Delivery Performance List

The Delivery performance list is sent out each Tuesday to visualize all order lines completed the past week. In order to provide an opportunity for commenting on the statistics, each order line is marked as OK or delayed. If there should be a Delay, which should not be considered as delayed, it is the supplier's responsibility to contact their responsible Replenishment Officer or Supply Chain Analyst at Technical Service and inform us about the situation.

Always remember that the LEAD time is in calendar days and we expect good to be in our warehouse on that date, so you must take into consideration the transportation time that has been provided with the routing order from PSC transport solutions. Any delay in our goods receiving area would be corrected.

Columns description:

- Supplier: is the supplier number
- Supplier name
- Material number
- Description of the material
- Supplier part no
- Order No which is the Purchase order no
- Item: in the row no in the PO
