</li> <li>• Hand tools</li> <li>• Updated Electrical Manual, Maintenance Manual (MM), Spare parts Catalogue</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Rockwell Studio 5000 Basic

### CT-20639

 Target Group **Technicians, Electricians**

 Duration (Days) **4.5**

 Prerequisites

- **Basic electrical knowledge**
- **Any Maintenance training on a Filling Machine**
- **Min. 6 months experience of equipment operations**

 Max. Participant **6**

### Description

This training block is only delivered at Tetra Pak's Training Centers. Designed to give a basic theoretical and practical knowledge on Rockwell Programmable Logic Controller (PLC). This covers how various components in the control system are constructed and work in combination, program changes and transfers and identification of different components.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Fundamentals of Studio 5000 Logix Designer, RSLinx, RSNetwork for DeviceNet, Logix Designer Compare</li> <li>• System hardware components and their function</li> <li>• Communicating with a Controller</li> <li>• Organizing data</li> <li>• Entering, Editing and Verifying Ladder Logic</li> <li>• Communicate with remote modules through Ethernet and DeviceNet</li> <li>• Practical exercises with simulator</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• To obtain a basic understanding of how the various components in the control system are constructed and work in combination</li> <li>• To be able to perform program changes</li> <li>• To be able to locate faults and replace defective components</li> <li>• To be able to perform program transfers</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Only to be delivered in selected Tetra Pak's Training Centers with its respective Simulators</li> <li>• Please check course availability in the Training Centers' calendar</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Pak® PLMS Data Analysis

### CT-20631

 Target Group	<b>Supervisors, Managers, Leads</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>Ability to work in the Microsoft Office environment</b></li> <li>• <b>Ability to understand the concept in general of Key Performance Indicators</b></li> </ul>
 Max. Participant	<b>10</b>

### Description

Course to introduce how to use PLMS (Packaging Line Monitoring System) information to enable better analysis of line performance and process data in order to support plans to improve line performance and faster troubleshooting.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction and history of PLMS (Packaging Line Monitoring System)</li> <li>• Modular concept of PLMS</li> <li>• PLMS module Tools</li> <li>• Understanding of KPIs (Key Performance Indicators) concept and analysis</li> <li>• Analysis of real line performance data</li> <li>• Importance of correct operator input</li> <li>• Database management and task modules</li> <li>• Basic troubleshooting of PLMS data</li> <li>• Practical exercises</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Analytic approach on main stops causes, providing professional input to reduce frequency and causes of line stops; with the objective to achieve production events professionally mapped</li> <li>• Plan when to make intervention</li> <li>• Verify impacts of actions taken</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• A PC with PLMS Centre 330 installed as a workstation with local database (1 computer every 2 participants, maximum), or PLMS Web access</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Pak® PLMS Data Input

### CT-20632

 Target Group **Operators (filling machine and distribution equipment), Production Staff, Leaders**

 Duration (Days) **1**

 Prerequisites

- **Equipment's operation knowledge**
- **Min. 6 months experience of equipment operations**

 Max. Participant **6**

### Description

This course will enable basic understanding of PLMS (Packaging Line Monitoring System) concepts and the operator will be able to make appropriate data input as well as collect data.

### Content

- Introduction and history of PLMS (Packaging Line Monitoring System)
- Overview of time and PLMS phases
- Understand the most relevant KPI's and what influences these
- Tetra Pak® Operator Panel (TPOP)
- Location and navigation on screens and buttons that approach the PLMS
- Understanding the PLMS Interaction with each program step
- How to choose and insert the most appropriate event for each situation/event - Stop reason corrections
- Understand how the alarms and collection of packages can affect the data on the PLMS
- The impact of not reporting/recording the correct reason for manual stop/s in a timely manner, so avoid missing operator input
- PLMS offline Analysis: Understand and collect data in order to make correct reading of the desired record
- Learning Evaluation

### Principal Objectives

- Enable continuous improvement of line performance
- Data input properly performed for an effective data analysis
- Reliable line stops identification and classification, resulting in higher control of production events
- Awareness of impacts of data input in performance analysis

### Required Facilities

- Equipment not in the production phase, without defects and available for a minimum of 0.5 day
- Ability to access PLMS data
- Classroom with whiteboard / flip chart and projector
- Let us know if any limitations or special requirements are in place for bringing electrical equipment on site
- Let us know your local power socket type, voltage and frequency so we can check suitability

## Introduction to Automation

### CT-20194

 Target Group	<b>Plant operator personnel or anyone who needs to understand the basics of automation theory</b>
 Duration (Days)	<b>0.5</b>
 Prerequisites	<b>This course will cover basic knowledge No previous knowledge required</b>
 Max. Participant	<b>8</b>

### Description

This training is designed to give the participants an introduction to the concept of plant automation. The purpose is to provide non-automation experienced plant personnel an insight into what automation is and why it is important in a competitive and developing industry. This training will prepare the participants for other training courses, including Tetra Pak® PlantMaster for operators.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Concepts of Automation: Automation Concept, Automation System Hierarchy Model</li> <li>• Basic Automation Components: I/O Elements, Bus Systems, Programmable Logic Controller (PLC), Communication, Human Machine Interface (HMI)/Supervisory Control and Data Acquisition (SCADA), Data Acquisition</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• To understand why automation is necessary and the drawbacks of a manual system</li> <li>• To understand the function of the various components that make up an automated plant</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Alsafe™ (Electrical)

### CT-20179

 Target Group	<b>Electricians performing maintenance of the unit</b>
 Duration (Days)	<b>0.5</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>Basic electrical knowledge</b></li> <li>• <b>Min. 6 months experience of equipment operations</b></li> </ul>
 Max. Participant	<b>8</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the electrical system of the equipment. This is to enable settings and replacements of defect components in the system. This training will also prepare the participants to perform troubleshooting and fault localization on the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Electrical equipment</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Circuit diagram</li> <li>• Programmable Logic Controller (PLC)</li> <li>• Frequency converter</li> <li>• Human Machine Interface (HMI)</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The importance of electrical safety precaution</li> <li>• The main electrical components</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals and on the unit</li> <li>• Replace Programmable Logic Controller (PLC) modules, inclusive download of program from Programme Storage Device (PSD)</li> <li>• Replace the frequency converters</li> <li>• Force valves from Human Machine Interface (HMI) when fault finding</li> <li>• Use and understand manual(s) and documentation</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Hand tools</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Therm™ Aseptic Flex (Electrical)

### CT-20192

 Target Group	<b>Technicians, Electricians</b>
 Duration (Days)	<b>0.5</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>Basic electrical knowledge</b></li> <li>• <b>Min. 6 months experience of equipment operations</b></li> </ul>
 Max. Participant	<b>8</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the electrical system of the equipment. This is to enable settings and replacements of defect components in the system. This training will also prepare the participants for how to perform basic risk assessment, troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Electrical equipment</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Circuit diagram</li> <li>• Programmable Logic Controller (PLC)</li> </ul>	<ul style="list-style-type: none"> <li>• Frequency converter</li> <li>• Human Machine Interface (HMI)</li> <li>• Calibration of Cleaning In Place (CIP) header batch</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The importance of electrical safety precaution</li> <li>• The main electrical components</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals and on the unit</li> <li>• Replace Programmable Logic Controller (PLC) modules, inclusive download of program from Programme Storage Device (PSD)</li> <li>• Replace the frequency converters</li> <li>• Calibrate the Cleaning In Place (CIP) header batch</li> <li>• Force valves from Human Machine Interface (HMI) when fault finding</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Hand tools</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>	

## Tetra Therm™ Aseptic Drink (Electrical)

### CT-20190

 Target Group	<b>Electricians performing maintenance of the unit</b>
 Duration (Days)	<b>0.5</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>Basic electrical knowledge</b></li> <li>• <b>Min. 6 months experience of equipment operations</b></li> </ul>
 Max. Participant	<b>8</b>

### Description

This training is designed to give the participants theoretical and practical knowledge of the electrical system of the equipment. This is to enable settings and replacements of defect components in the system. This training will also prepare the participants for how to perform basic risk assessment, troubleshooting and best maintenance practices.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Electrical equipment</li> <li>• How to read and use manual(s) and documentation</li> <li>• Safety precautions</li> <li>• Circuit diagram</li> <li>• Programmable Logic Controller (PLC)</li> </ul>	<ul style="list-style-type: none"> <li>• Frequency converter</li> <li>• Human Machine Interface (HMI)</li> <li>• Calibration of Cleaning In Place (CIP) header batch</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The importance of electrical safety precaution</li> <li>• The main electrical components</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify all components in the manuals and on the unit</li> <li>• Replace Programmable Logic Controller (PLC) modules, inclusive download of program from Programme Storage Device (PSD)</li> <li>• Replace the frequency converters</li> <li>• Calibrate the Cleaning In Place (CIP) header batch</li> <li>• Force valves from Human Machine Interface (HMI) when fault finding</li> <li>• Use and understand manual(s) and documentation</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Hand tools</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>	

## Tetra Pak® PlantMaster 6.4 for Maintenance Engineers: Rockwell Automation

### CT-20246

 Target Group	<b>Personnel performing maintenance of the automation system</b>
 Duration (Days)	<b>4</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>CT-20194 Introduction to Automation</b></li> <li>• <b>Basic process and PC knowledge in plant P&amp;ID (Piping and Instrumentation Diagram)</b></li> <li>• <b>Understanding of the process functional diagram</b></li> <li>• <b>Knowledge of your PLC and SCADA editor software, Microsoft Office applications and Microsoft SQL server</b></li> </ul>
 Max. Participant	<b>8</b>

### Description

This training is designed to give the participants in depth technical and operational understanding of the Tetra Pak® PlantMaster automation system (Rockwell platform). Focusing on maintenance and diagnosis of the system, including hands on technical exercises for common automation tasks for Programmable Logic Controller (PLC), Graphic User Interface (GUI) and supporting applications including production integrator and recipe manager.

<b>Content</b>	<ul style="list-style-type: none"> <li>• S88 and common structure</li> <li>• Modelling terminology</li> <li>• Programmable Logic Controller (PLC) and Graphic User Interface (GUI) structure</li> <li>• Control system maintenance</li> <li>• Architecture details and fault finding</li> </ul>	<ul style="list-style-type: none"> <li>• Programmable Logic Controller (PLC) and Graphic User Interface (GUI) modifications hands on</li> <li>• Production integrator hands on</li> <li>• Simulation activities</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Automation system architecture including S88 methodology</li> <li>• Common structure and plant modelling and terminology</li> <li>• Programmable Logic Controller (PLC) and Graphic User Interface (GUI) structure, with signal flow from field object to Supervisory Control and Data Acquisition (SCADA)</li> <li>• Bus, Queue and Cleaning In Place (CIP) concept</li> <li>• How to effectively maintain and diagnose an automation system</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Backup and restore an automation system (Programmable Logic Controller (PLC), Graphic User Interface (GUI) &amp; database)</li> <li>• Add a control module, interlock and running fault</li> <li>• Successfully maintain the automation system</li> <li>• Carry out administrative tasks in production integrator</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Meeting room with desks, large enough to split into smaller groups during training</li> <li>• HD Projector/Monitor</li> <li>• Whiteboard and whiteboard pens</li> </ul>	<ul style="list-style-type: none"> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Pak® PlantMaster for Maintenance Engineers: Siemens

### 6.4: CT-20195

### 6.6: CT-20697

 Target Group	<b>Personnel performing maintenance of the automation system</b>
 Duration (Days)	4
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>Basic process and PC knowledge in plant P&amp;ID (Piping &amp; Instrumentation Diagram)</b></li> <li>• <b>Understanding of the process functional diagram and automation architecture</b></li> <li>• <b>Knowledge of your PLC and SCADA editor software, Microsoft Office applications and Microsoft SQL server</b></li> </ul>
 Max. Participant	8

### Description

This training is designed to give the participants in depth technical and operational understanding of the Tetra Pak® PlantMaster automation system (Siemens platform). Focusing on maintenance and diagnosis of the system, including hands on technical exercises for common automation tasks for Programmable Logic Controller (PLC), Graphic User Interface (GUI) and supporting applications including production integrator and recipe manager.

