

## PRESS RELEASE

### **One step closer to Zero Breakdown — Tetra Pak to Share How Predictive Maintenance Helps F&B Manufacturers Boost Productivity in Upcoming Webinar**

On 26 September 2018 from 11.00 AM-12.00 PM. Tetra Pak, the world's leading food processing and packaging solutions company, is hosting a free webinar to provide information about its predictive maintenance service. The company joins forces with Microsoft to explain what Industry 4.0 is and what are the implications for food manufacturers. The role Tetra Pak's predictive maintenance service plays in achieving these goals and how the food and beverages industry can further the advancement of Industry 4.0 will also be covered

During the webinar, the company's top experts together with Microsoft will take the audience through three key topics: Industry 4.0- New technology trends in the manufacturing industry and how it impacts F&B, How technology changes the way we do maintenance in F&B manufacturing and How predictive maintenance can increase process efficiency and profitability.

With 60 years of food manufacturing experience, Tetra Pak understands that no two operations are alike. Entering the age of Industry 4, Tetra Pak Services is not just about fixing something that is broken. It is about using the cutting-edge digital tools and innovations like connected machines, data analytics, remote support, etc. – to improve performance, optimize costs and ensure food safety throughout the lifecycle of operations.

Predictive Maintenance is the company's commitment to take the operation's reliability to the next level. It goes beyond prevention to predicting failures before they occur. With real-time monitoring of critical areas in the equipment, this particular service helps to find the deviations that could lead to machine stops or breakdowns. Data is sent securely to specialists at Tetra Pak's global Quality and Performance Management Centre who analyze patterns and send alerts to service engineers around the globe. The result is fewer unexpected breakdowns, reduced waste, increased uptime and greater peace of mind. The company expect to have around 600 customers around the world who will use or sign up for this service within this year.

“By equipping factories with the latest technology, our Predictive Maintenance customers are not just future-proofing their investments. Together with us, they are leading the front to shape Industry 4.0. Since thousands of connected lines provide useful data, every Predictive Maintenance customer brings the industry one step closer to zero breakdowns. We are pleased to share how you can participate in this journey towards defining the future.” said Rajat Shah, Services Director of Tetra Pak (Thailand).
