

Tetra Pak[®] Membrane Installation Tool

For easy loading of spiral-wound membranes

Application

Do you always need an extra hand with membrane installation?

Tetra Pak's easy-to-use tool supports the membrane elements and ensures that they are aligned correctly with seals: the anti-scoping device (ATD) or the energy-saving ATD (ESA).

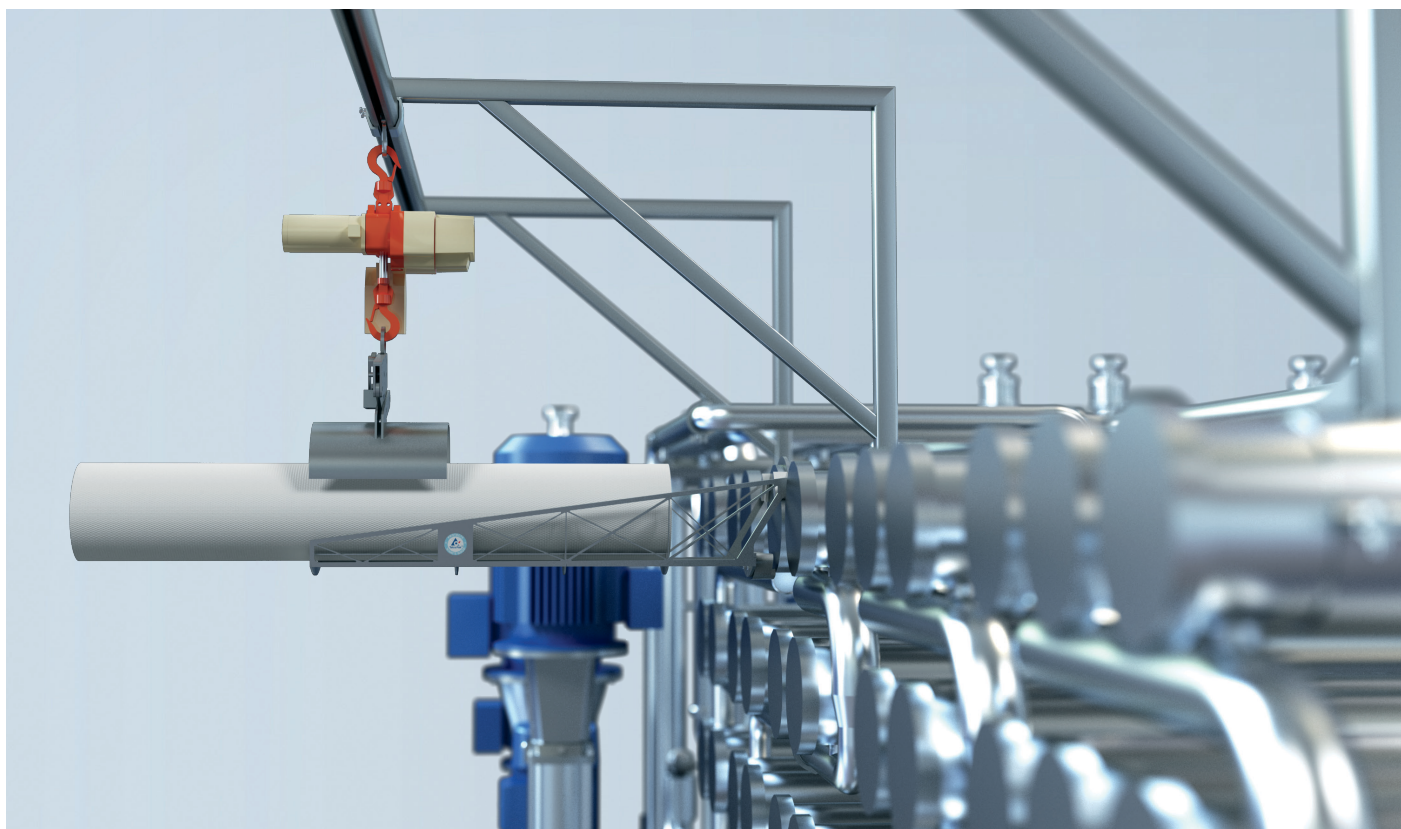

Patent pending.

Highlights

- Improved work environment for employees responsible for maintaining your filtration system
- Substantial time savings, as the installation can be carried out correctly the first time
- The tool is easy to adapt to different makes of membrane housings