<b>Content</b>	<ul style="list-style-type: none"> <li>• S88 and common structure</li> <li>• Modelling terminology</li> <li>• Programmable Logic Controller (PLC) and Graphic User Interface (GUI) structure</li> <li>• Control system maintenance</li> <li>• Architecture details and fault finding</li> </ul>	<ul style="list-style-type: none"> <li>• Programmable Logic Controller (PLC) and Graphic User Interface (GUI) modifications hands on</li> <li>• Production integrator hands on</li> <li>• Simulation activities</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Automation system architecture including S88 methodology</li> <li>• Common structure and plant modelling and terminology</li> <li>• Programmable Logic Controller (PLC) and Graphic User Interface (GUI) structure, with signal flow from field object to Supervisory Control and Data Acquisition (SCADA)</li> <li>• Bus, Queue and Cleaning In Place (CIP) concept</li> <li>• How to effectively maintain and diagnose an automation system</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Backup and restore an automation system (Programmable Logic Controller (PLC), Graphic User Interface (GUI) &amp; database)</li> <li>• Add a control module, interlock and running fault</li> <li>• Successfully maintain the automation system</li> <li>• Carry out administrative tasks in production integrator</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Meeting room with desks, large enough to split into smaller groups during training</li> <li>• HD Projector/Monitor</li> <li>• Whiteboard and whiteboard pens</li> </ul>	<ul style="list-style-type: none"> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Pak® PlantMaster 6.4 for Operators: Rockwell Automation

### CT-20247

 Target Group	<b>Plant operator personnel</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>CT-20194 Introduction to Automation</b></li> <li>• <b>Basic process and PC knowledge in plant P&amp;ID (Piping and Instrumentation Diagram)</b></li> <li>• <b>Understanding of the process functional diagram</b></li> </ul>
 Max. Participant	<b>8</b>

### Description

This training is designed to give the participants technical and operational understanding of the Tetra Pak® PlantMaster automation system (Rockwell Automation platform), focusing on the expert usage of the graphic user interface and supporting applications including production integrator and recipe manager.

<b>Content</b>	<ul style="list-style-type: none"> <li>• S88 and common structure</li> <li>• Human Machine Interface (HMI) structure and security</li> <li>• Plant control</li> <li>• Interlocks and running faults</li> <li>• Control modules</li> <li>• Cleaning In Place (CIP)</li> <li>• Alarm handling</li> <li>• Production integrator</li> <li>• Production execution</li> <li>• Simulation activities</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Graphic user interface</li> <li>• Production support windows</li> <li>• Production execution</li> <li>• Production reporting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Expertly navigate the graphic user interface of the automation system</li> <li>• Demonstrate safe and correct usage of production and cleaning procedures</li> <li>• Demonstrate control module features including manual mode and alarm suppression</li> <li>• Utilize support windows to identify and evaluate reasons for active and historical production disturbances</li> <li>• Create and start a new recipe batch, including parameter download functionality</li> <li>• Visualize and understand logged data</li> <li>• Generate production reports including production tracking, Cleaning In Place (CIP) and KPI (Key Performance Indicator) analysis</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Meeting room with desks, large enough to split into smaller groups during training</li> <li>• HD Projector/Monitor</li> <li>• Whiteboard and whiteboard pens</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>

## Tetra Pak® PlantMaster for Operators: Siemens

### 6.4: CT-20196

### 6.6: CT-20696

 Target Group	<b>Plant operator personnel</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>CT-20194 Introduction to Automation</b></li> <li>• <b>Basic process and PC knowledge in plant P&amp;ID (Piping and Instrumentation Diagram)</b></li> <li>• <b>Understanding of the process functional diagram</b></li> </ul>
 Max. Participant	<b>8</b>

<b>Content</b>	<ul style="list-style-type: none"> <li>• S88 and common structure</li> <li>• Human Machine Interface (HMI) structure and security</li> <li>• Plant control</li> <li>• Interlocks and running faults</li> </ul>	<ul style="list-style-type: none"> <li>• Control modules</li> <li>• Cleaning In Place (CIP)</li> <li>• Alarm handling</li> <li>• Production integrator</li> <li>• Production execution</li> </ul>	<ul style="list-style-type: none"> <li>• Simulation activities</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Graphic user interface</li> <li>• Production support windows</li> <li>• Production execution</li> <li>• Production reporting</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Expertly navigate the graphic user interface of the automation system</li> <li>• Demonstrate safe and correct usage of production and cleaning procedures</li> <li>• Demonstrate control module features including manual mode and alarm suppression</li> <li>• Utilize support windows to identify and evaluate reasons for active and historical production disturbances</li> <li>• Create and start a new recipe batch, including parameter download functionality</li> <li>• Visualize and understand logged data</li> <li>• Generate production reports including production tracking, Cleaning In Place (CIP) and KPI (Key Performance Indicator) analysis</li> </ul>		
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Meeting room with desks, large enough to split into smaller groups during training</li> <li>• HD Projector/Monitor</li> <li>• Whiteboard and whiteboard pens</li> <li>• Let us know if any limitations or special requirements are in place for bringing electrical equipment on site</li> <li>• Let us know your local power socket type, voltage and frequency so we can check suitability</li> </ul>		

# Food Technology

Food technology training gives your staff the applied product technology knowledge they need to better understand what happens to products when they are being processed in our equipment. By understanding products at the different processing steps your staff will improve both performance and quality in production.

## Training outcomes:

- Increased workforce competence
- Increased basic knowledge in food technology to optimise performance
- Improved product knowledge which leads to securing food safety and quality

Course Item	Course Name	Average Duration (Days)	Max. Participants	Page Number
CT-20197	Food Technology Training Beverage Processing	1	12	292
CT-20199	Food Technology Training Dairy Processing	1	12	293
CT-20198	Food Technology Training Cheese Processing	2	12	294
CT-20244	Food Technology Training Cleaning In Place	0.5	12	295
CT-20258	Food Technology Training Desserts, Soups and Cooking Sauces Processing	0.5	12	296
CT-20200	Food Technology Training Ice Cream Processing	2	12	297
CT-20705	Food Technology Training Ice Cream – Products	1	12	298
CT-20245	Food Technology Training Membrane Filtration	0.5	12	299
CT-20251	Food Technology Training Soy Processing	0.5	12	300

## Beverage Processing

### CT-20197

 Target Group	<b>Operators, maintenance personnel and other production personnel in the beverage industry</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>12</b>

### Description

This training is designed to give participants an introduction to beverage technology. It will cover the basic principles of beverage technology including the different steps in processing. The course should be combined with and is a good compliment to Tetra Pak® Training Services equipment training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Beverage characteristics</li> <li>• Beverage ingredients, water, sugar, concentrates, additives and powder dissolving</li> <li>• Blending, heat treatment, deaeration, homogenization and dosing</li> <li>• Practical exercises related to these topics</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The basic principles of beverage technology</li> <li>• The importance of the Brix and other quality parameters</li> <li>• The purpose of the different steps in the process and how the product reacts</li> <li>• The main components of the pasteurization unit</li> <li>• Deaeration and air influence on product quality</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Increase knowledge in Particles, rheology, powder mixing, blending and heat treatment</li> <li>• Understand the principles of Obtaining a microbiologically safe product</li> <li>• Identify where losses are generated and how losses can be minimised and important quality parameters</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Dairy Processing

### CT-20199

 Target Group	<b>Operators, maintenance personnel and other production personnel in the dairy industry</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>12</b>

### Description

This is a fundamental training to be able to operate a Dairy basic processing equipment. It includes a mix of theoretical and practical lessons, but primarily it has a very practical approach. It will prepare the student for operating the equipment safely, efficiently, and without jeopardizing food safety.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Beverage characteristics</li> <li>• Beverage ingredients, water, sugar, concentrates, additives and powder dissolving</li> <li>• Blending, heat treatment, deaeration, homogenization and dosing</li> <li>• Practical exercises related to these topics</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The importance of food safety</li> <li>• Raw milk quality</li> <li>• Science of milk</li> <li>• Basic milk processing</li> <li>• Cleaning and hygiene in milk processing</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Cheese Processing

### CT-20198

 Target Group	<b>Operators and production managers</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>12</b>

### Description

This training is designed to give participants an introduction to cheese processing and technology. It will cover the basic principles of cheese making technology including the different steps in processing. The course should be combined with and is a good complement to Tetra Pak® Training Services equipment training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Cheese types</li> <li>• Cheese processing and technology (overview of equipment and lines per cheese category and whey collection and treatment)</li> <li>• Whey and permeate products</li> <li>• Effect of processing conditions and ingredients (incl. milk) on cheese properties and key performance requirements</li> <li>• Cleaning and sanitizing</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Cheese classification</li> <li>• Main processing steps for cheese-making (milk reception and treatment for cheese making, curd making, curd handling and curd block forming, dry salting and brining, storage, ripening and packaging)</li> <li>• The technology of milk pre-treatment, curd making, block forming and curd handling</li> <li>• Properties of cheese types</li> <li>• Effect of processing conditions on cheese properties</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Explain typical names and terms in relation to cheese technology and processes</li> <li>• Explain the most relevant process for turning liquid milk into cheese and whey products</li> <li>• Understand the main differences and similarities between cheese types their processes and technology</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Cleaning In Place

### CT-20244

 Target Group	<b>Operators, maintenance personnel and other production personnel in the food industry</b>
 Duration (Days)	<b>0.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>12</b>

### Description

This training gives participants an introduction to Cleaning In Place (CIP) technology. It covers the principles of cleaning and understanding of basic Cleaning In Place (CIP) procedures. This course should be combined with and is a good complement to Tetra Pak® Training Services equipment training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• What to remove with cleaning</li> <li>• Cleaning In Place (CIP) parameters</li> <li>• Cleaning In Place (CIP) procedures</li> <li>• Components of a Cleaning In Place (CIP) system</li> <li>• How to verify cleaning efficiency</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Basic Cleaning In Place (CIP) technology</li> <li>• The importance of cleaning in food processing</li> <li>• The purpose of Cleaning In Place (CIP)</li> <li>• That the need for cleaning varies</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Locate the main components of a cleaning system</li> <li>• Recognize cleaning parameters and basic Cleaning In Place (CIP) procedures</li> <li>• Recognize steps in cleaning verification</li> <li>• Know the basics steps of a whole production cycle</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Desserts, Soups and Cooking Sauces Processing

### CT-20258

 Target Group	<b>Operators, maintenance and other production personnel in the food industry</b>
 Duration (Days)	<b>0.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>12</b>

### Description

This training is designed to give participants an introduction to formulated food such as desserts, soups and cooking sauces. It will cover basic processing principles and technology of formulated and high viscous food products. The course should be combined with and is a good complement to Tetra Pak® Training Services equipment training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Formulated food products characteristics</li> <li>• Key ingredients for desserts, soups and cooking sauces</li> <li>• Mixing, heat treatment, homogenization and storage technologies</li> <li>• Practical exercises related to these topics</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The basic technology of formulated high viscous food products with and without particles</li> <li>• The influence of different ingredients and their impact on final product characteristics</li> <li>• How the product properties influence different steps in the process</li> <li>• Critical parameters to obtain food safety with formulated high viscous food products</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Understand different formulations of food products and how they influence final product</li> <li>• Apply basic knowledge of viscous and particle containing products in mixing</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Ice Cream Processing

### CT-20200

 Target Group	<b>Operators and production managers</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>12</b>

### Description

This training is designed to give participants an introduction to ice cream raw material and composition as well as the effect of mix preparation. It will cover the basic principles of ice cream technology including the different steps in processing. The course should be combined with and is a good complement to Tetra Pak® Training Services equipment training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Ice cream microstructure</li> <li>• Raw material functionality</li> <li>• The working principle of mix preparation process</li> <li>• The working principle and control loops of the freezing process</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Ice cream structure and composition</li> <li>• The main processing steps and working principles for:             <ul style="list-style-type: none"> <li>– Handling of raw materials</li> <li>– Batch, low- and high shear mixing of raw materials</li> <li>– Heat treatment of the ice cream mix</li> <li>– Homogenization of the ice cream mix</li> <li>– Ageing of the ice cream mix</li> <li>– Freezing of the ice cream mix</li> </ul> </li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Identify and understand ice cream mix defects</li> <li>• Explain typical names and terms in ice cream technology and processes</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>

## Ice Cream – Products

### CT-20705

 Target Group	<b>Formulation personnel and line/factory managers</b>
 Duration (Days)	<b>1 (depending on content) and can be extended 1 day with workshop</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>12</b>

### Description

This training is designed to give participants an introduction to challenging ice cream products and their composition. It will cover the problem and challenges with production of problematic ice cream categories focusing on formulation and processing. The course should be combined with CT-20200 Ice Cream Processing. As the training contains workshops with formulation / recipe balancing, there is a requirement to the participants and to the confidentiality.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of main components</li> <li>• Calculation / balancing of formulations</li> <li>• Learning Evaluation</li> </ul>	<ul style="list-style-type: none"> <li>• How to formulate and process               <ul style="list-style-type: none"> <li>– Extruded ice cream</li> <li>– Sorbet and extruded water ice</li> <li>– Frozen yogurt</li> <li>– Low fat / low sugar frozen desserts</li> <li>– Frozen mousse</li> </ul> </li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Main raw materials (repetition)</li> <li>• Calculation / balancing of ice cream formulations</li> <li>• Products covered:               <ul style="list-style-type: none"> <li>– Extruded ice cream</li> <li>– Sorbet and extruded water ice</li> <li>– Frozen yogurt</li> <li>– Low fat / low sugar frozen desserts</li> <li>– Frozen mousse</li> </ul> </li> </ul>	<p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Formulating different product categories</li> <li>• Knowledge on unique raw materials / solutions</li> <li>• Processing, including mix preparation, freezing and handling</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>	

## Membrane Filtration

### CT-20245

 Target Group	<b>Operators, maintenance personnel and other production personnel</b>
 Duration (Days)	<b>0.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>12</b>

### Description

This training is designed to give participants an introduction to membrane filtration. It will cover the basic principles of membrane technology including examples of applications. This course should be combined with and is a good complement to Tetra Pak® Training Services equipment training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Basic principles of membrane filtration</li> <li>• Configuration of membrane elements</li> <li>• Basic theory</li> <li>• The ranges of membrane filtration</li> </ul>	<ul style="list-style-type: none"> <li>• Examples of applications</li> <li>• Operating principles</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The basic principles of membrane filtration</li> <li>• The basic terminology</li> <li>• Different purposes with membrane filtration</li> <li>• The different configuration of membrane element</li> <li>• The different types of membrane filtration</li> <li>• Operating principles</li> </ul>	<p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Explain the basic principles of membrane filtration (cross-flow, dead-end)</li> <li>• Understand the basic terminology within membrane filtration</li> <li>• Understand the configurations of membrane elements (spiral wound, plate &amp; frame and tubular)</li> <li>• Explain the basic theory of membrane filtration (such as driving force and retention)</li> <li>• Understand what factors can influence fouling and cleaning</li> <li>• Identify the ranges of pressure driven membrane filtration (reverse osmosis, nanofiltration, ultrafiltration and microfiltration)</li> <li>• Explain the operating principles batch and continuous</li> <li>• Give examples of applications where membrane filtration is used</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>	

## Soy Processing

### CT-20251

 Target Group	<b>Operators, maintenance personnel and other production personnel in the dairy industry</b>
 Duration (Days)	<b>0.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>12</b>

### Description

This training is designed to give participants an introduction to soy technology. It will cover the basic principles of soy technology including the different steps in processing. The course should be combined with and is a good complement to Tetra Pak® Training Services equipment training.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Soya bean chemistry</li> <li>• Soy base characteristics</li> <li>• Grinding, fibre separation, enzyme deactivation</li> <li>• Practical exercises related to these topics</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• The basic principles of soy technology</li> <li>• The chemistry of soya beans</li> <li>• The importance of quality parameters</li> <li>• The purpose of the different steps in the process and how the product reacts</li> <li>• The main components of the extraction unit</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Ensure optimal storage conditions of soya bean raw material</li> <li>• Identify the factors to improve the protein extraction yield</li> <li>• Recognize the properties of beany and low beany soy base</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment log book</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations / maintenance</li> <li>• Set of manuals available during the training</li> </ul>

# Food Safety and Quality

Quality assurance training courses build and maintain your staffs skills to consistently secure your desired product quality.

## Training outcomes:

- Understand food safety and hygiene guidelines
- Meet Food safety and Food quality legislation
- Avoid product quality problems
- Reduce cost caused by quality deviations
- Build awareness of quality and it's impact in your daily production

Course Item	Course Name	Average Duration (Days)	Max. Participants	Page Number
CT-20207	Food Safety and Quality Aseptic Production Principles for QA/QC Staff – UHT Milk Line	3.5	8	303
CT-20205	Food Safety and Quality Aseptic Production Principles for Tetra Pak® A3 Operators – UHT Milk Line	3	8	304
CT-20224	Food Safety and Quality Aseptic Production Principles for Processing Operators – UHT Milk Line	3	8	305
CT-20711	Food Safety and Quality Aseptic Production Principles – High Acid and Tomato products	3	8	306
CT-20712	Food Safety and Quality Aseptic Production Principles – Tomato products	3	8	307
CT-20713	Food Safety and Quality Aseptic Production Principles – High Acid products	3	8	308
CT-20729	Food Safety and Quality Aseptic Production Principles – Coconut products	3	8	309
CT-20732	Food Safety and Quality Aseptic Production Principles – UHT Soya Based and Vegetable Drinks	3.5	8	310
CT-20730	Food Safety and Quality Aseptic Production Principles – Cleaning for long life production	1	8	311
CT-20260	Food Safety and Quality Package Evaluation including dissolving with DIMC and PullTab™	2.5	8	312
CT-20268	Food Safety and Quality Package Evaluation including dissolving without opening	2	8	313
CT-20269	Food Safety and Quality Package Evaluation without opening	1	8	314
CT-20270	Food Safety and Quality Package Evaluation with PullTab™	1	8	315
CT-20271	Food Safety and Quality Package Evaluation with DIMC	1	8	316
CT-20662	Food Safety and Quality Package Evaluation for Tetra Top®	1.5	8	317
CT-20663	Food Safety and Quality Package Evaluation for Tetra Rex®	1	8	318
CT-20592	Food Safety and Quality Package Evaluation for Tetra Recart TPRI/TPR2	1	8	319

## Aseptic Production Principles for QA/QC Staff – UHT Milk Line

### CT-20207

 Target Group	<b>QA &amp; QC staff supporting the aseptic production of UHT milk filled by Tetra Pak® A3 filling machines</b>
 Duration (Days)	<b>3.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge about food safety, hygiene and operational aspects in the production environment – targeting QA and QC personnel working by Tetra Pak® A3 UHT dairy lines. It will provide an understanding of quality assurance and quality control of the production line for UHT milk for ambient distribution. It will give the student some important tools to ensure high quality products by avoiding microbial contamination and food spoilage. This course does not cover the package integrity area.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to Aseptic Production</li> <li>• Introduction to Quality</li> <li>• Food Safety and Tetra Pak® Equipment</li> <li>• Microbiology in Food Production</li> <li>• Milk Quality and Tests</li> <li>• Process Line Overview - UHT Milk</li> <li>• Components and Technologies - Pasteurised Milk</li> <li>• Processing Components and Technologies - UHT Milk</li> <li>• Introduction to the Tetra Pak® A3 Filling Machine</li> </ul>	<ul style="list-style-type: none"> <li>• Cleaning Principles</li> <li>• Cleaning of an Aseptic Filling Machine</li> <li>• Disinfection and Sterilisation</li> <li>• Sterile System of an Aseptic Filling Machine</li> <li>• Storage and Handling of Material</li> <li>• Plant Design and Utilities</li> <li>• Microbiological Control of Final Product</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognise important definitions, legislation and standards related to food safety, and how the Tetra Pak Group works with it</li> <li>• Recognise the equipment and its principal functions in a UHT dairy line with a Tetra Pak® A3 filling machine</li> <li>• Know which aspects to consider regarding quality assurance in a UHT milk producing factory and the basic procedures for quality control</li> <li>• Know the concept of zoning and recognise the requirements on plant design and utilities when it comes to aseptic production and Know basic microbiology as well as the main procedures for detecting un-sterilities</li> </ul>	
<b>Guidelines</b>	<p>This course is mainly theoretical and will preferably take place in the classroom, it includes some visits and exercises to be performed in the production environment, storage areas and laboratory. Visits and exercises will not interfere with equipment operation at the production site.</p>	

## Aseptic Production Principles for Tetra Pak® A3 Operators – UHT Milk Line

### CT-20205

 Target Group	<b>Tetra Pak® A3 filling machine operators working in a UHT dairy line</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge about food safety, hygienic operation and quality control for Tetra Pak® A3 filling machine operators in a UHT dairy line. It will give the student some important lessons and tools to facilitate high quality operation to avoid microbial contamination and food spoilage. This course does not cover the package integrity.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to Aseptic Production</li> <li>• Microbiology in Food Production</li> <li>• Process Line Overview – UHT Milk</li> <li>• Cleaning Principles</li> <li>• Cleaning of an Aseptic Filling Machine</li> <li>• Cleaning of the Facilities</li> <li>• Disinfection and Sterilisation</li> <li>• Sterile System of an Aseptic Filling Machine</li> <li>• Storage and Handling of Material</li> <li>• Hygiene Procedures and Behaviour</li> <li>• Microbiological Control of Final Product</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognise the equipment in a line for UHT dairy production, the methods and technologies used to ensure food safety and the procedures for quality control of the final product</li> <li>• Know how and why the Tetra Pak® A3 filling machine should be cleaned and recognise how the sterile system works</li> <li>• Recognise how environmental conditions interfere with aseptic performance and know how to store and handle material and tools, as well as operate and behave in a food producing unit in order to minimise the risks of product contamination</li> </ul>
<b>Guidelines</b>	<p>This course is mainly theoretical and will preferably take place in the classroom, but it includes some visits and exercises to be performed in the production environment, storage areas and laboratory. Visits and exercises will not interfere with equipment operation at the production site, except for one exercise where you need access to the filling machine.</p>

## Aseptic Production Principles for Processing Operator – UHT Milk Line

### CT-20224

 Target Group	<b>Processing operators working in a direct UHT milk line</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge about food safety and quality, hygiene procedures and critical operations for processing operators working in a direct UHT milk line. It will give the student some important tools for high quality operation to avoid microbial contamination and food spoilage.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to Aseptic Production</li> <li>• Microbiology in Food Production</li> <li>• Process Line Overview - UHT Milk</li> <li>• Cleaning Principles</li> <li>• Cleaning of an Aseptic Filling Machine</li> <li>• Cleaning of the Facilities</li> <li>• Disinfection and Sterilisation</li> <li>• Sterile System of an Aseptic Filling Machine</li> <li>• Storage and Handling of Material</li> <li>• Hygiene Procedures and Behaviour</li> <li>• Microbiological Control of Final Product</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognise the equipment in a line for UHT dairy production, the methods and technologies used to ensure food safety and the procedures for quality control of the final product</li> <li>• Know how and why the Tetra Pak® A3 filling machine should be cleaned and recognise how the sterile system works</li> <li>• Recognise how environmental conditions interfere with aseptic performance and know how to store and handle material and tools, as well as operate and behave in a food producing unit in order to minimise the risks of product contamination</li> </ul>
<b>Guidelines</b>	<p>This course is mainly theoretical and will preferably take place in the classroom, but it includes some visits and exercises to be performed in the production environment, storage areas and laboratory. Visits and exercises will not interfere with equipment operation at the production site, except for one exercise where you need access to the filling machine.</p>

## Aseptic Production Principles – High Acid and Tomato products

### CT-20711

 Target Group	<b>For operation and QA/QC staff working with production of high acid and tomato products filled by Tetra Pak® A3 filling machines</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge about food safety, hygiene, and operational aspects in the production environment, mainly targeting QA/QC and operation personnel working at high acid and tomato lines with Tetra Pak® A3 filling machines. This course will provide an understanding of quality assurance and quality control procedures of the production for high acid and tomato products for ambient distribution. Also, this course will give some important tools to ensure high quality product by avoiding microbiological contamination and food spoilage. This course does not cover the package integrity area.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to Quality</li> <li>• Food Safety and Tetra Pak® Equipment</li> <li>• Microbiology in Food Production</li> <li>• Primary and Secondary Products</li> <li>• Fruit Processing</li> <li>• Characteristics Tomato</li> <li>• Standard and Definitions – Tomato</li> <li>• Quality – Tomato</li> <li>• Primary Industry</li> <li>• Components and Technologies: High Acid Products</li> <li>• Introduction to the Tetra Pak® A3 Filling Machine</li> </ul>	<ul style="list-style-type: none"> <li>• Processing and Filling Machine Interaction</li> <li>• Cleaning Principles</li> <li>• Cleaning of an Aseptic Filling Machine</li> <li>• Disinfection and Sterilization</li> <li>• Sterile System of an Aseptic Filling Machine</li> <li>• Storage Handling of Material</li> <li>• Plant Design and Utilities</li> <li>• Microbiological Control of Final Product</li> <li>• Possible Entry Points of Moulds for consumer</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognize important definitions, legislation and standards related to food safety, and how the Tetra Pak Group works with it</li> <li>• Recognize the equipment and its principal functions in a high acid and tomato products line with Tetra Pak® A3 filling machine</li> <li>• Know which aspects to consider regarding quality assurance in high acid product and tomato production environment, and the basic procedures for quality control</li> </ul>	
<b>Guidelines</b>	<p>This course is mainly theoretical and will preferably take place in the classroom, but it includes some visits and exercises to be performed in the production environment, storage areas and laboratory. Visits and exercises will not interfere with equipment operation at the production site, except for one exercise where you need access to the filling machine.</p>	

## Aseptic Production Principles – Tomato products

### CT-20712

 Target Group	<b>For operation and QA/QC staff working with production of tomato products filled by Tetra Pak® A3 filling machines</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge about food safety, hygiene, and operational aspects in the production environment, mainly targeting QA/QC and operation personnel working at tomato lines with Tetra Pak® A3 filling machines. This course will provide an understanding of quality assurance and quality control procedures of the production for tomato products for ambient distribution. Also, this course will give some important tools to ensure high quality product by avoiding microbiological contamination and food spoilage. This course does not cover the package integrity area.

<b>Content</b>	<ul style="list-style-type: none"> <li>• High Acid Products</li> <li>• Introduction to Aseptic Production</li> <li>• Introduction to Quality</li> <li>• Food Safety and Tetra Pak® Equipment</li> <li>• Microbiology in Food Production</li> <li>• Characteristics – Tomato</li> <li>• Quality – Tomato</li> <li>• Primary Industry</li> <li>• Components and Technologies: High Acid Products</li> <li>• Introduction to the Tetra Pak® A3 Filling Machine</li> </ul>	<ul style="list-style-type: none"> <li>• Cleaning Principles</li> <li>• Cleaning of an Aseptic Filling Machine</li> <li>• Disinfection and Sterilisation</li> <li>• Sterile System of an Aseptic Filling Machine</li> <li>• Storage Handling of Material</li> <li>• Plant Design and Utilities</li> <li>• Microbiological Control of Final Product</li> <li>• Possible Entry Points of Moulds for consumer</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognize important definitions, legislation and standards related to food safety, and how the Tetra Pak Group works with it</li> <li>• Recognize the equipment and its principal functions in a tomato products line with a Tetra Pak® A3 filling machine</li> <li>• Know which aspects to consider regarding quality assurance in high acid products in production environment, and the basic procedures for quality control</li> </ul>	
<b>Guidelines</b>	<p>This course is mainly theoretical and will preferably take place in the classroom, but it includes some visits and exercises to be performed in the production environment, storage areas and laboratory. Visits and exercises will not interfere with equipment operation at the production site, except for one exercise where you need access to the filling machine.</p>	

## Aseptic Production Principles – High Acid products

### CT-20713

 Target Group	<b>For operation and QA/QC staff working with production of high acid products filled by Tetra Pak® A3 filling machines</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge about food safety, hygiene, and operational aspects in the production environment, mainly targeting QA/QC and operation personnel working at high acid production lines with Tetra Pak® A3 filling machines. This course will provide an understanding of quality assurance and quality control procedures of the production for high acid products for ambient distribution. Also, this course will give some important tools to ensure high quality product by avoiding microbiological contamination and food spoilage. This course does not cover the package integrity area.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to Quality</li> <li>• Food Safety and Tetra Pak® Equipment</li> <li>• Microbiology in Food Production</li> <li>• High Acid Products Introduction</li> <li>• Fruit Processing</li> <li>• Components and Technologies: High Acid Products</li> <li>• Introduction to the Tetra Pak® A3 Filling Machine</li> <li>• Processing and Filling Machine Interaction</li> </ul>	<ul style="list-style-type: none"> <li>• Cleaning Principles</li> <li>• Cleaning of an Aseptic Filling Machine</li> <li>• Disinfection and Sterilisation</li> <li>• Sterile System of an Aseptic Filling Machine</li> <li>• Storage Handling of Material</li> <li>• Plant Design and Utilities</li> <li>• Microbiological Control of Final Product</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognize important definitions, legislation and standards related to food safety, and how the Tetra Pak Group works with it</li> <li>• Recognize the equipment and its principal functions in a High Acid products line with a Tetra Pak® A3 filling machine</li> <li>• Know which aspects to consider regarding quality assurance in a High Acid product producing factory and the basic procedures for quality control</li> </ul>	
<b>Guidelines</b>	<p>This course is mainly theoretical and will preferably take place in the classroom, but it includes some visits and exercises to be performed in the production environment, storage areas and laboratory. Visits and exercises will not interfere with equipment operation at the production site, except for one exercise where you need access to the filling machine.</p>	

## Aseptic Production Principles – Coconut Products

### CT-20729

 Target Group	<b>For operation and QA/QC staff working with production of coconut products filled by Tetra Pak® A3 filling machines</b>
 Duration (Days)	<b>3</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge about food technology, microbiology, hygiene and operational aspects in the production environment – targeting QA/QC and operation personnel working by Tetra Pak® A3 filling machine for aseptic coconut products lines. It will provide an understanding of quality assurance and quality control of the production line for coconut products for ambient distribution. This course does not cover the package integrity area.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Commercial sterility</li> <li>• Overview of coconut processing building blocks</li> <li>• Tetra Pak aseptic packaging</li> <li>• Basic microbiology</li> <li>• Sterilization effect and <math>F_0</math></li> <li>• Cleaning</li> <li>• Food safety chart</li> <li>• Packaging material storage and handling</li> <li>• Hygienic production of liquid food</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognize important definitions, legislation and standards related to food safety, and how the Tetra Pak Group works with it</li> <li>• Recognize the equipment and its principal functions in a coconut products line with a Tetra Pak® A3 filling machine</li> <li>• Know which aspects to consider regarding quality assurance in a coconut product producing factory and the basic procedures for quality control</li> </ul>
<b>Guidelines</b>	<p>This course is mainly theoretical and will preferably take place in the classroom, but it includes some visits and exercises to be performed in the production environment, storage areas and laboratory. Visits and exercises will not interfere with equipment operation at the production site, except for one exercise where you need access to the filling machine.</p>

## Aseptic Production Principles – UHT Soya Based and Vegetable Drinks

### CT-20732

 Target Group	<b>For operation and QA/QC staff working with production of UHT soya and vegetables drinks filled by Tetra Pak® A3 filling machines</b>
 Duration (Days)	<b>3.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge about food safety, hygiene and operational aspects in the production environment – targeting QA/QC and operation personnel working by Tetra Pak® A3 filling machine UHT soya and vegetables drinks lines. It will provide an understanding of quality assurance and quality control of the production line for UHT soya and vegetables drinks for ambient distribution. It will give the student some important tools to ensure high quality products by avoiding microbial contamination and food spoilage. This course does not cover the package integrity area.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to Aseptic Production</li> <li>• Introduction to Quality</li> <li>• Food Safety and Tetra Pak® Equipment</li> <li>• Microbiology in Food Production</li> <li>• Soya &amp; Vegetable Drinks – Raw Material</li> <li>• Processing Line Overview – Soya and Vegetable Drinks</li> <li>• Components and Technologies: UHT Vegetable drinks</li> <li>• Introduction to the Tetra Pak® A3 Filling Machine</li> <li>• Processing and filling machine interaction</li> </ul>	<ul style="list-style-type: none"> <li>• Cleaning Principles</li> <li>• Cleaning of an Aseptic Filling Machine</li> <li>• Disinfection and Sterilisation</li> <li>• Sterile System of an Aseptic Filling Machine</li> <li>• Storage Handling of Material</li> <li>• Plant Design and Utilities</li> <li>• Microbiological Control of Final Product</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognize important definitions, legislation and standards related to food safety, and how the Tetra Pak Group works with it</li> <li>• Recognize the equipment and its principal functions in a High Acid products line with a Tetra Pak® A3 filling machine</li> <li>• Know which aspects to consider regarding quality assurance in a High Acid product producing factory and the basic procedures for quality control</li> </ul>	
<b>Guidelines</b>	<p>This course is mainly theoretical and will preferably take place in the classroom, but it includes some visits and exercises to be performed in the production environment, storage areas and laboratory. Visits and exercises will not interfere with equipment operation at the production site, except for one exercise where you need access to the filling machine.</p>	

## Aseptic Production Principles – Cleaning for long life production

### CT-20730

 Target Group	<b>Operation and QA/QC staff working with end- to-end cleaning and production steps of processing and packaging equipment</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge about food safety, hygiene, and cleaning aspects in the production environment – targeting operation and QA/QC personnel working for long life production. It will provide an understanding of end-to-end cleaning.

It will give the student some important tools to ensure high quality products by avoiding microbiological contamination and food spoilage.

This course does not cover general details of aseptic filling machine operations.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to Cleaning</li> <li>• Hygienic Design</li> <li>• Sinners Circle</li> <li>• Cleaning a Factory Overview</li> <li>• Cleaning of Processing Equipment</li> <li>• Cleaning of Aseptic Filling Machines</li> <li>• Cleaning Microbiology</li> <li>• Verification and Validation of Cleaning</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Recognize important definitions, legislation and standards related to food safety, and how the Tetra Pak Group works with it</li> <li>• Understand why cleaning is important in preventing contamination of product</li> <li>• Adopt good practices in preparing for, carrying out, and recording the cleaning and sanitizing of premises and equipment</li> <li>• Know which aspects to consider regarding cleaning for long life product producing factory and the basic procedures for quality control</li> </ul>
<b>Guidelines</b>	<p>This course is mainly theoretical and will preferably take place in the classroom, but it includes some visits and exercises to be performed in the production environment, and laboratory. Visits and exercises will not interfere with equipment operation at the production site as they can be aligned with real cleaning schedule of factory.</p>

## Package Evaluation including dissolving with DIMC and PullTab™

### CT-20260

 Target Group	<b>QA/QC Personnel</b>
 Duration (Days)	<b>2.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge in the evaluation of Tetra Brik®, Tetra Prisma®, Tetra Gemina®, Tetra Classic®, Tetra Fino®, Tetra Wedge® packages with openings such as DIMC and PullTab™.

It includes visual checks, electrolytic test, red ink tests, sealing quality evaluation and dissolving. The course contains practical work.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Know how to perform package checks according to the Operation Manual (OM) - Forming</li> <li>• Visual checks</li> <li>• Electrolytic test</li> <li>• Ink Tests</li> <li>• Sealing quality LS/SA/TS</li> <li>• How to perform and analyse dissolving</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	Gain knowledge and practical experience in the package checks and dissolving
<b>Guidelines</b>	<ul style="list-style-type: none"> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Defective Packages for checks</li> </ul>

## Package Evaluation including dissolving without opening

### CT-20268

 Target Group	<b>QA/QC Staff</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This course provides fundamental knowledge in the evaluation of Tetra Brik®, Tetra Prisma®, Tetra Gemina®, Tetra Classic®, Tetra Fino®, Tetra Wedge® packages produced without pre-applicator (no opening or with cap on pre-laminated hole).

It includes visual checks, electrolytic test, red ink tests, sealing quality evaluation and dissolving. The course contains practical work.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Know how to perform package checks according to the Operation Manual (OM) - Forming</li> <li>• Visual checks</li> <li>• Electrolytic test</li> <li>• Ink Tests</li> <li>• Sealing quality LS/SA/TS</li> <li>• How to perform and analyse dissolving</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	Gain knowledge and practical experience in the package checks and dissolving
<b>Guidelines</b>	<ul style="list-style-type: none"> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Defective Packages for checks</li> </ul>

## Package Evaluation without Opening

### CT-20269

 Target Group	<b>Operators and Technicians</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

Theoretical and practical training in the evaluation of Tetra Brik®, Tetra Prisma®, Tetra Gemina®, Tetra Classic®, Tetra Fino®, Tetra Wedge® packages produced without pre-applicator (no opening or pre-laminated hole). Including visual checks, electrolytic test, red ink tests and sealing quality evaluation but excluding dissolving.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Know how to perform package checks according to the Operation Manual (OM) - Forming</li> <li>• Visual checks</li> <li>• Electrolytic test</li> <li>• Ink Tests</li> <li>• Sealing quality LS/SA/TS</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	Gain knowledge and practical experience in the package checks
<b>Guidelines</b>	<ul style="list-style-type: none"> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Defective Packages for checks</li> </ul>

## Package Evaluation with PullTab™

### CT-20270

 Target Group	<b>Operators and Technicians</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

Theoretical and practical training in the evaluation of Tetra Brik®, Tetra Prisma®, Tetra Gemina®, Tetra Classic®, Tetra Fino®, Tetra Wedge® packages produced with PullTab™. Including visual checks, electrolytic test, red ink tests and sealing quality evaluation but excluding dissolving.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Know how to perform package checks according to the Operation Manual (OM) - Forming</li> <li>• Visual checks</li> <li>• Electrolytic test</li> <li>• Ink Tests</li> <li>• Sealing quality LS/SA/TS</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	Gain knowledge and practical experience in the package checks
<b>Guidelines</b>	<ul style="list-style-type: none"> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Defective Packages for checks</li> </ul>

## Package Evaluation with DIMC

### CT-20271

 Target Group	<b>Operators</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

Theoretical and practical training in the evaluation of Tetra Brik®, Tetra Prisma®, Tetra Gemina®, Tetra Classic®, Tetra Fino®, Tetra Wedge® with DIMC. Including visual checks, electrolytic test, red ink tests and sealing quality evaluation but excluding dissolving.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Know how to perform package checks according to the Operation Manual (OM) - Forming</li> <li>• Visual checks</li> <li>• Electrolytic test</li> <li>• Ink Tests</li> <li>• Sealing quality LS/SA/TS</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	Gain knowledge and practical experience in the package checks
<b>Guidelines</b>	<ul style="list-style-type: none"> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Defective Packages for checks</li> </ul>

## Package Evaluation for Tetra Top®

### CT-20662

 Target Group	<b>Operators and Technicians</b>
 Duration (Days)	<b>1.5</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

Theoretical and practical training in the evaluation of Tetra Top® packages. Including both destructive and non-destructive checks, blue and/or red ink tests (depending on customer production), oxygen concentration and H<sub>2</sub>O<sub>2</sub> residual test. Suitable for filling machine operators already having basic knowledge or experience within Tetra Brik® Aseptic package production and checking.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Know how to perform package checks according to the Operation Manual (OM)</li> <li>• Forming</li> <li>• Visual checks</li> <li>• Ink Tests</li> <li>• Sealing quality LS/TS</li> <li>• Oxygen concentration test</li> <li>• Peroxide residual test</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	Improve or refresh the knowledge within the package checks necessarily during Tetra Top® package production
<b>Guidelines</b>	<ul style="list-style-type: none"> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Defective Packages for checks</li> </ul>

## Package Evaluation for Tetra Rex®

### CT-20663

 Target Group	<b>Operators and Technicians</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

Theoretical and practical training in the evaluation of Tetra Rex® packages. Including both destructive and non-destructive checks, blue and/or red ink tests (depending on customer production), oxygen concentration and H<sub>2</sub>O<sub>2</sub> residual test. Suitable for filling machine operators already having basic knowledge or experience within Tetra Rex® package production and checking.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Know how to perform package checks according to the Operation Manual (OM)</li> <li>• Forming</li> <li>• Visual checks</li> <li>• Ink Tests</li> <li>• Sealing quality top and bottom</li> <li>• Understand and check of different type of openings and closures.</li> <li>• Oxygen concentration test</li> <li>• Hydrogen peroxide residual test</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	Improve or refresh the knowledge within the package checks necessarily during Tetra Rex® package production
<b>Guidelines</b>	<ul style="list-style-type: none"> <li>• Package integrity tools (pliers, syringes, etc.)</li> <li>• Set of manuals available during the training (prerequisites 2 sets)</li> <li>• Defective Packages for checks</li> </ul>

## Package Evaluation for Tetra Recart TPRI/TPR2

### CT-20592

 Target Group	<b>Operators, Technicians and QA Staff</b>
 Duration (Days)	<b>1</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This training block is designed to give the participants theoretical and practical knowledge of the Package Evaluation. The objectives are to enable the participants to perform Package Evaluation according to OM-Book. There are three main Evaluation levels: Standard/basic checks, Extended checks and troubleshooting checks. Standard checks and Extended checks are aimed for all personnel. The trouble shooting checks are intended for laboratory personnel or personnel of Tetra Pak.

*NOTE! It is important to have experience about the Tetra Recart® machine to be able to perform the training. The package material is different than any other Tetra Pak® material.*

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tools and environment</li> <li>• Basic - Package Evaluation</li> <li>• Extended - Package Evaluation</li> <li>• Trouble shooting - Package Evaluation</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>The participant will be informed of:</b></p> <ul style="list-style-type: none"> <li>• Tools and environment</li> <li>• Basic - Package Evaluation</li> <li>• Extended - Package Evaluation</li> <li>• Trouble shooting - Package Evaluation</li> </ul> <p><b>The participant will as part of a group:</b></p> <ul style="list-style-type: none"> <li>• Perform Basic Package Evaluation according to OM-Book and extended QC tests.</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Perform Basic Package Evaluation according to OM-Book</li> </ul>
<b>Guidelines</b>	<ul style="list-style-type: none"> <li>• Preparations to do before use of this block</li> <li>• The machine should be ready to produce water packages</li> <li>• Packaging material enough for at least 200 packages</li> <li>• Means to dispose of produced packages - a classroom with white board and a PC-projector</li> <li>• A table and a flip chart close to the machine</li> <li>• An ordinary set of hand tools - tools and equipment necessary for Package Evaluation</li> </ul>

# Manage Aseptic Production, Leadership & Others

Manage Production and Leadership courses are targeting professionals who are responsible as managers, supervisors or any other leaders working with food and beverage operations.

## **Training outcomes:**

These courses will help you to develop a comprehensive understanding of food safety, quality awareness, continuous improvement, and effective leadership to ensure optimal production performance.

Course Item	Course Name	Average Duration (Days)	Max. Participants	Page Number
CT-20731	Problem Solving Methodology	2	8	322
CT-20718	Ice Cream Filling Machine (Manager Training Ice Cream Filler)	2	6	323
CT-20724	Manager Training Tetra Pak® A3/E3 Introduction	4	6	324

## Problem Solving Methodology

### CT-20731

 Target Group	<b>Operators, Technicians and QA/QC staff</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>8</b>

### Description

This training course will give introduction to problem solving mindset and give a walkthrough of the three basic tools used. In the end of the course participants will be able to use problem solving methodology.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction and basic concepts</li> <li>• Form the team</li> <li>• Understand the Problem</li> <li>• Contain the problem &amp; restore basic condition</li> <li>• Perform Root Cause Analysis</li> <li>• Brief introduction of remaining PSM steps</li> <li>• PSM on real life case</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Participants will acquire introduction of problem solving</li> <li>• Participants will use problem solving methodology in daily work routines</li> <li>• Participants will be able to identify root causes and the proper actions for a successful resolution</li> </ul>
<b>Guidelines</b>	This course is mainly theoretical and will preferably take place in the classroom

## Ice Cream Filling Machine (Manager Training Ice Cream Filler)

### CT-20718

 Target Group	<b>Personnel with operational performing responsibility, e.g. line managers</b>
 Duration (Days)	<b>2</b>
 Prerequisites	<b>Access to processing equipment for hands-on training: 1 to 3 hours per day (Time for taking out production and preparing for production not included)</b>
 Max. Participant	<b>6</b>

### Description

This training is designed to give participants operational performance responsibility on the complete line, and technical understanding of the line and production procedures.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Working principles of components with focus on main components including technical construction of main components</li> <li>• Operational and change-over procedures</li> <li>• Production optimization</li> <li>• Performance reporting</li> <li>• How to read and use manual(s) and documentation</li> <li>• Learning evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>On completion of this training, the participant will understand:</b></p> <ul style="list-style-type: none"> <li>• Safety of the machine</li> <li>• Technical working principles on each components on the complete line</li> <li>• Operational procedures (start-up) on complete line</li> <li>• Procedures for assuring right equipment setup (system check)</li> <li>• Production change-over Procedures</li> <li>• Production optimization</li> <li>• Automation/electrical introduction</li> <li>• Performance reporting on complete line</li> </ul> <p><b>The participant will individually be able to:</b></p> <ul style="list-style-type: none"> <li>• Assist on technical questions on the line</li> <li>• Perform a production Start-up and production change on the complete line</li> <li>• Troubleshoot process line issues</li> <li>• Extract the right performance reporting from production</li> </ul>
<b>Key Benefits</b>	<ul style="list-style-type: none"> <li>• Increase competence and knowledge level</li> <li>• Increased employee commitment and engagement</li> <li>• Increased equipment performance</li> <li>• Ensured consistent desired product quality</li> <li>• Reduced waste and increased line efficiency</li> </ul>

## Manager Training Tetra Pak® A3/E3 Introduction

### CT-20724

 Target Group	<b>Personnel with operational performing responsibility, e.g. line managers</b>
 Duration (Days)	<b>4</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>6</b>

### Description

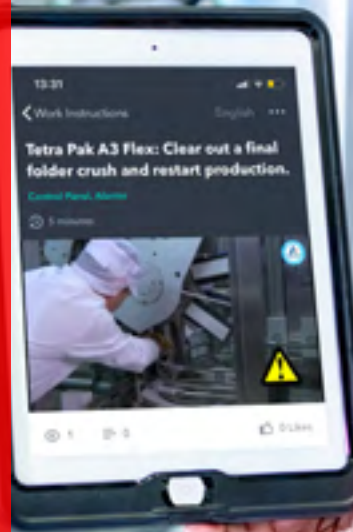

The training is designed to give participants operational performance responsibility on the complete line, and technical understanding on the line and production procedures.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® A3 / E3 Introduction and Safety</li> <li>• Packaging Material Web &amp; Tube Forming</li> <li>• Drive &amp; Jaw System</li> <li>• Design Correction</li> <li>• Final Folder Unit</li> <li>• Sterile Air System</li> <li>• Filling System</li> <li>• Sealing System</li> <li>• Cleaning System</li> <li>• Integrated Line Automation concepts</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• To understand how the different components on the filling machine work individually and together as machine functions</li> <li>• To be updated on the new technologies and components used in Tetra Pak® A3 and Tetra Pak® E3 filling machine</li> <li>• To be updated on the competences and tools needed to operate, service and troubleshoot the Tetra Pak® A3 and Tetra Pak® E3 machines</li> <li>• To understand the critical factors influencing a commercial, aseptic production</li> </ul>
<b>Key Benefits</b>	<ul style="list-style-type: none"> <li>• Equipment not in the production phase, available and without defects</li> <li>• Ability to run the machine with water / product when needed</li> <li>• Plant SOP, Critical Control Point plan, equipment logbook</li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Proper PPE</li> <li>• Equipment specific tools for operations</li> <li>• Set of manuals available during the training</li> </ul>

# Anytime Learning

Anytime Learning gives you constant access and total flexibility to content created and curated by experts.

Our centralised digital library of work instructions and video tutorials is a resource that allows you to save time by focusing on core production and minimise disruption to production.

## Anytime Learning for Operations

 Target Group	<b>Operators</b>
 Platform	<b>Online</b>
 Prerequisites	<b>Recommended to have attended Operations training provided by Tetra Pak® Training Services</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

This microlearning libraries are designed to give the participants operational skills for their regular duties and tasks on a specific equipment.

The microlearning libraries are task based around the Operation Manual and focuses on Standard Operating Procedures to be performed by the operator.

<b>Content</b>	<p><b>As example of the libraries we are covering tasks such as:</b></p> <ul style="list-style-type: none"> <li>• Safety precautions</li> <li>• Hygiene</li> <li>• Human Machine Interface (HMI) Operation</li> <li>• Equipment preparation</li> <li>• Start production</li> <li>• Equipment checks</li> <li>• Supply of material</li> <li>• Package checks</li> <li>• Equipment stops</li> <li>• Handling sterilization liquid</li> <li>• Care and cleaning</li> </ul> <p><i>Note! The content and duration to go through the video libraries varies depending on the complexity of the equipment. Content should be used on the factory floor to reinforce the knowledge on how to carry out a procedure.</i></p>
<b>Principal Objectives</b>	<p>The objectives are to reinforce the knowledge on how to carry out Standard Operating Procedure steps according to the Operation Manual (OM) including preparation, production, care and cleaning. This training content will work as a repetition to reinforce good practices in the production area.</p> <p><b>On completion, the participant will have seen:</b></p> <ul style="list-style-type: none"> <li>• The Standard Operating Procedures connected to the equipment</li> <li>• The importance of safety precautions when performing Standard Operating Procedures</li> <li>• The best practices to perform each task</li> </ul>
<b>Required Facilities</b>	<p>WiFi connection</p>

## Anytime Learning for Maintenance

 Target Group	<b>Technicians</b>
 Platform	<b>Online</b>
 Prerequisites	<b>Recommended to have attended instructor led training provided by Tetra Pak® Training Services</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

This microlearning library is designed to give the participants maintenance skills for their regular duties and tasks on specific equipment.

The microlearning library is task based around the Maintenance Manual (MM) and Preventive Maintenance lists. Recommendations and focuses on activities performed by the technicians.

<b>Content</b>	<p><b>As example of the libraries we are covering tasks such as:</b></p> <ul style="list-style-type: none"> <li>• Tetra Pak® Maintenance System (TPMS) list Customer Tasks with specific range of 500h, 1000h, 1500h service</li> </ul> <p><i>Note! The content and duration to go through the video libraries varies depending on the complexity of the equipment. Content should be used on the factory floor to reinforce the knowledge on how to carry out a procedure.</i></p>
<b>Principal Objectives</b>	<p>The objectives are to reinforce the knowledge on how to carry out Standard Operating Procedure steps according to the Maintenance Manual (MM) including normal service activities that is performed by customer maintenance personnel. This training content will work as a repetition to reinforce good practices in the production area.</p> <p><b>On completion, the participant will have seen:</b></p> <ul style="list-style-type: none"> <li>• Maintenance activities connected to specific equipments</li> <li>• The importance of safety precautions when performing Standard Operating Procedures</li> <li>• The best practices to perform each task</li> </ul>
<b>Required Facilities</b>	WiFi connection

## Package Evaluation Tetra Brik® Aseptic

### CT-90102

 Target Group	<b>Operators, Technicians and Quality staff</b>
 Duration	<b>4 hours online</b>
 Prerequisites	<b>Worked as technician on Tetra Pak® distribution equipment lines</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

Tetra Pak is built on food safety and one of its most important aspects is the integrity of the packages we produce. This is also reflected in our company's motto: Protects What's Good®.

This course describes many different tests. To find out which tests to perform, refer to the Operation Manual for the equipment you are working with. In the Operation Manual you will also find how many packages to test and at what intervals. The skill of package integrity is half theory, half practice.

This training course is theoretical, but you can only become truly competent if you also have practical training. To do this you will need an experienced teacher to support you.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Package forming - Crease lines</li> <li>• Package forming – LS overlap</li> <li>• Package forming – Design</li> <li>• Package forming – Volume (weight)</li> <li>• Package forming – Flap sealing</li> <li>• Package forming – Date printing</li> <li>• Package forming – Rough check</li> <li>• Package forming – Accurate check (tear down test)</li> <li>• Package forming – Dissolving of packages</li> <li>• Package forming – Red ink in dissolved packages</li> </ul>	<ul style="list-style-type: none"> <li>• Aseptic production</li> <li>• Longitudinal sealing – Visual check</li> <li>• Longitudinal sealing – Longitudinal seal tearing</li> <li>• Longitudinal sealing – Longitudinal seal red ink injection</li> <li>• Inside layer ruptures – Visual check</li> <li>• Inside layer ruptures – Conductivity test</li> <li>• Inside layer ruptures – Red ink test</li> <li>• Test yourself</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Why the package evaluation tests should be performed</li> <li>• What you can detect with the different test methods</li> <li>• The theory on how to evaluate packages</li> </ul>	
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>	

## Package Evaluation Tetra Brik® Aseptic – DIMC

### CT-90119

 Target Group	<b>Operators, Technicians and Quality staff</b>
 Duration	<b>45 minutes online</b>
 Prerequisites	<b>Worked as technician on Tetra Pak® distribution equipment lines</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

This course elaborates how to perform various package checks. Participants will learn the standard way of performing the package evaluations related to DIMC.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Positioning of Cap Openability</li> <li>• TS Rough Test (When moulded cap is applied)</li> <li>• Cap Forming Outer side</li> <li>• Cap Forming Inner side</li> <li>• Cap Integrity</li> <li>• Cap Seal</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>This course will prepare you to know:</b></p> <ul style="list-style-type: none"> <li>• Why the package evaluation tests should be performed</li> <li>• What you can detect with the different test methods</li> <li>• The theory on how to evaluate packages</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Paper Straw Awareness

### CT-90100

 Target Group	<b>Technician</b>
 Duration	<b>1 hour online</b>
 Prerequisites	<b>Worked as technician on Tetra Pak® distribution equipment lines</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

This is an awareness e-learning for customers that have introduced paper straws.

You are a technician and you are well acquainted with your lines in production containing distribution equipment such as straw applicators, cardboard packers and shrink wrappers. Now you will start to rebuild or support the production lines which are to be converted into using paper straws instead of plastic straws.

You are confident enough to expand your working range to include paper straws, but need to learn what is new about this product. This training will explain what there is to learn, but it is essential that you also work according to the machine documentation and follow the settings stated in the Maintenance Manual (MM), as well as the paper straw quality documentation, so make sure that you have it at hand and follow along in it when you study this course.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction</li> <li>• Paper Straw Properties</li> <li>• Rebuilding of the Line</li> <li>• Paper Straw Deviations and Checks</li> <li>• Sampling Check</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand how to rebuild a production line to run smoothly with paper straws attached to the packages</li> <li>• Understand how to address any deviations</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Tetra Pak® Continuous Freezer

### CT-90104

 Target Group	<b>Technicians</b>
 Duration	<b>3 hours online</b>
 Prerequisites	<ul style="list-style-type: none"> <li>• <b>Only trained personnel are allowed to operate the machine.</b></li> <li>• <b>The machine may only be used in accordance with the instructions given in the manuals delivered with the equipment.</b></li> <li>• <b>If the Safety precautions are not followed, there is risk of personal injury.</b></li> </ul>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

This e-Learning is designed to provide the participants an understanding of the function and a description of the Tetra Pak® Continuous Freezer. Furthermore, it will give the participants maintenance skills for their regular duties and tasks on a Tetra Pak® Continuous Freezer. The e-Learning is designed in three steps and can be introduced progressively to participants with increasing knowledge requirements. The maintenance part of the e-Learning is task based around the Preventive Maintenance Recommendations and focuses on activities to be performed by the technicians.

The objectives are to reinforce the knowledge on how to carry out Standard Operating Procedure steps according to the Maintenance Manual (MM) and/or Technical Manual (TeM) including normal service activities that is performed by customer maintenance personnel. This training content will work as a repetition to reinforce good practices in the production area.

<b>Content</b>	<p><b>Introduction</b></p> <ul style="list-style-type: none"> <li>• Introduction to ice cream structure and mix preparation</li> <li>• Flow in the continuous freezer</li> <li>• Freezing of ice cream</li> <li>• Overview of the complete ice cream process</li> <li>• Learning Evaluation</li> </ul>	<p><b>Understanding</b></p> <ul style="list-style-type: none"> <li>• Ice cream mix quality</li> <li>• Description of the rotary pump, refrigeration and main motor drive</li> <li>• Operation of the continuous freezer</li> </ul>	<p><b>Maintenance</b></p> <p>Understanding, overview, wear parts and video explaining the individual tasks during the preventive maintenance assignment for all preventive maintenance intervals</p>
<b>Principal Objectives</b>	<p><b>On completion, the participant will have seen:</b></p> <ul style="list-style-type: none"> <li>• Maintenance activities connected to equipment Tetra Pak® Continuous Freezer</li> <li>• The importance of safety precautions when performing maintenance activities</li> <li>• The best practices to perform each task</li> </ul>		
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>		

## eBeam™ Safety

### CT-90103

 Target Group	<b>Technicians, Managers</b>
 Duration	<b>1-2 hours online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

This course will explain the safety surroundings for a Tetra Pak® equipment equipped with eBeam™. The eBeam™ system is a radiation system. To service the radiation area, you must be a qualified technician. It is mandatory to inform and train the workers about the possible risks in the working environment. This eBeam™ Safety training is about radiation protection, sometimes known as radiological protection; the science and practice of protecting people and the environment from the harmful effects of ionizing radiation.

<b>Content</b>	<ul style="list-style-type: none"> <li>• eBeam™ Sterilisation</li> <li>• Radiation Effects on Health</li> <li>• eBeam™ in Tetra Pak® Equipment</li> <li>• Non Radiological Risks</li> <li>• RFID Token</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>The objectives for this course are to:</b></p> <ul style="list-style-type: none"> <li>• Know how the eBeam™ sterilisation process is applied in Tetra Pak® filling machines</li> <li>• Know the general aspects of radiation protection</li> <li>• Know which the potential non radiological risks are concerning the eBeam™ technology</li> <li>• Know which safety measures have been taken in the filling machines</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Pneumatic Conveying

### CT-90106

 Target Group	<b>All</b>
 Duration	<b>30 minutes online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

Welcome to this course about Pneumatic Conveying. This e-learning module will give you an insight into what Pneumatic conveying actually is.

There are two kinds of Pneumatic conveying: dense and lean phase each one uses positive or negative pressure. You will go through the lessons, click on hotspots, complete exercises, watch the movies and answer questions repeatedly until you feel confident in this subject.

<b>Content</b>	<ul style="list-style-type: none"> <li>• What is pneumatic conveying</li> <li>• Different type of pneumatic conveying</li> <li>• Dense and lean phase</li> <li>• Pressure and vacuum pneumatic conveying</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand the different types of pneumatic conveying</li> <li>• Understand its industrial and process applications</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Dosing and Mixing

### CT-90107

 Target Group	<b>All</b>
 Duration	<b>30 minutes online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

Welcome to this course about Dosing and Mixing. Mixing is one of the key processes in a powder plant. We'll look at the details of mixing but mixing well is pointless if your ingredient dosing is not done accurately so in this e-learning, that is where we start.

You will go through the lessons, click on hotspots, complete exercises, watch the movies and answer questions repeatedly until you feel confident in this subject.

<b>Content</b>	<ul style="list-style-type: none"> <li>• The two types of dosing</li> <li>• What is dosing</li> <li>• What makes a good dosing</li> <li>• Powder dosing equipment</li> <li>• Weight control equipment</li> <li>• Batch process</li> <li>• Tetra Pak® Powder Mixer</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand the concept of dosing and mixing</li> <li>• Understand how we define and measure good dosing</li> <li>• Understand the three mixing mechanisms</li> <li>• Understand the technology we use to make all this happen</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## High Shear Mixer Feeding

### CT-90109

 Target Group	<b>All</b>
 Duration	<b>30 minutes online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

Welcome to this course about high shear mixer feeding. In this e-learning module we will give you insights into one of the three production types of powder handling solutions, the powder-to-liquid.

You will go through the lessons, click on hotspots, complete exercises, watch the movies and answer questions repeatedly until you feel confident in this subject.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Powder handling for E2E solutions within liquid categories</li> <li>• Powder handling for High Shear Mixer</li> <li>• Powder delivery solutions</li> <li>• Direct feed from bags</li> <li>• Feed from bags with buffer</li> <li>• Direct feed from big bags</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand why powder is important in powder-to-liquid process</li> <li>• Understand which Tetra Pak solutions are available and predefined to feed the HSM</li> <li>• Understand advantages of an E2E solution</li> <li>• Understand how to select the solution</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Welcome to the world of powder

### CT-90110

 Target Group	<b>All</b>
 Duration	<b>30 minutes online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

Welcome to this course about Powder. In this e-learning you will understand that Powders, dry materials, and bulk solids are everywhere both in our everyday lives and in the industry.

You will go through the lessons, click on hotspots, complete exercises, watch the movies and answer questions repeatedly until you feel confident in this subject.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Introduction to Powder and Powder Handling</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Get an introduction to the world of Powder</li> <li>• Understand the basic principles of Powder and Powder Handling</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Powder is everywhere

### CT-90111

 Target Group	<b>All</b>
 Duration	<b>30 minutes online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

Welcome to this course about Powder is everywhere. This e-learning module will give you an insight into what powder actually is and the three different kinds of powder handling solutions. Powder-to-liquid, liquid-to-powder, and powder-to-powder.

You will go through the lessons, click on hotspots, complete exercises, watch the movies and answer questions repeatedly until you feel confident in this subject.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Different types of powders</li> <li>• The properties of powder</li> <li>• How powders are processed</li> <li>• How various foods and beverages are produced using powders</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• Understand the basic principles of Powder and Powder Handling</li> <li>• Understand the different Powder Handling solutions</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Automation Introduction

### CT-90112

 Target Group	<b>Production personnel</b>
 Duration	<b>45 minutes online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

Welcome to this course about Automation introduction. In this e-learning you will understand the role of automation and how it works in the production industry.

You will go through the lessons, click on hotspots, complete exercises, watch the movies and answer questions over and over again until you feel confident in this subject.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Daily life automation</li> <li>• Automation advantages</li> <li>• Signals</li> <li>• Automation in production</li> <li>• How does it work</li> <li>• Food plant automation</li> <li>• Control your plant</li> <li>• Automation communication</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<ul style="list-style-type: none"> <li>• To understand the basic principles and definitions used in automation</li> <li>• To recognize hardware and software</li> <li>• To know the operator user interface</li> <li>• To understand the basics of automation communication and function</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Ingredient Doser

### CT-90131

 Target Group	<b>All</b>
 Duration	<b>30 minutes online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

This e-Learning is designed to provide the participants an understanding of the function and a description of the Tetra Pak® Ingredient Doser. Furthermore, it will give the participants maintenance skills for their regular duties and tasks on a Tetra Pak® Ingredient Doser. The e-Learning is designed in two steps and can be introduced progressively to participants with increasing knowledge requirements. The maintenance part of the e-Learning is task based around the Preventive Maintenance Recommendations and focuses on activities to be performed by the technicians.

The objectives are to reinforce the knowledge on how to carry out Standard Operating Procedure steps according to the Maintenance Manual (MM) and/or Technical Manual (TeM) including normal service activities that is performed by customer maintenance personnel. This training content will work as a repetition to reinforce good practices in the production area.

<b>Content</b>	<ul style="list-style-type: none"> <li>• What is Ingredient Doser</li> <li>• Description of Ingredient Doser flow</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>The principal objective for this course is to:</b></p> <ul style="list-style-type: none"> <li>• Understand the main component and functionality of the Ingredient Doser</li> <li>• Understand it´s industrial and process applications</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Introduction to Aseptic Production

### CT-90129

 Target Group	<b>Operators</b>
 Duration	<b>45 minutes online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

This course will give you an introduction in aseptic packaging. It will be the foundation for further training in how to operate a filling equipment that produce aseptic packages.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Aseptic Production</li> <li>• Packaging Material</li> <li>• The Aseptic Package</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>This course will inform you about:</b></p> <ul style="list-style-type: none"> <li>• Key terminology in aseptic production</li> <li>• Packaging material layers, trace a package, storage and handling of packaging material</li> <li>• Basic package terminology</li> <li>• Importance of doing regular package checks</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

## Introduction to Tetra Pak® A3 lines

### CT-90130

 Target Group	<b>Operators</b>
 Duration	<b>1.5 hours online</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

This course is designed for new hired operators that will work on a Tetra Pak® A3 equipment and line. This course will give you an insight in how to operate a Tetra Pak® A3 filling line.

The modules in the course will give you a possibility to prepare for next step, an instructor led training to learn how to operate the equipment.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Tetra Pak® Filling Machine</li> <li>• Prepare for Production</li> <li>• Run Production</li> <li>• Clean after Production</li> <li>• Maintaining the Equipment</li> <li>• Downstream Equipment</li> <li>• Learning Evaluation</li> </ul>
<b>Principal Objectives</b>	<p><b>This course will inform you about:</b></p> <ul style="list-style-type: none"> <li>• The different modules in the filling equipment</li> <li>• What to do before, during and after production</li> <li>• Introduction to how maintenance is organized</li> <li>• What downstream equipment is</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• WiFi connection</li> <li>• Headphones for audio quality</li> </ul>

# Assessment

We will assess the theoretical and practical competence of your operators. Results are analysed and reported back to you describing the knowledge areas where your operators should concentrate their competence development efforts in order to improve production performance.

## Assessment outcomes:

- Visualise current competence level and knowledge areas of staff
- Provide customised training proposal for more focused and refined competence development

Item	Assessment Name	Average Duration (Days)*	Max. Participants	Page Number
CTA-20140	Assessment of Operators Aseptic Processing Line 1 (Combined line of Tetra Alsafe™, Tetra Therm™ Aseptic Flex and Tetra Therm™ Lacta)	5	6	349
CTA-20141	Assessment of Operators Aseptic Processing Line 2 (Combined line of Tetra Alsafe™ and Tetra Therm™ Aseptic Flex)	5	6	349
CTA-20142	Assessment of Operators Aseptic Processing Line 3 (Combined line of Tetra Alsafe™ and Tetra Therm™ Aseptic VTIS)	5	6	349
CTA-20318	Assessment of Operators Tetra Pak® TBA/8-1000-12000	5	8	349
CTA-20125	Assessment of Operators Tetra Pak® TBA/19-0300-0400	5	8	349
CTA-20304	Assessment of Operators Tetra Pak® TBA/19-0300-0400 PullTab™	5	8	349
CTA-20315	Assessment of Operators Tetra Pak® Simply 8	5	8	349
CTA-20100	Assessment of Operators Tetra Pak® A3/CompactFlex-0200-0300	5	8	349
CTA-20101	Assessment of Operators Tetra Pak® A3/Speed-0200-0400	5	8	349
CTA-20102	Assessment of Operators Tetra Pak® A3/Flex-0200-0400	5	8	349
CTA-20105	Assessment of Operators Tetra Pak® A3/CompactFlex-0200-0300 PullTab™	5	8	349
CTA-20106	Assessment of Operators Tetra Pak® A1 Tetra Classic® Aseptic-0900	5	8	349
CTA-20313	Assessment of Operators Tetra Pak® A1 Tetra Fino® Aseptic-0900	5	8	349
CTA-20314	Assessment of Operators Tetra Pak® A1 Tetra Wedge® Aseptic-0900	5	8	349
CTA-20107	Assessment of Operators Tetra Pak® A3/Speed-0200-0400 PullTab™	5	8	349
CTA-20108	Assessment of Operators Tetra Pak® A3/Flex-0200-0400 PullTab™	5	8	349
CTA-20109	Assessment of Operators Tetra Pak® A3/Flex-0200-0400 DIMC	5	8	349
CTA-20110	Assessment of Operators Tetra Pak® A3/Speed-0200-0400 DIMC	5	8	349
CTA-20119	Assessment of Operators Tetra Pak® A3/Speed-0100	5	8	349
CTA-20120	Assessment of Operators Tetra Pak® A3/Flex-0100-0160	5	8	349
CTA-20121	Assessment of Operators Tetra Pak® E3/Speed-0100 DIMC	5	8	349
CTA-20122	Assessment of Operators Tetra Pak® A3/Flex-0100-0160 PullTab™	5	8	349
CTA-20123	Assessment of Operators Tetra Pak® A3/Flex-0100-0160 DIMC	5	8	349
CTA-20124	Assessment of Operators Tetra Pak® A3/Speed-0100 DIMC	5	8	349
CTA-20577	Assessment of Operators Tetra Pak® A3/CompactFlex-0400	5	8	349
CTA-20578	Assessment of Operators Tetra Pak® A3/CompactFlex-0400 PullTab™	5	8	349
CTA-20606	Assessment of Operators Tetra Pak® A3/Flex-0600 DIMC	5	8	349
CTA-20616	Assessment of Operators Tetra Pak® A3/Flex-0600	5	8	349

\*Duration will vary depending on the number of participants and plant set-up

Item	Assessment Name	Average Duration (Days)*	Max. Participants	Page Number
CTA-20128	Assessment of Operators Tetra Pak® E3/Flex-0100 DIMC	5	8	349
CTA-20137	Assessment of Operators Tetra Pak® E3/Speed Hyper 0200 PP	5	8	349

CTA-20260	Assessment of Quality Package Evaluation of QA/QC staff	2	7	351

\*Duration will vary depending on the number of participants and plant set-up

## Assessment of Operators

 Target Group	<b>Operators</b>
 Duration	<b>Check with Tetra Pak® Training Services</b>
 Prerequisites	<b>Recommended to have at least 6 months experience in Aseptic Production</b>
 Max. Participant	<b>6 / 8</b> <b>Check with Tetra Pak® Training Services</b>

### Description

We will assess the theoretical and practical competence of your staff on targeted equipment. Results are analysed and reported back describing the knowledge areas where your staff should concentrate their competence development efforts in order to improve production performance.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Start-up meeting</li> <li>• Written test</li> <li>• Interview</li> <li>• Observation</li> </ul> <p><b>In the areas of:</b></p> <ul style="list-style-type: none"> <li>• Daily care</li> <li>• Weekly care</li> <li>• Start up</li> <li>• Production</li> </ul>
<b>Principal Objectives</b>	Customer is able to visualise current theoretical and practical competency levels and gaps of the Technician group. This is followed up by a customised gap closing training proposal.
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment in operation               <ul style="list-style-type: none"> <li>– to have at least 1 session of daily care, weekly care, start up and production during Assessment event</li> </ul> </li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals to be available during the Assessment (prerequisites 2 sets)</li> </ul>

## Assessment of Technicians

 Target Group	<b>Technicians</b>
 Duration	<b>Check with Tetra Pak® Training Services</b>
 Prerequisites	<b>Recommended to have at least 6 months experience in Aseptic Production</b>
 Max. Participant	<b>6</b>

### Description

<b>Content</b>	<ul style="list-style-type: none"> <li>• Start-up meeting</li> <li>• Written test</li> <li>• Interview</li> <li>• Observation</li> </ul> <p><b>In the areas of:</b></p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Hygiene</li> <li>• Machine knowledge basic</li> <li>• Preventive maintenance</li> <li>• Corrective maintenance</li> <li>• Package evaluation</li> </ul>
<b>Principal Objectives</b>	Customer is able to visualise current theoretical and practical competency levels and gaps of the Technician group. This is followed up by a customised gap closing training proposal.
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Equipment in operation             <ul style="list-style-type: none"> <li>– able to assess in areas of safety, hygiene, machine knowledge basic, preventive maintenance, corrective maintenance and package evaluation</li> </ul> </li> <li>• Classroom with whiteboard / flip chart and projector</li> <li>• Set of manuals to be available during the Assessment (prerequisites 2 sets)</li> </ul>

## Assessment of Quality Package Evaluation of QA/QC staff

### CTA-20260

 Target Group	<b>QA and QC personnel supporting Aseptic Production</b>
 Duration	<b>Check with Tetra Pak® Training Services</b>
 Prerequisites	<b>None</b>
 Max. Participant	<b>7</b>

### Description

We will assess the theoretical and practical competence of your staff on targeted equipment. Results are analysed and reported back describing the knowledge areas where your staff should concentrate their competence development efforts to improve quality and production performance.

<b>Content</b>	<ul style="list-style-type: none"> <li>• Start-up meeting</li> <li>• Written test</li> <li>• Interview</li> <li>• Observation</li> </ul> <p><b>In the areas of:</b></p> <ul style="list-style-type: none"> <li>• Opening &amp; Closures</li> <li>• Package Integrity</li> <li>• Package Sampling</li> <li>• Sealing Quality by Red Ink</li> <li>• Material structure</li> <li>• Package and Sealing terminology</li> <li>• Package Forming</li> <li>• Sealing Quality by Teardown</li> </ul>
<b>Principal Objectives</b>	Customer will be able to visualise current theoretical and practical competency levels and gaps of individual QA personnel. This is followed up by a customised gap closing training proposal.
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Chemicals, Tools and Equipment are needed to perform package integrity test method such as Ammeter, Stretch pliers, Zonoscope, Scissors, Red ink, Disposable Syringe with needle diameter 0.4-0.5 mm</li> <li>• Good package sample at least 6 packs per person</li> <li>• Classroom or meeting room with whiteboard / flip chart and projector</li> <li>• Set of Operation Manual (OM) to be available during the Assessment (prerequisites 1 set)</li> </ul>

# Certification

## For high and consistent product quality

An operator's competence has a high impact on filling line performance. Operator certification verifies that an operator has the right competence to run a filling line correctly and safely.

## Certification outcomes:

- The certificate confirms that the operator has passed the certification
- The certificate proves that the operator can operate the equipment in a safe and correct way

Certificate Item	Certificate Name	Page Number
CER-10100 – CER-10114	Operator Certification Tetra Pak® A3/Flex Equipment	354
CER-10115 – CER-10126	Operator Certification Tetra Pak® A3/Speed Equipment	354
CER-10127 – CER-10130	Operator Certification Tetra Pak® A3/CompactFlex Equipment	354
CER-10131 – CER-10138	Operator Certification Tetra Pak® TBA/19 Equipment	354
CER-10139 – CER-10145	Operator Certification Tetra Pak® A1 Equipment	354
CER-10147 – CER-10149	Operator Certification Tetra Pak® TT/3 Equipment	354
CER-10150	Operator Certification Tetra Pak® TBA/8 Equipment	354
CER-10151	Operator Certification Tetra Pak® TBA/22 Equipment	354
CER-10154	Operator Certification Tetra Pak® TBA/21 Equipment	354
CER-10157	Operator Certification Tetra Pak® TR/27 and TR/28 Equipment	354
CER-10159	Operator Certification Tetra Pak® R2 Equipment	354

\*Ask your local market to find out about specific certificates

## Operator Certification

 Target Group	<b>Operators</b>
 Duration	<b>1 day per Operator</b>
 Prerequisites	<b>Recommended to have 12 months experience in Aseptic Production</b>
 Max. Participant	<b>Check with Tetra Pak® Training Services</b>

### Description

**Based on your needs, Operator certification can be performed on:**

- The filling equipment part of the filling line - this part of the certification is system-specific.

The certification provides a comprehensive evaluation of the operators' competence, including an online theoretical test and an on-site practical skills assessment under the supervision of Tetra Pak experts. The main goal for the operator is to be approved and receive a certificate.

<b>Content</b>	<p><b>Written assessment:</b> This part consists of a multiple-choice test on operating specific equipment. The test is taken online whenever it best suits the operator, and lasts less than one hour. The operator must pass this written assessment before proceeding to the practical assessment.</p> <p><b>Practical assessment:</b> According to a global standardized methodology, a Tetra Pak assessor supervises the operator during normal production to verify that the operator can safely and correctly run a specific line/equipment. The practical test covers three areas:</p> <ul style="list-style-type: none"> <li>• Production start-up</li> <li>• Production and production control</li> <li>• Weekly care</li> </ul> <p>To ensure objectivity, the test follows a predefined checklist. All results of written and practical assessments are stored in a database.</p>
<b>Principal Objectives</b>	<p><b>Ensure that the operators have the right competence. This will result in:</b></p> <ul style="list-style-type: none"> <li>• Fewer and shorter stops and consequently increased productivity</li> <li>• High and consistent product quality</li> <li>• Improved safety in the working environment</li> </ul>
<b>Required Facilities</b>	<ul style="list-style-type: none"> <li>• Computer with WIFI to perform written assessment.</li> <li>• Set of manuals to be available during the written assessment.</li> <li>• Operator and equipment available during 1 day practical assessment. The practical assessment covers start up of production, normal production, daily and weekly care.</li> </ul>

## Contact Tetra Pak®

Our comprehensive training offer is available worldwide and we provide trainings both on our customers site and at our Training Centres globally. We also host training events at some of our production and development sites around the world. For example: Ice-cream in Denmark and Centre of Expertise Soya in Singapore.

We are providing remote training on request.
